the idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades it is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind as a result there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively this handbook provides a comprehensive reference text on ecosystem services integrating natural and social science including economics collectively the chapters written by the world's leading authorities demonstrate the importance of biodiversity for people policy and practice they also show how the value of ecosystems to society can be expressed in monetary and non monetary terms so that the environment can be better taken into account in decision making the significance of the ecosystem service

paradigm is that it helps us redefine and better communicate the relationships between people and nature it is shown how these are essential to resolving challenges such as sustainable development and poverty reduction and the creation of a green economy in developing and developed world contexts
