design lives in everything we do in supermarket queues we find design baked into how the cashier tallies our total and the way we pay in instant messaging apps design disarms us with emoji or thoughtfully lets us mute notifications every interaction and space we experience was designed in some way yet the design of these experiences is too often seen as the exclusive domain of design wizards and secretive geniuses but ongoing experience design studio believes design is for everyone here they demystify the 5 stage method they use for a variety of projects how did they rethink the banking experience for gen y how did they fuse the traditional and modern in a heritage shophouse they share their philosophy and the rationale behind specific design decisions because they want to communicate a simple message that you can design too and by walking you through the thoughts and steps they take from a project's brief to its conclusion they hope you find the inspiration and chutzpah to design a whole lot of delightful experiences

designers deal with an overwhelmingly rich reality undetermined requirements highly intricate social situations lack of information as well as lack of resource and time restrictions every designer is faced and challenged by this complexity a central thesis explored in this book is that complexity characteristic for design activities emerges from an inherent instability of design activities we will argue that this instability is a consequence of messy dynamic highly interdependent and unpredictable dynamics between design situations design outcomes and design resources design situations design outcomes and design resources are complex structures that are not independent of each other they are also continuously changing in great part due to forces that are beyond designers control in this book we describe 11 patterns of design dynamics the patterns of dynamics illustrate how designers deal with ambiguity uncertainty and complexity when they attempt to change the world as such these patterns are universal to all design disciplines design disciplines may differ in which situations they address which outcomes they create and which resources they use but the way how people deal with ambiguity uncertainty and complexity is cross disciplinary consequently we present examples of patterns of dynamics from a very diverse set of design disciplines patterns of design dynamics co evolution of problem solution puzzle solving solution looking for a problem pandora s box the force awakens your design is your reflection you are a reflection of your design design by buzzword conformity commitment cherry picking
