From the acclaimed landscape designer, historian, and author of *American Eden*, a lively, unique, and accessible cultural history of modern cities from suburbs, downtown districts, and exurban sprawl to shopping malls and sustainable developments that allows us to view them through the planning, design, architects, and movements that inspired, created, and shaped them. *Dream Cities* explores our cities in a new way as expressions of ideas often conflicting about how we should live, work, play, make, buy, and believe. It tells the stories of the real architects and thinkers whose imagined cities became the blueprints for the world we live in from the nineteenth century to today. What began as visionary concepts—sometimes utopian, sometimes outlandish, always controversial—were gradually adopted and constructed on a massive scale in cities around the world from Dubai to Ulan Bator to London to Los Angeles. Wade Graham uses the lives of the pivotal dreamers behind these concepts, as well as their acolytes and antagonists, to deconstruct our urban landscapes: the houses, towers, civic centers, condominiums, shopping malls, boulevards, highways, and spaces in between. Exposing the ideals and ideas embodied in each, from the baroque fantasy villages of Bertram Goodhue to the superblocks of Le Corbusier's *Radiant City* to the pseudo-agrarian dispersal of Frank Lloyd Wright's *Broadacre City*, our upscale leafy suburbs, downtown skyscraper districts, infotainment-driven shopping malls, and sustainable eco-developments are seen as never before. In this elegantly designed and illustrated book, Graham uncovers the original plans of brilliant, obsessed, and sometimes megalomaniacal designers, revealing the foundations of today's varied municipalities. *Dream Cities* is nothing less than a field guide to our modern urban world, illustrated with 59 black and white photos throughout the text. What does it take to become an astronaut? How do astronauts train to be in outer space? Readers will learn all about what it's like to become an astronaut. Low-level chunked text alongside stunning photographs will engage the youngest space enthusiasts.
