generations to enjoy this book explores the new politics of class in 21st century britain it shows how the changing shape of the class structure since 1945 has led political parties to change which has both reduced class voting and increased class non voting this argument is developed in three stages the first is to show that there has been enormous social continuity in class divisions the authors demonstrate this using extensive evidence on class and educational inequality perceptions of inequality identity and awareness and political attitudes over more than fifty years the second stage is to show that there has been enormous political change in response to changing class sizes party policies politicians rhetoric and the social composition of political elites have radically altered parties offer similar policies appeal less to specific classes and are populated by people from more similar backgrounds simultaneously the mass media have stopped talking about the politics of class the third stage is to show that these political changes have had three major consequences first as labour and the conservatives became more similar class differences in party preferences disappeared second new parties most notably ukip have taken working class voters from the mainstream parties third and most importantly the lack of choice offered by the mainstream parties has led to a huge increase in class based abstention from voting working class people have become much less likely to vote in that sense britain appears to have followed the us down a path of working class political exclusion ultimately undermining the representativeness of our democracy they conclude with a discussion of the brexit referendum and the role that working class alienation played in its historic outcome what is it like to be an isolated old widow living alone on the bare old age pension in the 1960s the question had become a standard refrain originally published in 1966 this was the first full length study by a sociologist of isolation in old age although the majority of old people were in no sense a problem group at the time a substantial minority of the elderly were alone in one or more ways about 1.3 million people aged sixty five and over in britain lived alone a large number admitted to feeling lonely at least sometime about a million were actually socially isolated in terms of low level and frequency of social contact mr tunstall also uses a fourth category of aloneness namely anomie as developed by durkheim merton and srole this report uses careful and statistical analysis of the four types of aloneness and of specially affected groups such as the single the recently widowed and the housebound but it also includes details of interviews with ten highly

individual old people from suburban harrow booming northampton industrial revolution oldham and rural south norfolk the book contains a discussion of the problem of personality in isolation and a commentary on the inadequacies of social theory about old age finally the concluding chapter suggests a wide variety of policy measures which might help to alleviate social isolation in old age this The Middle Class in World Society 2020-05-21

This book explores the new politics of class in 21st-century Britain. It shows how the changing shape of the class structure since 1945 has led political parties to change, which has both reduced class voting and increased class non-voting. This argument is developed in three stages. The first is to show that there has been enormous social continuity in class divisions. The authors demonstrate this using extensive evidence on class and educational inequality, perceptions of inequality, identity, and awareness, and political attitudes over more than fifty years. The second stage is to show that there has been enormous political change in response to changing class sizes. Party policies, politicians' rhetoric, and the social composition of political elites have radically altered. Parties offer similar policies, appeal less to specific classes, and are populated by people from more similar backgrounds. Simultaneously, the mass media have stopped talking about the politics of class. The third stage is to show that these political changes have had three major consequences: first, as Labour and the Conservatives became more similar, class differences in party preferences disappeared; second, new parties, most notably UKIP, have taken working-class voters from the mainstream parties; third, and most importantly, the lack of choice offered by the mainstream parties has led to a huge increase in class-based abstention from voting. Working-class people have become much less likely to vote. In that sense, Britain appears to have followed the US down a path of working-class political exclusion, ultimately undermining the representativeness of our democracy. They conclude with a discussion of the Brexit referendum and the role that working-class alienation played.

in its historic outcome
