Autodesk Robot Structural Analysis Professional is structural load analysis software that verifies code compliance and uses BIM integrated workflows to exchange data with Revit. It can help you to create more resilient, constructible, and code-compliant designs. Simulate and test wind, point, and other loads for static, modal, and nonlinear structures. See system requirements.

Autodesk Robot Structural Analysis Professional helps structural engineers exchange analysis and model data with Revit, create more constructible, code-compliant, and accurate designs, simulate and test wind, point, and other loads for static, modal, and nonlinear structures, and see system requirements.
