one of the most powerful though deceptively simple of current ideas is erik h erikson s insight into the nature of the interrelationships of the psychogenic development of an individual and the historical development of the times this insight present in all his work beginning with childhood and society and particularly examined in young man luther and gandhi s truth

finds full and mature expression in the present book just as erikson s notion of the identity crisis has been obscured and confused as it has passed into everyday speech so too have glib popularizers misused his notions of psychobiography and psychohistory thus this book is of supreme importance not merely to set the record straight but more especially to make these vital ideas central to our time fully available to deal with life history and history psychoanalytically erikson points out means to engage in a kind of circular chronology our inquiry always points to selected periods in the past which in throwing new light on the present suggest new forays into the more distant past consequently this book opens with autobiography ranges through discussions of freud and gandhi and of the meaning of ideas on womanhood and concludes with an examination of the role of psychoanalysis in the evolution of ethics

erikson's theory of psychosocial development is a central part of his theory of human development. it is based on the idea that we go through eight stages of development, each with a specific crisis that we must resolve. the crises are: 1. trust vs. mistrust, 2. autonomy vs. shame and doubt, 3. initiative vs. guilt, 4. industry vs. inferiority, 5. identity vs. role confusion, 6. intimacy vs. isolation, 7. love vs. loneliness, and 8. ego integrity vs. despair. the first four stages occur in childhood, and the last four occur in adulthood. the theory suggests that if we resolve the crises successfully, we will develop a strong sense of self and be able to form healthy relationships. if we do not resolve the crises, we may experience difficulties in later life.
