**I Cure Cancer** 2019-05-30 i cure cancer say it because only you can cure your cancer say i cure cancer how do you cure cancer cure your acidosis and kill your pathogens dr bernardo was treating cancer patients for 50 years with this alkaline balancing protocol with a 90 success rate this book has his protocol and many experts to back it up i cure cancer debuted in 2006 as a movie in ny it explains for curing cancer natural healing is the only way go holistic get alkaline you don t die of cancer you die of acidosis my info isn t to replace your doctors it s to add to your arsenal i m just a filmmaker that being said these days going to your doctor is not enough due to the fact that the medical business is just that a business therefore it offers only those treatments that are lucrative for the medical industry those treatments have a dismal long term remission rate and they are only a tiny slice of what s available for treating cancer and what has worked for other people therefore if you want to make sure you are doing everything you can to cure your cancer and if you are willing to take responsibility for your own life you must not only go to your doctor but also do your own research in order to learn about options that could either complement or replace conventional western methods chemotherapy radiation and surgery these methods work for some but also have serious and sometimes fatal side effects i am not a doctor nor am i offering a cure to anyone the i in i cure cancer refers to you the person who is logging on to the site in search of information regarding what other fellow human beings have done in battling this horrendous disease in short as with any matter of importance dealing with one s well being the first step is in taking responsibility for one s self to gather as much information on the subject as possible in order to make educated assessments on what would work best for them i made the film because as an actor in hollywood it was the next viable venue for me to express what i had to say as a spirit on this planet regular movies weren t cutting it reading someone else s lines weren t my thing i wanted to say my own lines so i did through other people i interviewed them to tell my story in this documentary it was that cancer was curable if you went holistic i realized the movie had to be made into a book i had to show the world what i found and include a basic do it at home holistic health program via dr bernardo majalca so here you go everything in one book for your cancer healing journey if you are in a hurry skip to chapter 6 read dr b s story then do the protocol in chapter 7 it takes 3 months to a year and a half sometimes to get your ph balanced once you do the cancer dies bernardo would say if your ph is 7 to 7.4 for 3 months straight you are cancer free because cancer can not live in an oxygenated body disclaimer we are not doctors just regular people not trusting rockefeller western medicine sharing our insights only you can cure your cancer so say it say icurecancer i hope this book helps you i worked hard on it good luck and god bless peace ian jacklin

*Novel Approach to Curing Cancer* 2019-08-11 in this book the authors make extensive comparison between medical treatments and health optimization methods an improved mind body model in order to determine their relative and true benefits for cancer patients for the health optimization method they examine its use history acceptance and performance throughout its history and for medicine they examine medical treatment history leading cancer theories standard of care formation formation of legal frameworks and overwhelming performance data we could find from the massive medical literature we can show with irrefutable evidence why medicine cannot cure cancer and what role it is actually playing the book 1 discloses a systematic methodology for curing cancer in confidence 2 extensively discusses how to do right things to win a speed contest in fighting cancer 3 extensively discusses how to do right things to control cancer cell population a critical strategy for survival 4 provides detailed analysis of fatal common mistakes that have taken nine of ten cancer patient lives 5 exposes flaws in the cancer treatment models medical research model the foundation of medicine and 6 conduct a detailed analysis of four killer factors which are routinely found in nearly all cancer care the approach used to similar to one used in health optimization engineering a new branch of health art the book teaches the decisive roles of speed number and multiple factors and how to fight cancer by using a two way optimization methodology those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals our simulation and our kinetic studies show that both cancer development and reversal processes would take many years the rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate this is why medicine cannot recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish the approach we use in this book is directly in conflict with three core concepts in medicine dualism reductionism and population based approach moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases we try to analyze every issue in the most comprehensive way our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and mountains of actual performance data the most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews we try to built a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model

**Reversing Cancer** 2004-04-01 cancer there are few words in the english language having such a visceral personal impact cancer patient cancer survivor pretty much anyone over the age of 30 knows one a family member a friend someone lost too soon someone forever changed but we don't really like to talk about it because there's really not much we can do we fight cancer sure but we rarely win defeating cancer is one of medical science's greatest challenges so when a novel approach to treatment seems promising there is an intense interest in its progress and those who are making it this book is about both the progress and the pioneers and its focus is the revolutionary science of something called cancer immunotherapy this medical marvel cancer immunotherapy also called immuno oncology is still in its infancy yet mobilizing the immune system to recognize and attack cancer has long been imagined and occasionally attempted for more than 100 years it is only just recently that significant in fact unprecedented progress has been made with the use of newly approved immunotherapy treatments there are now reports of hundreds if not thousands of cancer patients with advanced disease living years beyond all prior expectation some of these once terminally ill patients are now called cured this has never happened before as dr jill o donnell tormey comments in the foreword it has taken decades of basic research and billions of dollars of investment to build the foundation upon which today's lifesaving treatments are based this book offers a uniquely entertaining yet inspiring glimpse into the lives and minds of the academic and industry pioneers who forged this new field it is a story of how an obscure and oft derided field of cancer research and the tenacious few scientists who refused to abandon it came from behind to become the new darling of oncology the book's author neil canavan is an experienced commentator on new developments in medical science his portraits of 25 of the pioneers in immunotherapy are the culmination of two years of travel to laboratories offices and conferences

around the world and countless hours of conversation with individuals immersed in a vitally important promising assault on a dread disease that kills more than eight million people each year worldwide from dust jacket
