The Earl's Entanglement (Border Series Book 5) 2018-02-22 garrick helmsley earl of clave and linkirk finds himself escorting lady emma the impulsive and irresistible sister in law of his old friend from england to scotland the more time he spends with her the more he wishes to end his betrothal which will secure his scottish earldom will love find a way to bring the earl and his lady together

The Cultures of Entanglement 2024-03-31 the symbolic meaning of plants their relevance to religion and the metaphorical provocations in the order of knowledge culture and political power underline the role of plants as something more than passive objects current theoretical and artistic discourses have been seeking access to the world independently of man by focusing on the nonhuman other the contributors to this volume examine the historical philosophical and scientific findings that generate this idea in what way are such perspectives manifest in contemporary art do artists develop a particular approach that enables nonhuman life forms like plants insects or animals to have an impact

Entanglement 2009-08-01 this original book is a much needed and far reaching exploration of post apartheid south african life worlds entanglement aims to capture the contradictory mixture of innovation and inertia of loss violence and xenophobia as well as experimentation and desegregation which characterises the present the author explores the concept of entanglement in relation to readings of literature new media forms and painting in the process she moves away from a persistent apartheid optic drawing on ideas of sameness and difference and their limits in order to elicit ways of living and imagining that are just starting to take shape and for which we might not yet have a name in the background of her investigations lies a preoccupation with a future oriented politics one that builds on largely unexplored terrains of mutuality while being attentive to a historical experience of confrontation and injury

Archaeology of Entanglement 2016 entanglement theory posits that the interrelationship of humans and objects is a delimiting characteristic of human history and culture here leading archaeological theorists apply this concept to a broad range of topics including archaeological science heritage and theory itself

Entanglement 2004 of contents now s the time disaster bag tools or traps damage ring shout and sojourns fish jet sledge trap

The Defence of the undefended Border 1977 omhandler relationerne mellem usa og canada og det militære beredskab der har eksisteret omkring deres fælles grænse

Privatising Border Control 2022-11-22 in recent years many breaches of immigration law have been criminalised foreign nationals are now routinely identified in court and in prison as subjects for deportation police at the border and within the territory refer foreign suspects to immigration authorities for expulsion within the immigration system new institutions and practices rely on criminal justice logic and methods in these examples it is not the state that controls the national border instead it is often privately contracted companies this collection of essays explores the growing use of the private sector and private actors in border control and its implications for our understanding of state sovereignty and citizenship privatising border control is an important empirical and theoretical contribution to the growing interdisciplinary body of scholarship on border control it also contributes to the academic inquiry into the growing privatisation of policing and punishment these domains once regarded as central to the state s police power and its monopoly on violence are increasingly outsourced to private providers with contributions from scholars across a range of jurisdictions and disciplines including criminology law and political science privatising border control provides a novel and comparative account of contemporary border control policy and practice this is a must read for academics practitioners and policymakers interested in immigration law and the growing use of the private sector and private actors in border control

A Wire Entanglement 1908 the 21st century has witnessed some of the largest human migrations in history europe in particular has seen a major influx of refugees redefining notions of borders and national identity this interdisciplinary volume brings together leading international scholars of migration from perspectives as varied as literature linguistics area and cultural studies media and communication visual arts and film studies together they offer innovative interpretations of migrants and contemporary migration to europe enriching today s political and media landscape and engaging with the ongoing debate on forced mobility and rights of both extra european migrants and european citizens

Representing 21st-Century Migration in Europe 2022-02-11 analysing the plasma of paid mexicana o donors in the us airport vomit in ebola epidemics and the semen of soldiers with genitourinary injuries this book shows how security practices focus upon governing bodily fluids and as a result perpetuate inequalities

Bodily Fluids, Fluid Bodies and International Politics 2024-06-24 this book examines how lampedusa italy s southernmost island has become a transnational symbol representing migration to europe from the global south it analyses how three very different associations have used the name lampedusa as a means of restoring a sense of subjectivity or agency to migrants themselves jacopo colombini argues that the work of the archivio

delle memorie migranti rome the self organised refugee group lampedusa in hamburg and the lampedusa based collettivo askavusa offers an alternative to the stereotypical often racially connoted public discussion of migrant presence in italy and europe he also demonstrates however that the marginalisation of migrant and refugee voices in the public discourse is also partially and unavoidably reproduced in the cultural projects that wish to restore their agency

Transnational Lampedusa 2024-01-08 yakinthou throws light on the challenges of adopting political settlements in frozen conflicts and divided societies by focusing on the conflict in cyprus the resolution of which has for years been held up in large part by elite intransigence the book offers answers for why elites in cyprus are so unwilling to adopt a power sharing solution

Political Settlements in Divided Societies 2009-07-23 the fiftieth anniversary of the long entanglement between the united states and nato is an appropriate occasion to reflect one of the few nato studies to concentrate on the history of the alliance particularly the relationship between its senior partner and its european allies this study examines critical issues in depth to uncover the ability of the allies to surmount their internal divisions and to confront their soviet adversary while nato archives are still not fully open the use of declassified documents from the national archives and the presidential libraries are of invaluable assistance in considering the historical role of america in the alliance and the continuing relevance of the organization in u s foreign policy the twelve chapters of this book provide analyses of important issues in the organization s history and are connected by brief contextual narratives the resulting picture depicts a fifty year history in which the difficulties in arriving at a consensus among the fifteen allies each understandably concerned with its own national interests rival those of the alliance in dealing with the communist threat the implosion of the soviet empire in the early 1990s left the organization in search of new reasons for its own existence while centrifugal forces are arguably greater today than they were during the cold war none of the allies seeks to terminate this long entanglement

The Long Entanglement 1999-03-30 interior design on edge explores ways that interiors both constitute and upset our edges whether physical conceptual or psychological imagined implied necessary or discriminatory the essays in this volume explore these questions in history theory and praxis through a focus on different periods cultures and places interior design on edge showcases new scholarship that expands and contests traditional relationships between architecture interiors and the people that use and design them provoking readers to consider the interior differently moving beyond its traditional architectural definition focusing on the concept of interiority considered in a wider sense it draws on interdisciplinary modes of investigation and analysis and reflects the latest theoretical developments in the fields of interior design history and practice with new research from both established and emerging authors this volume will make a valuable contribution to the fields of interior design architecture art and design history cultural history visual culture studies and urban studies

Interior Design on Edge 2024-04-25 this second of two volumes on issues surrounding oil and gas examines a succession of fundamental changes in the european energy economy during the last 40 years examined are the reasons why imported oil replaced indigenous coal as the primary energy source in the early post world war ii period the discovery and exploitation of the north sea basin s hydrocarbons resources and the evolution of the continent s natural gas markets from the early 1960s when it accounted for less than two percent of total energy used to the current contribution of more than 25 percent and an expected eventual share of 35 percent of europe s energy supply these powerful and complex dynamics of europe s energy sector are then put in the context of the broader political and economic structures and policies that have emerged over the last four decades

Oil and Gas: Europe's entanglement 2001 this book takes up the stimuli of new international historiography albeit focusing mainly on the two regimes that undoubtedly provided the model for fascist movements in europe namely the italian and the german starting with a historiographical assessment of the international situation vis à vis studies on fascism and national socialism and then concentrate on certain aspects that are essential to any study of the two dictatorships namely the complex relationships with their respective societies the figures of the two dictators and the role of violence this volume reaches beyond the time frame encompassing fascism and national socialism experiences directing the attention also toward the period subsequent to their demise this is done in two ways on the one hand examining the uncomfortable architectural legacy left by dictatorships to the democratic societies that came after the war on the other hand the book addresses an issue that is very much alive both in the strictly historiographical and political science debate that is to say to what extent can the label of fascism be used to identify political phenomena of these current times such as movements and parties of the so called populist and souverainist right

Rethinking Fascism 2022-01-19 return to twin peaks offers new critical considerations and approaches to the twin peaks series as well as reflections on its significance and legacy with texts that analyze the ways in which

readers and viewers endow texts with meaning in light of historically situated and culturally shared emphases and interpretive strategies this volume showcases the ways in which new theoretical paradigms can reinvigorate and enrich understanding of what twin peaks was and what it has become since it went off the air in 1991

Return to Twin Peaks 2015-11-17 china's digital presence in the asia pacific explores china's digital presence in the asia pacific region drawing on political economy of the media industry analysis platform studies and cultural policy studies the book shows that china's commercial digital platforms are increasingly recognized outside china and can disseminate chinese culture more effectively than government supported media it illustrates how these platforms are contributing to chinese cultural influence their perceived reputation and obstacles in the region while pursuing a combined approach of culture industry internet and platform in considering the multi layered rise of the china argument the book considers its growing technological status as an innovative nation through four policy approaches culture industry internet and platform other characterizations include intelligent and social these characterizations show how china is rejuvenating drawing technological knowhow from the region and adding to its cultural and soft power the book focuses on six locations hong kong taiwan singapore malaysia australia and new zealand the authors analyse beijing's changing policies towards the governance of culture internet technologies and digital platforms as well as examining consumer perceptions of china and chinese products in the asia pacific region in using the characterizations the authors provide a comprehensive analysis of how chinese cultural and creative industries became digital as well as investigating the key players and the leading platforms including alibaba tencent bytedance tiktok baidu iqiyi and meituan

Chinas Digital Presence in the Asia-Pacific 2020-12-15 the moving form of film historicizing the medium through other media charts the ways in which crossing borders between film and other arts and media can provide an encompassing inclusive and non teleological understanding of film history evolutionary narratives of cinema have traditionally adopted the second world war as a watershed that separates classical hollywood films from modern european productions a scheme that subjects the entire world to the cinematic history of two hegemonic centres in turn histories of film as a technological medium have focused on the specificity of cinema as it gradually separated from the other art and medial forms theatre dance fairground spectacle painting literature still photography and other pre cinematic modes taking an ambitious step forward with relation to these approaches this book focuses on the fluid quality of the film form by exploring an array of exciting and often neglected artistic expressions worldwide as they compare and interconnect films across temporal geographical and cultural borders by observing the ebb and flow of film's contours within the bounds of other artistic and medial expressions the chapters aspire to establish a flexible historical platform for the moving form of film posited from production to consumption as a transforming and transformative medium

Air War Over South Vietnam, 1968-1975 2000 beyond thalassocracies aims to evaluate and rethink the manner in which archaeologists approach understand and analyze the various processes associated with culture change connected to interregional contact using as a test case the world of the aegean during the late bronze age c 1600 1100 bc the 14 chapters compare and contrast various aspects of the phenomena of minoanisation and mycenaeanisation both of which share the basic underlying defining feature of material culture change in communities around the aegean this change was driven by trends manifesting themselves in the dominant palatial communities of each period of the bronze age over the past decade our understanding of how these processes developed and functioned has changed considerably whereas current discussions on minoanisation have already been informed by more recent theoretical trends especially in material culture studies and post colonial theory the process of mycenaeanisation is still very much conceptualized along traditional lines of explanation since these phenomena occurred in chronological sequence it makes sense that any reappraisal of their nature and significance should target those regions of the aegean basin that were affected by both processes highlighting their similarities and differences thus in the present volume we focus on the southern and eastern aegean in particular the cyclades dodecanese and the north eastern aegean islands

The Moving Form of Film 2023-05-12 film came to the territory that eventually became israel not long after the medium was born casting a giant shadow is a collection of articles that embraces the notion of transnationalism to consider the limits of what is israeli within israeli cinema as the state of israel developed so did its film industries moving beyond the early films of the yishuv which focused on the creation of national identity the industry and its transnational ties became more important as filmmakers and film stars migrated out and foreign films filmmakers and actors came to israel to take advantage of high quality production values and talent this volume edited by rachel harris and dan chyutin uses the idea of transnationalism to challenge the concept of a singular definition of israeli cinema casting a giant shadow offers a new understanding of how cinema has operated artistically and structurally in terms of funding distribution and reception the result is a thorough investigation of the complex structure of the transnational and its impact on national specificity when

considered on the global stage

Beyond Thalassocracies 2016-08-31 here is the latest edition of the world's premier annual showcase of horror and dark fantasy fiction it features some of the very best short stories and novellas by today's masters of the macabre including neil gaiman brian keene elizabeth massie glen hirshberg peter atkins and tanith lee the mammoth book of best new horror also features the most comprehensive yearly overview of horror around the world lists of useful contact addresses and a fascinating necrology it is the one book that is required reading for every fan of macabre fiction praise for the series well crafted celebration of a continuously inventive genre sfx magazine the must have annual anthology for horror fans time out an essential volume for horror readers locus in an age where genre fiction is often just reheated pastiche the best new horror series continues to break from the herd consistently raising the bar of quality and ingenuity rue morgue brilliantly edited and most instructively introduced by legendary anthologist stephen jones realms of fantasy one of horror's best publishers weekly

Casting a Giant Shadow 2021-07-06 this study presents the history of the market photo workshop mpw in johannesburg and works produced by its new generation of photography students founded in 1989 by internationally renowned documentary photographer david goldblatt the mpw has reflected upon south african political struggles and sociocultural changes since its creation its foundation parallels a moment in time when photography was considered a truth telling genre and an essential source of documents deployed against the apartheid regime this book reflects on the evolution of the mpw in the post apartheid era and explores how its new generation of students engages the photographic tradition of this institution and the revolutionary times that accompanied its creation to question their present moment the book will be of interest to scholars working in art history visual studies photography african studies cultural studies and post colonial studies

The Mammoth Book of Best New Horror 19 2011-08-04 the first two seasons of star trek discovery the newest instalment in the long running and influential star trek franchise received media and academic attention from the moment they arrived on screen discovery makes several key changes to star trek's well known narrative formulae particularly the use of more serialized storytelling appealing to audiences changed viewing habits in the streaming age and yet the storylines in their topical nature and the broad range of socio political issues they engage with continue in the political vein of the series megatext this volume brings together eighteen essays and one interview about the series with contributions from a variety of disciplines including cultural studies literary studies media studies fandom studies history and political science they explore representations of gender sexuality and race as well as topics such as shifts in storytelling and depictions of diplomacy examining discovery alongside older entries into the star trek canon and tracing emerging continuities and changes this volume will be an invaluable resource for all those interested in star trek and science fiction in the franchise era

The Market Photo Workshop in South Africa and the 'Born Free' Generation 2023-09-15 what is quantum radar a hypothetical kind of remote sensing called quantum radar is based on quantum mechanical phenomena like the uncertainty principle and quantum entanglement this technology is still in its conceptual stages in the broadest sense a quantum radar can be understood as a device that operates in the microwave range and takes advantage of quantum properties either from the perspective of the radiation source or the output detection as a result it is superior to a classical radar in terms of its performance capabilities one strategy involves making advantage of input quantum correlations in conjunction with an appropriate interferometric quantum detection at the receiver this is an example of such method how you will benefit i insights and validations about the following topics chapter 1 quantum radar chapter 2 quantum teleportation chapter 3 quantum entanglement chapter 4 quantum key distribution chapter 5 timeline of quantum computing and communication chapter 6 local hidden variable theory chapter 7 spontaneous parametric down conversion chapter 8 homodyne detection chapter 9 quantum network chapter 10 optical parametric oscillator chapter 11 quantum eraser experiment chapter 12 delayed choice quantum eraser chapter 13 noon state chapter 14 quantum imaging chapter 15 quantum lithography chapter 16 quantum sensor chapter 17 ghost imaging chapter 18 cat state chapter 19 quantum illumination chapter 20 quantum microscopy chapter 21 optical cluster state ii answering the public top questions about quantum radar iii real world examples for the usage of quantum radar in many fields iv 17 appendices to explain briefly 266 emerging technologies in each industry to have 360 degree full understanding of quantum radar technologies who this book is for professionals undergraduate and graduate students enthusiasts hobbyists and those who want to go beyond basic knowledge or information for any kind of quantum radar

Annual Report of the Marine Mammal Commission 2007 what is quantum cryptography utilizing quantum mechanical features in order to carry out cryptographic operations is the field of study known as quantum cryptography the most well known application of quantum cryptography is quantum key distribution which provides a safe from an information theory standpoint solution to the issue of key exchange the benefit of

quantum cryptography lies in the fact that it enables the successful completion of a variety of cryptographic tasks that have been demonstrated or conjectured to be impossible using only classical communication these tasks include decrypting messages that have been encrypted using a key that has been stolen it is not feasible for instance to duplicate data that has been encoded in a quantum state if someone makes an effort to read the encoded data the quantum state will be altered as a result of the collapse of the wave function in quantum key distribution this may be used to identify eavesdropping on conversations qkd how you will benefit i insights and validations about the following topics chapter 1 quantum cryptography chapter 2 quantum teleportation chapter 3 quantum entanglement chapter 4 quantum key distribution chapter 5 quantum network chapter 6 john rarity chapter 7 bb84 chapter 8 time bin encoding chapter 9 quantum cloning chapter 10 quantum nonlocality chapter 11 one way quantum computer chapter 12 sarg04 chapter 13 noisy storage model chapter 14 decoy state chapter 15 nicolas j cerf chapter 16 dynamical decoupling chapter 17 device independent quantum cryptography chapter 18 six state protocol chapter 19 continuous variable quantum information chapter 20 relativistic quantum cryptography chapter 21 adrian kent ii answering the public top questions about quantum cryptography iii real world examples for the usage of quantum cryptography in many fields iv 17 appendices to explain briefly 266 emerging technologies in each industry to have 360 degree full understanding of quantum cryptography technologies who this book is for professionals undergraduate and graduate students enthusiasts hobbyists and those who want to go beyond basic knowledge or information for any kind of quantum cryptography

Fighting for the Future 2020 for the layman modern physics is like an immense and magnificent cathedral that is impressive in its complex and sophisticated architecture and amazing in size and richness of the workmanship yet in this apparently almost complete edifice there is no answer to a long series of basic and crucial questions while in any case these answers are indispensable and preliminary to any general theory it is essential to avoid the confusion between appropriate and clarifying answers and false tautological answers or formulas that actually say nothing about the questions posed in this book the starting point is the interpretation given by einstein s general relativity to explain the gravitational force not as an action at a distance but as an effect intrinsic to the deformation of space caused by a mass this interpretation is extended to the explanation of any attractive or repulsive force as an effect of flattening of dimensions with positive or negative curvature one for each force it offers without any forcing an explanation for most of the unsolved questions of physics of the nature of a mass matter and antimatter of the structure of an atom of the origin of natural constants of the quantization of phenomena etc it also offers a different interpretation of the nature of electrons and black holes furthermore the existence of antimatter in protons but not in neutrons is also predicted a phenomenon that appears to be documented by recent works this book is not written by a physicist but it is also highlighted why a professional physicist would have to overcome serious or insurmountable difficulties to give innovative answers to the fundamental unsolved problems of physics using concepts unrelated to those currently accepted

CEA. Colorado School Journal 1936 through the lens of aleksandr rodchenko s photography a new and provocative understanding emerges of the troubled relationship between technology modernism and state power in stalin s soviet union tracing the shifting meanings of photography in the early soviet union aglaya k glebova revises the relationship between art and politics during what is usually considered the end of the critical avant garde aleksandr rodchenko 1891 1956 was a highly versatile russian artist and one of constructivism s founders his photographic work between 1928 when stalin rose to power and the late 1930s reveals a wide ranging search for a different pictorial language in the context of the extreme transformations carried out under the five year plans in response to forced modernization rodchenko s photography during this time questioned his own modernist commitments at the heart of this argument is rodchenko s infamous 1933 photo essay on the white sea baltic canal site of one of the first gulags glebova s careful reading of rodchenko s oeuvre yields a more diverse practice than has been generally acknowledged and brings to light new aspects of his work in adjacent media including the collaborative design work he undertook with varvara stepanova

Quantum Radar 2022-07-10 this book provides a comprehensive investigation of the messy and crisis ridden relationship between the operations of capitalist finance global capital flows and state power in emerging markets the politics drivers of emergence and diversity of these myriad forms of state power are explored in light of the positionality of emerging markets within the network of space and power relations that characterises contemporary global finance the book develops a multi disciplinary perspective and combines insights from marxist political economy post keynesian economics economic geography and postcolonial and feminist international political economy alami comprehensively reviews the theories histories and geographies of cross border finance management and develops a conceptual framework which allows unpacking the complex entanglement of constraint and opportunities of growing integration and tight discipline that cross border finance represents for emerging markets extensive fieldwork research provides an in depth comparative critical

interrogation of the policies and regulations deployed in brazil and south africa this volume will be especially useful to those researching and working in the areas of international political economy contemporary geographies of money and finance and critical development studies it should also prove of interest to policy makers practitioners and activists concerned with the relation between finance and development in emerging markets and beyond

Quantum Cryptography 2022-07-10 this incisive and wholly practical book offers a hands on guide to developing and assessing social justice art education for k 12 art educators by providing theoretically grounded social justice art education assessment strategies recognizing the increased need to base the k 12 curriculum in social justice education the authors ground the book in six social justice principles conceptualized through art education to help teachers assess and develop curriculum design pedagogy and foster social justice learning environments from encouraging teachers to be upstanders to injustice to engaging in decolonial action this book provides a thorough guide to facilitating and critiquing social justice art education and engaging in reflexive praxis as educators rich in examples and practical application this book provides a clear pathway for art educators to connect social justice art education with real life educational assessment expectations 21st century learning literacy social skills teacher performance based assessment and national core art standards making this text an invaluable companion to art educators and facilitators alike

Notes for a New Physics 2021-09-05 for the 21st century the often quoted citation past is prologue reads the other way around the global present lacks a historical narrative for the global past focussing on a transcultural history this book questions the territoriality of historical concepts and offers a narrative which aims to overcome cultural essentialism by focussing on crossing borders of all kinds transcultural history reflects critically on the way history is constructed asking who formed history in the past and who succeeded in shaping what we call the master narrative although trained european historians the authors aim to present a useful approach to global history showing first of all how a eurocentric but universal historiography removed or essentialised certain topics in asian history as an empirical discipline history is based on source material analysed according to rules resulting from a strong methodological background this book accesses the global past after world war i looking at the well known stage of the paris peace conferences observing the multiplication of new borders and the variety of transgressing institutions concepts actors men and women inventing themselves as global subjects but sharing a bitter experience with almost all local societies at this time namely the awareness of having relatives buried in far distant places due to globalised wars

Aleksandr Rodchenko 2022-11-22 thorough examination of the antebellum fortifications that formed the backbone of u s military defense during the national period the system of coastal defenses built by the federal government after the war of 1812 was more than a series of forts standing guard over a watery frontier it was an integrated and comprehensive plan of national defense developed by the us army corps of engineers and it represented the nation s first peacetime defense policy known as the third system since it replaced two earlier attempts it included coastal fortifications but also denoted the values of the society that created it the governing defense policy was one that combined permanent fortifications to defend seaports a national militia system and a small regular army the third system remained the defense paradigm in the united states from 1816 to 1861 when the onset of the civil war changed the standard in addition to providing the country with military security the system also provided the context for the ongoing discussion in congress over national defense through annual congressional debates on military funding

Money Power and Financial Capital in Emerging Markets 2019-12-09 in addition to being a poet fiction writer playwright and essayist langston hughes was also a globe trotting cosmopolitan travel writer translator avid international networker and perhaps above all pan africanist in cultural entanglements shane graham examines hughes s associations with a number of black writers from the caribbean and africa exploring the implications of recognizing these multiple facets of the african american literary icon and of taking a truly transnational approach to his life work and influence graham isolates and maps hughes s cluster of black atlantic relations and interprets their significance moving chronologically through hughes s career from the 1920s to the 1960s he spotlights jamaican poet and novelist claudette mc kay haitian novelist and poet jacques roumain french negritude author aimé césaire of martinique south african writers es kias mphahlele and peter abrahams and caribbean american novelist paule marshall taken collectively these writers intellectual relationships with hughes and with one another reveal a complex conversation and sometimes a heated debate happening globally throughout the twentieth century over what africa signified and what it meant to be black in the modern world graham makes a truly original contribution not only to the study of langston hughes and african and caribbean literatures but also to contemporary debates about cosmopolitanism the black atlantic and transnational cultures

Teaching and Assessing Social Justice Art Education 2022-09-07 the book is about multidisciplinary science

education the challenges of our time such as improving the length and quality of lives on earth and short and long distance communication and transportation in this book we provide readers with the multidisciplinary education necessary to meet the scientific and technological challenges of our time while optimizing the college experience for students the fundamental notions addressed in this book include gravitational forces and energy dark matter and dark energy heat transfer in solid earth stars interiors and human bodies electromagnetic radiation and spectroscopy quantum entanglement and computing accretion disks matter in plasma state and exoplanets we illustrate the importance of these notions with applications across disciplines including monitoring the deformation of the solid earth's surface using satellite measurements unusual gravity anomalies in antarctica a view and characterization of the far side of our moon earth's climate titan's anti greenhouse effect long distance communication between earth and the planets and exoplanets etc finally the book contains analytical and computational problems including matlab software developed especially for the classes associated with this book key features contains multiple analytic and computational matlab exercises explores applications related to space programs discoveries provides an accessible introduction and response to growing multidisciplinary science programs dr luc thomas ikelle is a scientist with imode energy he is also currently an adjunct professor in the department of geology and geophysics at texas a m university previously he worked at cray research inc in minneapolis developing 3d seismic inversion algorithms for cray y pm from 1988 to 1997 he worked as a scientist for schlumberger geco prakla schlumberger doll research and schlumberger cambridge research from 1997 to 2014 dr ikelle was robert r berg professor in the department of geology and geophysics at texas a m university he earned a ph d in geophysics and geochemistry from paris 7 university in france he received le prix de thèse du cnrs in 1986 for his ph d thesis an seg award in 2010 for his contribution to the creation of geoscientists without borders and a texas am university award as an outstanding scientist in 2012 he is a cofounder of geoscientists without borders and of imode energy research and a member of seg agu and aps dr ikelle has worked as a doe us department of energy special employer from 2005 to 2012 and was a member of ultra deepwater advisory committee an advisory committee to the secretary of energy from 2005 to 2012

Transcultural History 2012-06-19 remote sensing and image processing in mineralogy reveals the critical tools required to comprehend the latest technology surrounding the remote sensing imaging of mineralogy oil and gas explorations it particularly focusses on multispectral hyperspectral and microwave radar as the foremost sources to understand analyze and apply concepts in the field of mineralogy filling the gap between modern physics quantum theory and image processing applications of remote sensing imaging of geological features mineralogy oil and gas explorations this reference is packed with technical details associated with the potentiality of multispectral hyperspectral and synthetic aperture radar sar the book also includes key methods needed to extract the value added information necessary such as lineaments gold and copper minings this book also reveals novel speculation of quantum spectral mineral signature identifications named as quantized marghany's mineral spectral or marghany quantum spectral algorithms for mineral identifications mqsa rounding out with practical simulations of 4 d open pit mining identification and monitoring using the hologram radar interferometry technique this book brings an effective new source of technology and applications for today's mineralogy and petroleum engineers key features helps develop new algorithms for retrieving mineral mining potential zones in remote sensing data solves specific problems surrounding the spectral signature libraries of different minerals in multispectral and hyperspectral data includes over 200 equations that illustrate how to follow examples in the book

Engineering Security 2020-05-05 nothing set the world in motion like gold between the discovery of california placer gold in 1848 and the rush to alaska fifty years later the search for the precious yellow metal accelerated worldwide circulations of people goods capital and technologies a global history of gold rushes brings together historians of the united states africa australasia and the pacific world to tell the rich story of these nineteenth century gold rushes from a global perspective gold was central to the growth of capitalism it whetted the appetites of empire builders mobilized the integration of global markets and economies profoundly affected the environment and transformed large scale migration patterns together these essays tell the story of fifty years that changed the world

Cultural Entanglements 2020-05-12 globalization in the united states can seem paradoxical free trade coincides with fortification of the southern border while immigration is reimagined as a national security threat us politics turn aggressively against latinx migrants and subjects even as post nafta markets become thoroughly reliant on migrant and racialized workers but in fact there is no incongruity here rather anti immigrant politics reflect a strategy whereby capital uses specialized forms of violence to create a reserve army of the living laboring dead visible borders invisible economies turns to latinx literature photography and films that render this unseen scheme shockingly vivid works such as valeria luiselli's tell me how it ends and alex riverera's sleep dealer

crystallize the experience of latinx subjects and migrants subjugated to social death their political existence erased by disenfranchisement and racist violence while their bodies still toil in behalf of corporate profits in kristy l ulibarrí's telling art clarifies what power obscures the national security state performs anti immigrant and xenophobic politics that substitute cathartic nationalism for protections from the free market while ensuring maximal corporate profits through the manufacture of disposable migrant labor
