Ex Presidents of Pakistans Deep Dark Secrets 2011-05-06 according to some commentators forum shopping is an evil that must be eradicated it has been suggested that the unification of substantive law through international conventions constitutes one way to achieve this outcome this book shows that the drafting of uniform substantive law convention cannot prevent forum shopping the reasons are classified into two main categories convention extrinsic and convention intrinsic reasons the former category comprises those reasons upon which uniform substantive law conventions do not have an impact at all these reasons range from the costs of access to justice to the bias of potential adjudicators to the enforceability of judgments the convention intrinsic reasons on the other hand are reasons that relate to the nature and design of uniform substantive law conventions and include their limited substantive and international spheres of application as well as their limited scope of application the need to provide for reservations etc this book also focuses on another reason why forum shopping cannot be overcome the impossibility of ensuring uniform applications and interpretations of the various uniform substantive law conventions

Forum Shopping Despite Unification of Law 2021-08-16 linguistic rivalries weaves together anthropological accounts of diaspora nation and empire to explore and analyze the multi faceted processes of globalization characterizing the migration and social integration experiences of tamil speaking immigrants and refugees from india and sri lanka to montréal québec in the late twentieth and early twenty first centuries in montréal a city with more trilingual speakers than in any other north american city tamil migrants draw on their multilingual repertoires to navigate longstanding linguistic rivalries between anglophone and francophone and indian and sri lankan nationalist leaders by arguing that indians speak spoken tamil and sri lankans speak written tamil as their respective heritage languages drawing on ethnographic archival and linguistic methods to compare and contrast the communicative practices and language ideologies of tamil heritage language learning in hindu temples catholic churches public schools and community centers this book demonstrates how processes of sociolinguistic differentiation are mediated by ethnonational religious class racial and caste hierarchies indian tamils showcase their use of the cosmopolitan sounds and scripts of colloquial varieties of tamil to enhance their geographic and social mobilities whereas sri lankan tamils dispossessed of their homes by civil war instead emphasize the primordialist sounds and scripts of a pure literary tamil to rebuild their homeland and launch a global critique of racism and environmental destruction from the diaspora this book uses the ethnographic and archival study of tamil mobility and immobility to expose the mutual constitution of elite and non elite global modernities defined as language ideological projects in which migrants objectify dimensions of time and space through scalar metaphors

Linguistic Rivalries 2016-10-05 the proliferation of economic agents with market power especially those operating in the digital economy and which add unprecedented dynamic and complexity to it has sparked heated discussions among academics professionals and competition authorities around the world regarding the effects of their actions on the market and consumers unlike classic cartels a conduct that has been treated as per se unlawful in brazil regardless of the production of effects under brazilian competition law unilateral conduct falls into a gray area encompassing different practices with different effects on the market in this sense examples of unilateral conduct that may be considered anticompetitive are numerous both under old and new labels predatory pricing abusive pricing resale price maintenance imposition of exclusivities parity clauses price discrimination discrimination of commercial conditions self preferencing price squeeze refusal to deal among others the competition analysis of such conduct which may occur in traditional brick and mortar markets as well as in digital environments involving various platforms and arrangements like blockchain for the purpose of a decision by the authority on whether they constitute anticompetitive practices or not involves a highly complex analysis of various factors the analysis must consider the presence of dominant positions real or potential detrimental effects on competition efficiencies justifications economic rationale for the conduct and for some schools of thought a weighing of anticompetitive effects and efficiencies due to the complexity specificities and dynamism of unilateral practices especially in digital markets or hybrid digital platforms there is a question of whether the instruments currently available to competition authorities are sufficient to understand and rule on such practices in this regard the analysis of various cases in relatively recent jurisprudence shows a pursuit for new forms of interpretation and application and even updates to the methodologies of analysis and of applicable legislation in order to strike a balance between intervention to curb anticompetitive practices to the extent necessary for protecting competition without resulting on undue interference in the involved markets or on disincentives to innovation historically discussions about exclusivity clauses and resale price maintenance have been central in this type of investigation but digital platforms are effectively changing this landscape giving rise

to discussions on new types of conduct or more sophisticated forms of implementing traditional types of conduct which have become possible or potentially more serious through new technologies the broad reach of platforms the collection of massive data and the international nature of the largest players in these markets notions of relevant market theories of harm and standards of consumer welfare or protection traditionally adopted by antitrust authorities are under study and may be revised the heterogeneity of legal systems in different jurisdictions is another complicating factor for national authorities in the analysis of conduct practiced by companies with market power internationally all these analyses are present in the 25 articles written for this publication by ibrac we have articles focused on traditional methods of analysis in traditional markets as well as articles addressing new trends and recent discussions in digital markets and platforms in times of pandemic and economic crisis as expected approaches to prices and pricing strategies are recurring themes in the works compiled here
