entry inhibitors in hiv therapy details the current status of this relatively new and very dynamic class of inhibitors a unique overview of obstacles and accomplishments is presented the impact of viral sequence diversity on this class of inhibitors is discussed and a connection between basic research and clinical studies is shown the book presents a unique collection of contributors from basic research pharmaceutical research and the clinic in classical scholarship the presence of legal language in love poetry is commonly interpreted as absurd and incongruous ovid s legalisms have been described as frivolous humorous and ornamental law and love in ovid challenges this wide spread but ill informed view legal discourse in latin love poetry is not incidental but fundamental inspired by recent work in the interdisciplinary field of law and literature ioannis ziogas argues that the roman elegiac poets point to love as the site of law s emergence the latin elegiac poets may say make love not law but in order to make love they have to make law drawing on agamben foucault and butler law and love in ovid explores the juridico discursive nature of ovid s love poetry constructions of sovereignty imperialism authority biopolitics and the ways in which poetic diction has the force of law the book is methodologically ambitious combining legal theory with historically informed closed readings of numerous primary sources ziogas aims to restore ovid to his rightful position in the history of legal humanism the roman poet draws on a long tradition that goes back to hesiod and solon in which poetic justice is pitted against corrupt rulers ovid s amatory jurisprudence is examined vis à vis paul s letter to the romans the juridical nature of ovid s poetry lies at the heart of his reception in the middle ages from boccaccio s decameron to forcadel s cupido iurisperitus the current trend to simultaneously study and marginalize legal discourse in ovid is a modern construction that law and love in ovid aims to demolish a fresh distinctive approach to the teaching of molecular biology with its focus on key principles its emphasis on the commonalities that exist between the three kingdoms of life and its integrated coverage of experimental methods and approaches molecular biology is the perfect companion to any molecular biology course the explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics the proliferation of media technology and the popularity of the internet help some keep up with these developments but also make it more likely others fall further behind this is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments industrial organizational

public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research science communication often in new forms must expand to meet all these needs providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each for this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses even so those entering the field rarely will have a comprehensive background in both science and communication studies this circumstance underscores the importance of compiling useful reference materials the encyclopedia of science and technology communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges this work will help to develop and enhance such understanding as it addresses these challenges and more topics covered include advocacy policy and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo science in the news special problems in reporting science and technology science communication ethics clinical practice protocols in oncology nursing is ideal for oncology nurses oncology nurses in training and administrators of cancer care clinics and hospitals nurse s chemotherapy quick pocket reference is a portable quick reference guide to chemotherapy dosing administration and information arranged alphabetically by cancer type all the chemotherapy drug information your need in the palm of your hand basic laboratory methods for biotechnology third edition is a versatile textbook that provides students with a solid foundation to pursue employment in the biotech industry and can later serve as a practical reference to ensure success at each stage in their career the authors focus on basic principles and methods while skillfully including recent innovations and industry trends throughout fundamental laboratory skills are emphasized and boxed content provides step by step laboratory method instructions for ease of reference at any point in the students progress worked through examples and practice problems and solutions assist student comprehension coverage includes safety practices and instructions on using common laboratory instruments key features provides a valuable reference for laboratory professionals at all stages of their careers focuses on basic principles and methods to provide students with the knowledge

needed to begin a career in the biotechnology industry describes fundamental laboratory skills includes laboratory scenario based questions that require students to write or discuss their answers to ensure they have mastered the chapter content updates reflect recent innovations and regulatory requirements to ensure students stay up to date tables a detailed glossary practice problems and solutions case studies and anecdotes provide students with the tools needed to master the content the underlying theme of this volume is the understanding of the molecules and processes important in the primary metabolism of insects the 19 chapters provide both rich historical perspectives and timely reviews of current research as well as showing the extent of progress to be expected in the near future including the application of advanced techniques now used for the study of microbial and mammalian processes the major themes of metabolism proteins and nucleic acids and biochemical events in the nervous system each have several chapters devoted to them but specific topics such as pigments toxins and aging are also covered in detail this extensive volume is therefore an invaluable source of information not only for entomologists but also for all scientists whose work involves insect biochemistry including zoologists biochemists and molecular biologists and geneticists as the likely first responder in an emergency you need quick access to essential information on the potential complications of many different cancer types and treatments the new edition of this trusted resource provides up to date information on the pathophysiology complications risks treatment approaches prognosis assessment findings and nursing and medical interventions for a wide range of cancers it also offers valuable information to help you fulfill your role as care coordinator and patient advocate including client education guidelines discharge procedures and strategies for helping the client and family deal with the impact of the disease s progression a consistent format throughout helps you quickly find the information you need no matter what the topic this indispensable reference is written and reviewed by both oncology and acute care nurses ensuring accuracy currency and clinical relevance coverage of each cancer includes pathophysiologic mechanisms epidemiology and etiology risk profile prognosis professional assessment criteria pac nursing care and treatment evidence based practice update patient teaching nursing diagnoses or dsm iv evaluation and desired outcomes and discharge planning with follow up care where needed the latest prognosis statistics give you a realistic picture of the survival possibilities for your patients so you can provide the most appropriate nursing care and patient education multiple choice review questions with answers and rationales at the end of each chapter help reinforce your understanding of key concepts and prepare you for certification examinations special boxes highlight pediatric specific care considerations for working with children six new chapters biliary and pancreatic obstruction depression and cognitive dysfunction dyspnea and airway obstruction gi obstruction heart failure and spiritual distress keep you up to date with the latest advances in oncology nursing evidence based rationales in the nursing interventions help you apply the latest research findings to actual practice each chapter includes a new section on pathophysiology to help you understand the physiologic processes associated with each oncologic complication molecular biology offers a fresh distinctive approach

to the study of molecular biology with its focus on key principles its emphasis on the commonalities that exist between the three kingdoms of life and its integrated approach throughout it is the perfect companion to any molecular biology course the aacr annual meeting is a must attend event for cancer researchers and the broader cancer community this year s theme delivering cures through cancer science reinforces the inextricable link between research and advances in patient care the theme will be evident throughout the meeting as the latest most exciting discoveries are presented in every area of cancer research there will be a number of presentations that include exciting new data from cutting edge clinical trials as well as companion presentations that spotlight the science behind the trials and implications for delivering improved care to patients this book contains abstracts 1 2696 presented on april 17 18 2016 at the aacr annual meeting primary grade teachers face an important challenge teaching children how to read while enabling them to build good habits so they fall in love with reading many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence intention and joy as readers in growing readers kathy collins helps teachers plan for independent reading workshops in their own classrooms she describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong well rounded readers kathy outlines a sequence of possible units of study for a yearlong curriculum chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini lessons and reading conferences there are also four getting ready sections that suggest some behind the scenes work teachers can do to prepare for the units topics explored in these units include print and comprehension strategies reading in genres such as poetry and nonfiction connecting in school reading and out of school reading developing the strategies and habits of lifelong readers a series of planning sheets and management tips are presented throughout to help ensure smooth implementation we want our students to learn to read and we want them to love to read to do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day the ideas found in growing readers create the kind of primary classrooms where that happens of the greek and latin love poets propertius c 50 10 b c is one of those who holds the most immediate appeal for the twentieth century reader his helpless infatuation for the sinister figure of his mistress cynthia forms the main subject of his poetry and is analyzed with a tormented but witty grandeur in all its changing moods from ecstasy to suicidal despair this study includes english verse translations of his work along with a chronology explanatory notes and a brief bibliography peer coaching is a collaborative reciprocal practice where faculty members observe reflect and improve their instructional practices with the goal of improved learning for all students this edited book includes chapters describing faculty peer coaching initiatives in universities world wide section one includes chapters that give an overview of what faculty peer coaching is and what the benefits of faculty peer coaching can be the second section

of the book explores the theoretical and practical implications of engaging in faculty peer coaching and the trust and vulnerability that comes along with opening up your instructional practices to a colleague section three of the book includes several examples of peer coaching initiatives across various disciplines in higher education settings section four situates peer coaching in the broader institutional framework this book is a must for leaders of faculty development initiatives directors and staff from teaching learning centers department chairs faculty graduate students deans student services staff chief academic officers and educational consultants the oxford handbook of historical books of the hebrew bible is a collection of essays that provide resources for the interpretation of the books of joshua judges samuel kings chronicles ezra and nehemiah the volume is not exhaustive in its coverage but examines interpretive aspects of these books that are deemed essential for interpretation or that are representative of significant trends in present and future scholarship the individual essays are united by their focus on two guiding questions 1 what does this topic have to do with the old testament historical books and 2 how does this topic help readers better interpret the old testament historical books each essay critically surveys prior scholarship before presenting current and prospective approaches taking into account the ongoing debates concerning the relationship between the old testament texts and historical events in the ancient world data from assyrian babylonian and persian culture and history are used to provide a larger context for the content of the historical books essays consider specific issues related to israelite judean history settlement state formation monarchy forced migration and return as they relate to the interpretation of the historical books this volume also explores the specific themes concepts and content that are most essential for interpreting these books in light of the diverse material included in this section of the old testament the handbook further examines interpretive strategies that employ various redactional synthetic and theory based approaches beyond the old testament proper subsequent texts traditions and cultures often received and interpreted the material in the historical books and so the volume concludes by investigating the literary social and theological aspects of that reception in this third volume of the series research on education in africa the caribbean and the middle east the volume continues with the previously established overarching purpose of publishing chapters that are based upon research conducted in those regions by scholars many of whom are indigenous to the regions they write about and are therefore able to provide cultural insights about relevant issues as well as nonindigenous scholars who have conducted their studies in countries within the regions or about those regions this mixture of indigenous scholarship offering emic perspectives and outside scholarship offering etic perspectives continues to be a relative strength and uniqueness of this book series in addition several chapters in the current volume constitute collaborations between the authors etic and emic to the contexts about which they write this bifocality in the gaze cast upon issues covered in this book series has been well received by readers of earlier volumes of the series davis s industrial organizational psychology an applied approach

administer medications safely across the lifespan well organized monographs for hundreds of generic and thousands of trade name drugs along with the canadian specific information you want full monographs on drugs approved for use in canada that are not fda approved for use in the us additional canadian trade names for many us approved generic drugs identified by a maple leaf icon and a summary of the similarities and differences between pharmaceutical practices in the us and canada what do we mean when we talk about disability in the middle ages this volume brings together dynamic scholars working on the subject in medieval literature and history who use the latest approaches from the field to address this central question contributors discuss such standard medieval texts as the arthurian legend the canterbury tales and old norse sagas providing an accessible entry point to the field of medieval disability studies to medievalists the essays explore a wide variety of disabilities including the more traditionally accepted classifications of blindness and deafness as well as perceived disabilities such as madness pregnancy and age adopting a ground breaking new approach to the study of disability in the medieval period this provocative book will interest medievalists and scholars of disability throughout history current research in protein chemistry techniques structure and function focuses on the techniques and methods used for determining the structure and function of proteins topics covered range from protein folding and stability to catalysis by chimeric proteins amino acid and peptide analysis applications of mass spectrometry to peptide and protein analysis and protein sequencing this book is divided into six sections encompassing 55 chapters the first chapter describes a novel method for protein hydrolysis by means of microwave irradiation that uses teflon pyrex tubes this is followed by a discussion of the application of high performance capillary electrophoresis to the analysis of amino acids the sections that follow focus on mass spectrometric methods protein sequencing and capillary electrophoresis as well as protein stability chimeric proteins and enzyme modifications and protein structure prediction the crystal structure of human interleukin 1alpha the acid denatured states of proteins solubility of recombinant proteins expressed in escherichia coli and catalysis by chimeric proteins are considered the reader is also introduced to peptide mapping and internal sequencing of proteins from acrylamide gels new approaches to covalent sequence analysis alkaline denaturation of hemoglobin and measurements of disulfide bond stabilities in protein folding intermediates students and researchers interested in protein chemistry will find this book extremely helpful what kinds of terror lurk beneath the surface of white respectability many of the top grossing us horror films between 2008 and 2016 relied heavily on themes of white patriarchal fear and fragility outsiders disrupting the sanctity of the almost always white family evil forces or transgressive ideas transforming loved ones and children dying when white women eschew traditional maternal roles horror film has a long history of radical political commentary and russell meeuf reveals how racial resentments represented specifically in horror films produced during the obama era gave rise to the trump presidency and the make america great again movement featuring films such as the conjuring and don t breathe the white terror explores how motifs of home invasion exorcism possession and hauntings mirror cultural debates around white

masculinity class religion socioeconomic and more in the vein of jordan peele white terror exposes how white mainstream fear affects the horror film industry which in turn cashes in on that fear and draws voters to candidates like trump agrobacterium tumefaciens is a soil bacterium that for more than a century has been known as a pathogen causing the plant crown gall disease unlike many other pathogens agrobacterium has the ability to deliver dna to plant cells and permanently alter the plant genome the discovery of this unique feature 30 years ago has provided plant scientists with a powerful tool to genetically transform plants for both basic research purposes and for agricultural development compared to physical transformation methods such as particle bombardment or electroporation agrobacterium mediated dna delivery has a number of advantages one of the features is its propensity to generate a single or a low copy number of integrated transgenes with defined ends integration of a single transgene copy into the plant genome is less likely to trigger gene silencing often associated with multiple gene insertions when the first edition of agrobacterium protocols was published in 1995 only a handful of plants could be routinely transformed using agrobacterium agrobacterium mediated transformation is now commonly used to introduce dna into many plant species including monocotyledon crop species that were previously considered non hosts for agrobacterium most remarkable are recent developments indicating that agrobacterium can also be used to deliver dna to non plant species including bacteria fungi and even mammalian cells written for people who want to explore numbers johann heyss brings together the symbology of number and the tarot so you can work with the energy in your name here he discusses the prime numbers 0 9 and explains the nuances in numbers 1 100 how they are broken down and how you can easily read important phases in your life he also has formulae to read your personality the subconscious and your second name the book is illustrated with the crowley thoth deck bibliography index bird bent grass chronicles an extraordinary mother daughter relationship that spans distance time and eventually debilitating illness personal familial and political narratives unfold through the letters that geeske venema de jong and her daughter kathleen exchanged during the late 1980s and through their weekly conversations which started after geeske was diagnosed with alzheimer s disease twenty years later in 1986 kathleen accepted a three year teaching assignment in uganda after a devastating civil war and geeske promised to be her daughter s most faithful correspondent the two women exchanged more than two hundred letters that reflected their lively interest in literature theology and politics and explored ideas about identity belonging and home in the context of cross cultural challenges two decades later with geeske increasingly beset by alzheimer s disease kathleen returned to the letters where she rediscovered the evocative image of a tiny bright meadow bird perched precariously on a blade of elephant grass that image of simultaneous tension fragility power and resilience sustained her over the years that she used the letters as memory prompts in a larger strategy to keep her intellectually gifted mother alive deftly woven of excerpts from their correspondence conversations journal entries and email updates bird bent grass is a complex and moving exploration of memory illness and immigration friendship conflict resilience and

forgiveness cross cultural communication the ethics of international development and letter writing as a technology of intimacy throughout it reflects on the imperative and fleeting business of being alive and loving others while they re ours to hold encyclopedia of ecology second edition four volume set continues the acclaimed work of the previous edition published in 2008 it covers all scales of biological organization from organisms to populations to communities and ecosystems laboratory field simulation modelling and theoretical approaches are presented to show how living systems sustain structure and function in space and time new areas of focus include micro and macro scales molecular and genetic ecology and global ecology e g climate change earth transformations ecosystem services and the food water energy nexus are included in addition new international experts in ecology contribute on a variety of topics offers the most broad ranging and comprehensive resource available in the field of ecology provides foundational content and suggests further reading incorporates the expertise of over 500 outstanding investigators in the field of ecology including top young scientists with both research and teaching experience includes multimedia resources such as an interactive map viewer and links to a csdms community surface dynamics modeling system an open source platform for modelers to share and link models dealing with earth system processes

the underlying theme of this volume is the understanding of the molecules and processes important in the primary metabolism of insects the 19 chapters provide both rich historical perspectives and timely reviews of current research as well as showing the extent of progress to be expected in the near future including the application of advanced techniques now used for the study of microbial and mammalian processes the major themes of metabolism proteins and nucleic acids and biochemical events in the nervous system each have several chapters devoted to them but specific topics such as pigments toxins and aging are also covered in detail this extensive volume is therefore an invaluable source of information not only for entomologists but also for all scientists whose work involves insect biochemistry including zoologists biochemists and molecular biologists and geneticists

agrobacterium tumefaciens is a soil bacterium that for more than a century has been known as a pathogen causing the plant crown gall disease unlike many other pathogens agrobacterium has the ability to deliver dna to plant cells and permanently alter the plant genome the discovery of this unique feature 30 years ago has provided plant scientists with a powerful tool to genetically transform plants for both basic research purposes and for agricultural development compared to physical transformation methods such as particle bombardment or electroporation agrobacterium mediated dna delivery has a number of advantages one of the features is its propensity to generate a single or a low copy number of integrated transgenes with defined ends integration of a single transgene copy into the plant genome is less likely to trigger gene silencing often associated with multiple gene insertions when the first edition of agrobacterium protocols was published in 1995 only a handful of plants could be routinely transformed using agrobacterium agrobacterium mediated transformation is now commonly used to introduce dna into many plant species including monocotyledon crop species that were previously considered non hosts for agrobacterium most remarkable are recent developments indicating that agrobacterium can also be used to deliver dna to non plant species including bacteria fungi and even mammalian cells
