divination and human nature casts a new perspective on the rich tradition of ancient divination the reading of divine signs in oracles omens and dreams popular attitudes during classical antiquity saw these readings as signs from the gods while modern scholars have treated such beliefs as primitive superstitions in this book peter struck reveals instead that such phenomena provoked an entirely different accounting from the ancient philosophers these philosophers produced subtle studies into what was an odd but observable fact that humans could sometimes have uncanny insights and their work signifies an early chapter in the cognitive history of intuition examining the writings of plato aristotle the stoics and the neoplatonists struck demonstrates that they all observed how setting aside the charlatans and swindlers some people had premonitions defying the typical bounds of rationality given the wide differences among these ancient thinkers struck notes that they converged on seeing this surplus insight as an artifact of human nature projections produced under specific conditions by our physiology for the philosophers such unexplained insights invited a speculative search for an alternative and more naturalistic system of cognition recovering a lost piece of an ancient tradition divination and human nature illustrates how philosophers of the classical era interpreted the phenomena of divination as a practice closer to intuition and instinct than magic

too many organizations today play follow the leader the commander articulates a vision and people uncritically go along with it but this type of leadership what dean williams calls counterfeit leadership generates an unhealthy dependence on an authority figure and relies on dominance control and group seduction to get things done by hampering people s ability to anticipate and react to changing circumstances it creates a self limiting cycle and if the leader s vision is flawed the entire organization suffers the true task of a leader williams argues is to get people to face the reality of any situation themselves and develop strategies to deal with problems or take advantage of opportunities real leaders don t dictate they help people face their challenges and make adjustments in their values habits practices and priorities to ensure the enterprise is given its best chance to succeed williams details how to apply this new approach to the challenges every organization or community faces throughout he demonstrates the practical application of real leadership in the real world through examples from his own experiences working with organizations as diverse as the government of singapore aetna life and casualty and the nomadic penan tribe in borneo as well as historical examples and the insights gleaned from his many interviews with presidents prime ministers and business leaders at a time when so many visionary leaders have led their organizations to disaster real leadership offers a needed proven alternative
