2018 2022-11-12 buying and selling civil war memory explores the ways in which gilded age manufacturers advertisers publishers and others commercialized civil war memory advertisers used images of the war to sell everything from cigarettes to sewing machines an entire industry grew up around uniforms made for veterans rather than soldiers publishing houses built subscription bases by tapping into wartime loyalties while old and young alike found endless sources of entertainment that harkened back to the war moving beyond the discussions of how civil war memory shaped politics and race relations the essays assembled by james marten and caroline e janney provide a new framework for examining the intersections of material culture consumerism and contested memory in the everyday lives of late nineteenth century americans each essay offers a case study of a product experience or idea related to how the civil war was remembered and memorialized taken together these essays trace the ways the buying and selling of the civil war shaped americans thinking about the conflict making an important contribution to scholarship on civil war memory and extending our understanding of subjects as varied as print visual and popular culture finance and the histories of education of the book and of capitalism in this period this highly teachable volume presents an exciting intellectual fusion by bringing the subfield of memory studies into conversation with the literature on material culture the volume s contributors include amanda brickell bellows crompton b burton kevin r caprice shae smith cox barbara a gannon edward john harcourt anna gibson holloway jonathan s jones margaret fairgrieve milanick john neff paul ringel natalie sweet david k thomson and jonathan w white

!2022 2021-07-15 film and television create worlds but they are also of a world a world that is made up of stuff to which humans attach meaning think of the last time you watched a movie the chair you sat in the snacks you ate the people around you maybe the beer or joint you consumed to help you unwind all this stuff shaped your experience of media and its influence on you the material culture around film and television changes how we make sense of their content not to mention the very concepts of the mediums focusing on material cultures of film and television reception the stuff of spectatorship argues that the things we share space with and consume as we consume television and film influence the meaning we gather from them this book examines the roles that six different material cultures have played in film and television culture since the 1970s including video marketing branded merchandise drugs and alcohol and even gun violence and shows how objects considered peripheral to film and television culture are in fact central to its past and future

Sanathana Sarathi English Volume 07 (2012 - 2021) 2021-04-06 our most basic relationship with the world is one of technological mediation nowadays our available tools are digital and increasingly what counts in economic social and cultural life is what can be digitally stored distributed replayed augmented and switched yet the digital remains very much materially configured and though it now permeates nearly all human life it has not eclipsed all older technologies this handbook is grounded in an understanding that our technologically mediated condition is a condition of organization it maps and theorizes the largely uncharted territory of media technology and organization studies written by scholars of organization and theorists of media and technology the chapters focus on specific and specifically mediating objects that shape the practices processes and effects of organization it is in this spirit that each chapter focuses on a specific technological object such as the battery clock high heels container or smartphone asking the question how does this object or process organize in staying with the object the chapters remain committed to the everyday empirical world rather than being confined to established disciplinary concerns and theoretical developments as the first sustained and systematic interrogation of the relation between technologies media and organization this handbook consolidates deepens and further develops the empirics and concepts required to make sense of the material forces of organization

Buying and Selling Civil War Memory in Gilded Age America 2018-09 imagine that you found a map to the invisible realms of mind and spirit what might you discover such maps have been drawn for thousands of years in myriad cultures throughout the world today we refer to them by the sanskrit term mandala loosely meaning the whole world mandalas are universally associated with healing and prayer creating mandalas is an absorbing and relaxing way to enhance your life journey based on clare goodwins 35 year exploration of the mandala as an artist therapist and teacher of students world wide gifts of the mandala a guided journey of self discovery invites you to deepen your understanding of yourself through the sacred art of mandala making

The Stuff of Spectatorship 2019-11-07 the human mind is the most powerful game engine but it can always use some help this book is meant for developers who want to create games that will evoke richer and more memorable gameworlds in the minds of their players we don't just enter such unforgettable gameworlds when we play first person 3d rpgs with high resolution graphics even relatively simple 2d puzzle or strategy games with 8 bit style visuals can immerse players in worlds that are beautiful terrifying mysterious or moving that are brutally realistic or delightfully whimsical indeed good video games can transport us to incredible new worlds the process by which a particular gameworld emerges is a symbiotic collaboration between developer and player the game system presents a carefully architected stream of polygons and pixels which somehow leads the player's mind to construct and explore an intricate world full of places people relationships dilemmas and quests that transcends what's actually appearing onscreen drawing on insights from ontology and philosophical aesthetics this volume provides you with conceptual frameworks and concrete tools that will enhance your ability to design games whose iconic gameworlds encourage the types of gameplay experiences you want to offer your players among other topics the book investigates the unusual ways in which a gameworld's contents can shrink or grow in players minds depending on whether the players are mentally positioned within a game's social space cultural space built space or tactical space the manner in which players minds spontaneously concretize the countless gaps that exist in a game and how this dynamic explains why so many players still enjoy 8 bit style games with retro pixel art the differing ways in which players experience success and failure danger and safety good and evil the future and the past the known and the unknown and engagement and retreat depending on whether a game reveals its gameworld through a 1d game environment like that of a text based adventure 2d environment like that of a sidescroller or a grand strategy game with a top down map view 2.5d environment like that of an isometric turn based tactics game or 3d environment like that of a first person shooter the powerful way in which players are able to mentally explore a gameworld simply by shifting their conscious awareness between different senses media ontological strata and constituent spaces without needing to travel through the gameworld's terrain at all necessary and optional elements of the gameworld from built areas natural landscapes laws of nature and a cosmogony to the game's player and designer and their roles in shaping the gameplay experience how to strategically employ the architectural paradigms of the cyberspatial grid maze space biomimetic net simulacral world virtual museum and protean world when architecting locales within your game in order to evoke particular kinds of emotional gameplay experiences for your players the nature of the unique sixth sense that 2d games grant to player characters and players simple techniques for helping your 2d game to feel more like a 3d game the differing kinds of immersiveness interactivity and determinacy possessed by different types of games and their implications for the gameplay experience once you've undertaken this philosophical and artistic journey you'll never look at your games or their gameworlds in quite the same way again phenomenology of the gameworld is a book by the award winning video game designer philosopher and writer matthew e gladden he has over 20 years of experience with commercial and

non commercial game development has published numerous scholarly and popular works relating to the philosophy of video game design virtual reality and neurocybernetics and has served as a video game conference keynote speaker
