love is about individuals not about bodies since ages we have been following few rules in our daily lives rules of society rules of nature and civilization people can learn to live by those standards but can their heart understand and live by them too our heart is that single organ in our body which doesn t know what s right and wrong what it knows is to love unconditionally the book depicts a romantic tale some charming and some amusing snapshots of a young lady who loses her heart to somebody yet fears admitting her emotions because of the boundary sets of society but finally she decides to go against the law laid down by those around her for the love of her life the book portrays her fantasy of being with somebody yet sufficiently difficult to be satisfied as her romantic tale includes many turns once in a while destiny so now and again society there is dependably a barricade in her voyage and with the passage of time everything fades away except the love still lingers

engineering padicha nalla future if you study engineering you will have a good future this is a claim often repeated to children and teenagers by parents and teachers in many parts of india but only those who have gone through an engineering college life know that it s not completely true there is a difference between calling yourself as an engineering graduate and an engineer india produces millions of engineering graduates like you and me but only very few of us are actual engineers many of us just graduate with an engineering degree with an artistic dream in mind what do you think is the difference between engineers in many countries around the world and engineers

from india in other countries if david pascal studied electrical engineering in college few years later you can find him working as an electrical engineer in india if ram krishnamurthy studied electrical engineering few years later you can find him working in a completely irrelevant field like software coding banking photography and even movie directing this book is not about the few engineering students in your class who love engineering i don t hate them in fact i am very jealous that they study what they love this book is about the majority of engineering graduates whose lives are wasted in engineering and is intended to tell you why you should make an attempt in pursuing your real passion instead of being suffocated under the weight of an engineering degree this is a story of india s youth welcome to india the land of wasted engineers

while innumerable books have been penned down by contemporary motivational speakers and writers on success ambition motivation positive thinking and accomplishments very few books if any at all have talked of what success actually is and how it is different from a socially defined set of parameters being an iit delhi iim ahmedabad and an ex indian civil services officer himself the author very compassionately steps into the shoes of an ambitious mind and invites it to be sensitive towards the incessant suffering caused due to this burning desire to achieve he vividly talks of how understanding of your real aim will bring you to peace even during the race he jovially remarks on how playing hard and not working hard will be a more sensible way of moving towards a goal author s genius lies in the fact that he has very simply answered the most intricate and complex questions that arise in the mind of every student and working professional giving clarity on success a topic that haunts them perpetually

how the language of merit makes caste privilege invisible in contemporary india just as americans least disadvantaged by racism are most likely to endorse their country as post racial indians who have benefited from their upper caste affiliation rush to declare their country post caste in the caste of merit ajantha subramanian challenges this comfortable assumption by illuminating the controversial relationships among technical education caste formation and economic stratification in modern india through in depth study of the elite indian institutes of technology iits widely seen as symbols of national promise she reveals the continued workings of upper caste privilege within the most modern institutions caste has not disappeared in india but instead acquired a disturbing invisibility at least when it comes to the privileged only the lower castes invoke their affiliation in the political arena to claim resources from the state the upper castes discard such claims as backward embarrassing and unfair to those who have earned their position through hard work and talent focusing on a long history of debates surrounding access to engineering education subramanian argues that such defenses of merit are themselves expressions of caste privilege the case of the iits shows how this ideal of meritocracy serves the reproduction of inequality ensuring that social stratification remains endemic to contemporary democracies
