reformulation and acquisition of linguistic complexity proposes a new answer to the question of the appropriation or acquisition of a mother tongue a complex object one that is both stable and perpetually evolving this answer is based on the reformulating principle that children spontaneously apply a principle that is illustrated here with children retelling the same story these children are all 6 8 or 10 years old and speak french italian croatian or polish as a first language this book demonstrates that the acquisition of any mother tongue is explained by the application of various reformulation procedures between source predication and reformulated predication these procedures are comparable from one language to another and different from one age group to another this book also studies certain complex phenomena at the lexical and syntactical levels and analyzes how children depending on their age treat these phenomena finally we show that the acquisition of a mother tongue is a fundamentally linguistic activity contents contenuti pre handwriting skills and executive functions in 3 to 5 years old children abilità di pre scrittura e funzioni esecutive in bambini tra i 3 e i 5 anni di silvia baldi emiddia longobardi giulia filippo barbara caravale motor vehicle collisions in adolescence the role of family support incidenti stradali in adolescenza il ruolo del supporto genitoriale di eleonora marzilli giulia ballarotto silvia cimino luca cerniglia paola carbone the emotional and interactional exchange between children with down syndrome and parents lo scambio emotivo interattivo fra bambino con sindrome di down e genitori di alessia carleschi anna scala rosa ferri the centrality of adaptation primary emotions motivational functioning and morality between neurosciences evolutionary psychology and control mastery theory la centralità dell adattamento emozioni primarie funzionamento motivazionale e moralità tra neuroscienze psicologia evoluzionistica e control mastery theory di emma de luca cristina mazza francesco gazzillo pronouns and verbs as gender markers in italian parliamentary speeches intersecting gender communication and politics pronomi e verbi come marcatori di genere nei discorsi di parlamentari italiani intersecare genere comunicazione e politica di gilda sensales alessandra areni luca giuliano a pilot study on an analytic psychodrama group for cancer patients and family members uno studio pilota su un gruppo di psicodramma analitico per familiari e pazienti oncologici di francesca alby giovanni angelici stefania picinotti cristina zucchermaglio thinking childhood and time contemporary perspectives on the politics of education is an interdisciplinary exploration of the notion of childhood and its place in a philosophical education contributors consider children s experiences of time space embodiment and thinking by acknowledging hannah arendt s notion that every child brings a new beginning into the world they address the question of how educators can be more responsive to the otherness that childhood offers while assuming that most educational models follow either a chronological model of child development or view children as human beings that are lacking the contributors explore childhood as a philosophical concept in children adults and even beyond human beings childhood as a forgotten dimension of the world contributors also argue that a pedagogy that does not aim for an exodus of childhood but rather responds to the arrival of a new human being responsibly dialogically fosters a deeper appreciation of the newness that children bring in order to sensitize us for our own childhood as adults as well and allow us to welcome other forms of childhood in the world as a whole this book argues that the experience of
