generally as subjectively lived and experienced phenomenology a philosophical movement originating in the 20th century the primary objective of which is the direct investigation and description of phenomena as consciously experienced without theories about their causal explanation and as free as possible from unexamined preconceptions and phenomenology is the study of human experience and of the way things present themselves to us in and through experience it was meant to remind philosophers and scientists not to get lost in abstract thought models and technical language but to keep an eye on what is at stake in their research as originally developed by edmund husserl 1859 1938 phenomenology seeks to provide a detailed description of the way in which things are presented to us that is to say phenomena in an attempt to uncover the fundamental structure of consciousness and our relationship to the world the real challenge phenomenology confronts is one of establishing the legitimacy and authority of its distinctive methods in opposition to naturalism keywords phenomenology principal methods edmund husserl scepticism objective thought phenomenological reflection university press 1970 p with this broad preference for husserlian phenomenology the volume gives the impression that the most promising and fruitful overlap between phenomenology and the philosophy of mind lies in the introspective analysis of consciousness in particular phenomenology is typically understood as the what that is studied or investigated in the philosophy of mind it is the passing show the flux of experience experience as it is undergone it is the what that makes it so that there is a what it is like to subjective experience one of the most important philosophical movements of the twentieth century phenomenology has been influential not only on so called continental philosophy embree 2003 but also on so called analytic philosophy smith and thomasson 2005 by constantly reflecting and transforming pädagogik s own questions paradoxes and complexities while sustaining education as pädagogik phenomenology puts education as well as itself to the test of revealing the experiential reality of the young to reflection in research and practice phenomenology focuses on an individual s first hand experiences rather than the abstract experience of others it emphasizes explaining the meaning of things through an individual s perspectives and self experiences phenomenology inspires self searching self experiences and new learning it philosophical work on the mind flowed in two streams through the 20th century phenomenology and analytic philosophy the phenomenological tradition began with brentano and was developed by phenomenology is an important branch of 20th century philosophy which originated in germany but has been taken up in many countries all over the world in cultural anthropology it has informed theoretical as well as methodological perspectives and approaches and has led some anthropologists to proclaim a subdiscipline of phenomenological gustav shpet introduced phenomenology into russia herbert spiegelberg a student of pfänder later wrote the monumental the phenomenological movement 1960 as well as descriptively oriented studies more recently karl schuhmann has functioned as the historian of realistic phenomenology the central claim is that the phenomenological discourse can increase the conceptual descriptive and methodological rigor in psychology the purpose of the book is to facilitate the dialogue between phenomenology and cognitive sciences it is meant to be a guide for interested scholars but also offers new ideas for experts in the field
