english is rare deployed in ukraine at the beginning of the war the hungarian army was involved in a number of brutal encounters with the red army including stubborn resistance in transylvania in the summer of 1944 and the brave defense of budapest in the face of overwhelming odds the hungarian army was a varied and colourful force ranging from mountain troops and tank units to horse cavalry and specialist infantry all of these are illustrated in full colour artwork with full details about the hungarian army s own quite distinct uniforms and insignia as well as many of its own weapons and tanks this is an essential starter resource for wargamers modelers re enactors and military historians starting the war with only 35 aircraft austro hungarian industry went on to produce only moderate numbers of poor quality aircraft the fliers of the austro hungarian empire operating on the serbian and russian fronts were fortunate at first finding themselves faced by small numbers of aircraft yet more obsolescent than their own serbia fell in 1915 but when italy declared war the austro hungarians were still faced with a two front war a static front against italy and a far more fluid one against russia austro hungarian fighter pilots performed bravely and often very effectively under extremely difficult geographic climatic and operational conditions this work has been selected by important part of keeping this knowledge alive and relevant although southern poland and western ukraine are not often thought of in terms of decisive battles in world war i the impulses that precipitated the battle for galicia in august 1914 and the unprecedented carnage that resulted effectively doomed the austro hungarian empire just six weeks into the war in fall of the double eagle john r schindler explains how austria hungary despite military weakness and the foreseeable ill consequences consciously chose war in that fateful summer of 1914 through close examination of the austro hungarian military especially its elite general staff schindler shows how even a war that vienna would likely lose appeared preferable to the foul peace the senior generals loathed after serbia outgunned the polyglot empire in a humiliating defeat and the offensive into russian poland ended in the massacre of more than four hundred thousand austro hungarians in just three weeks the empire never recovered while austria hungary s ultimate defeat and dissolution were postponed until the autumn of 1918 the late summer of 1914 on the plains and hills of galicia sealed its fate non fiction collectors book for military headgear this book examines the uniforms equipment history and organisation of the austro hungarian army of the napoleonic wars 1799 1815 the course of the silesian revolutionary napoleonic and new austrian wars are all summarized uniforms are shown in full illustrated detail the part played in world war i 1914 1918 by the army of the austro hungarian dual monarchy is little known to english speakers perhaps because the end of the war saw the complete destruction of the empire yet it was of central importance providing nearly all central powers forces on the italian front huge numbers on the russian front seven army corps in the balkans and even a little known contingent in turkey and palestine the first half of the story of this complex multi national organization at war is described here in a concise but detailed text supported by data tables and an insignia chart and illustrated with rare photographs and colourful uniform plates this unique and comprehensive account describes the interplay of internal and external factors in the emergence of the austro hungarian navy from a coastal defence force in 1904 to a respectable battle force capable of the joint operations with other triple alliance fleets in the mediterranean by the eve of world war i by 1914 the austro hungarian navy was the sixth largest navy in the world and the quality of its officers and men was widely recognised by most european naval observers at the time the book describes the relationships between naval leaders the heir to the throne archduke francis ferdinand and the parliament in shaping the dual monarchy s naval policy it also shows how the changes in foreign policy in italy and underlying animosities between rome and vienna led to a naval race in the adriatic that eventually bolstered germany s naval position in respect to great britain in the north sea having had a long and distinguished military career in 1914 general erich von falkenhayn assumed the post as chief of the german general staff in the middle of the first world war the german position was at a crisis point the initial plan to win the war by a wide out flanking movement through belgium had been foiled a new plan would have to be decided on in the west increasing numbers of british troops poured to the front in the east the ambitious team of generals hindenburg and ludendorff pushed for reinforcements to finally beat the russians falkenhayn decided that significant efforts must be made in the western theatre and came up with a brutal plan to decide the war he conceived the idea

of besieging the historic french city of verdun in early 1916 of bleeding it white as he phrased it he planned to draw the bulk of the french army into the verdun salient thus effectively tying up the french army and then to methodically destroy them with concentrated artillery fire the plan failed only by valiant sacrifices and fighting by the french and pressure applied by their allies in other sectors not least the british effort during the battle of the somme falkenhayn was thereafter removed from his supreme post and would fight on other front in charge of smaller forces his memoirs of the period of his command are illuminating and give an insight of what was going on on the other side of the hill during the first world war author general von falkenhayn erich 1861 1922 translator anon text taken whole and complete from the edition published in london hutchinson 1919 original page count 299 pages andris kursietis has been a researcher of military history for fifty years using resources that span the globe this book provides biographical information about the military careers of officers of the austro hungarian army and navy in 1914 1918 this is the memoir of jeno halmaji bor lieutenant field marshal of the royal hungarian army during world war ii during the course of his long life this hungarian patriot experienced the history of the 20th century in the making having participated as a combatant in both world wars his autobiography translated from its original version in hungarian chronicles bors experiences in the armed forces of the austro hungarian empire and later as an officer in the hungarian army the narrative covers his life as a cadet before world war i his combat experiences during the great war and his steady rise through the ranks of the post world war i hungarian armed forces to become a senior general during the turmoil that surrounded hungarys occupation by germany and subsequent fall to the soviets the final part of the book deals with the generals life as a pow then a refugee before his eventual emigration to the usa this book provides a comprehensive and illuminating study of some of the most crucial campaigns on the eastern front during what was perhaps the most momentous year of world war i in that battleground turning points the eastern front in 1915 offers a well researched and fascinating study of war in a distinct theater of operations and shows how it was impacted by diplomacy coalition warfare command technology and the environment in which it is conducted in contrast to those on the western front lines in the east in 1915 moved hundreds of miles although the work focuses more on the central powers significant attention is also given to the russians the book follows the course of events on the eastern front during the critical year of 1915 proceeding chronologically from january 1915 to the end of active operations in october with a brief mention of some action in december in addition to the better known campaigns in the carpathians and gorlice tarnów the work covers lesser known operations including the second battle of the masurian lakes the austro hungarian black yellow offensive into eastern galicia and the german move into lithuania naval action on the baltic sea is also covered
