Handbook of Critical and Intensive Care Medicine

2010-03-20

why write a book on the management of critically ill patients over the past few decades we have seen an enormous growth in the number of intensive care units icu across the world indeed it is estimated that a large proportion of health care expenses are devoted to patients in these specialized units medical students residents fellows attending physicians critical care nurses pharmacists respiratory therapists and other health care providers irrespective of their ultimate field of practice will spend several months or years of their professional lives taking care of critically ill or severely injured patients these clinicians must have special training experience and competence in managing complex problems in their patients moreover these clinicians must interpret data obtained by many kinds of monitoring devices and they must integrate this information with their knowledge of the patient physiology of disease even more important is the fact that anyone working in an icu or with a critically ill patient must approach patients with a multidisciplinary team the phrase there is no i in team comes to mind

Intensive Care

2002-07

the origin of modern intensive care units icus has frequently been attributed to the widespread provision of mechanical ventilation within dedicated hospital areas during the 1952 copenhagen polio epidemic however modern icus have developed to treat or monitor patients who have any severe life threatening disease or injury these patients receive specialized care and vital organ assistance such as mechanical ventilation cardiovascular support or hemodialysis icu patients now typically occupy approximately 10 of inpatient acute care beds yet the structure and organization of these icus can be quite different across hospitals in the organization of critical care an evidence based approach to improving quality leaders provide a concise evidence based review of icu organizational factors that have been associated with improved patient or other outcomes the topics covered are grouped according to four broad domains 1 the organization structure and staffing of an icu 2 organizational approaches to improving quality of care in an icu 3 integrating icu care with other healthcare provided within the hospital and across the broader healthcare system and 4 international perspectives on critical care delivery each chapter summarizes a different aspect of icu organization and targets individual clinicians and healthcare decision makers a long overdue contribution to the field the organization of critical care an evidence based approach to improving quality is an indispensable guide for all clinicians and health administrators concerned with

achieving state of the art outcomes for intensive care

The Organization of Critical Care

2014-06-18

intensive care medicine has been continuously growing and expanding culturally technically and geographically monitoring and instrumentation are continuously improving and more and more hospitals are getting intensive care facilities the costs have proportionally increased over the years so that icu's represent today a major cost for health structures since the available resources are limited a real need is emerging to set the limits and indications of intensive care it is understood that the problem not only involves medical considerations but also ethical and economical aspects of the utmost importance for the first time in europe this book edited by reis miranda and his colleagues tackles systematically the many structural aspects of the european intensive care the organisation and financing of health care in the old continent is deeply different from the american one and the results and consequent proposals obtained in the usa cannot simply be transferred to this side of the atlantic ocean we are extremely pleased to welcome this first european attempt to discuss the intensive care problem it lays no claims to giving definite replies in a continuously developing field but it will surely become the basis for future discussions and proposals i am particularly happy that this work has mainly developed within the european society of intensive care whose final target is to ensure a common standard of therapy in our old europe beyond national differences we warmly congratulate the authors and i am sure that their work will find wide diffusion and consent
