Nursing

The Complexities of Care

2012-05-15

nursing everyone believes is the caring profession texts on caring line the walls of nursing schools and student shelves indeed the discipline of nursing is often known as the caring science because of their caring reputation nurses top the polls as the most trustworthy professionals yet in spite of what seems to be an endless outpouring of public support in almost every country in the world nursing is under threat in the practice setting and in the academic sector indeed its standing as a regulated profession is constantly challenged in our view this paradox is neither accidental nor natural but in great part the logical consequence of the fact that nurses and their organizations place such a heavy emphasis on nursing s and nurses virtues rather than on their knowledge and concrete contributions from the introduction in a series of provocative essays the complexities of care rejects the assumption that nursing work is primarily emotional and relational the contributors international experts on nursing all argue that caring discourse in nursing is a dangerous oversimplification that has in fact created many dilemmas within the profession and in the health care system this book offers a long overdue exploration of care at a pivotal moment in the history of health care the ideas presented here will foster a critical debate that will assist nurses to better understand the nature and meaning of the nurse patient relationship confront challenges to

their work and their profession and deliver the services patients need now and into the future

Critical Care Nursing

2019-06-22

endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia written by leading critical care nursing clinicians Leanne Aitken, Andrea Marshall and Wendy Chaboyer the 4th edition of Critical Care Nursing continues to encourage and challenge critical care nurses and students to develop world class practice and ensure the delivery of the highest quality care the text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and specialty practice providing the most recent research data, procedures and guidelines from expert local and international critical care nursing academics and clinicians alongside its strong focus on critical care nursing practice within Australia and New Zealand the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world increased emphasis on practice tips to help nurses care for patients within critical care updated case studies, research vignettes and learning activities to support further learning highlights the role of the critical care nurse within a multidisciplinary
