la búsqueda y rescate en montaña es una de las actividades de salvamento más exigentes tiene lugar en condiciones muy severas y a menudo dramáticas como gran altitud nieve hielo grietas glaciares y aludes es el escenario de verdaderos actos heróicos y épicos la asistencia a gran escala suele ser realizada por voluntarios principalmente locales debido a la demanda de conocimiento local de la topografía y las condiciones del tiempo este libro se centra principalmente en los alpes pero también hay referencias a zonas montañosas fuera de europa las condiciones especiales de este tipo de operaciones de rescate han llevado al desarrollo de equipos especializados lo más visible es el uso generalizado de helicópteros que tienen un alto grado de maniobrabilidad en terrenos inaccesibles y capacidad para transportar una carga útil los servicios de helicópteros trabajan junto con los tradicionales equipos terrestres y en ocasiones trasladan estos equipos a la zona de búsqueda los helicópteros transportan rápidamente a los heridos a un centro médico los servicios profesionales de rescate en montaña son bastante comunes cerca de centros turísticos como las estaciones de esquí donde hay lógicamente una mayor demanda también hemos dedicado un libro similar acerca del rescate aéreo americano american air rescue donde se ven similitudes y diferencias con el rescate en europa esperamos que el lector disfrute de nuestra selección de fotografías

This four volume laboratory manual contains comprehensive state of the art protocols essential for research in the life sciences. Techniques are presented in a friendly step by step fashion providing useful tips and potential pitfalls. The important steps and results are beautifully illustrated for further ease of use. This collection enables researchers at all stages of their careers to embark on basic biological problems using a variety of technologies and model systems. This thoroughly updated third edition contains 165 new articles in classical as well as rapidly emerging technologies. Topics covered include cell and tissue culture associated techniques, viruses, antibodies, immunocytochemistry, volume 1: organelle and cellular structures; assays, volume 2: imaging techniques, electron microscopy, scanning probe and scanning electron microscopy, microdissection, tissue arrays, cytogenetics and *in situ* hybridization; genomics and transgenic knockouts and knock down methods; volume 3: transfer of macromolecules, expression systems, gene expression profiling; volume 4: indispensable bench companion for every life science laboratory. Provides the latest information on the plethora of technologies needed to tackle complex biological problems. Includes numerous illustrations some in full color supporting steps and results.
