scuba is a fun relaxing educational interesting and if approached properly safe activity it is nonetheless a sport that has risks scuba diving is in fact an extreme sport that can injure or even kill very quickly and in some very nasty ways what we are doing is entering an alien environment that is normally hostile to human life we cannot breathe in water without some kind of mechanical assistance these are facts and the details should be covered in every open water ow class all too often in today s society however people do not want to take the time to properly prepare and get the education to safely take on new tasks some agencies appear to have responded to this by developing training programs that turn out high numbers of certified divers in shorter time frames necessitating the reduction of time spent on what i consider to be some necessary basic skills while this has resulted in great numbers of new divers entering the water it has not resulted in many of those divers staying in the water new divers are often given just enough training to enable them to dive in the most benign conditions under close supervision even then there are still those who find out their initial training was just not adequate it is at this point that they either make the decision to get more training or they leave the sport the latter happens all too often the former when it does happen does not always occur for the right reasons students should return to training to expand their diving and learn new skills they should not have to return for new training just to be able to enjoy the sport safely

require students to come back for basic information is something i find very troubling and in some cases has actually cost divers their lives a lack of rescue instruction has resulted in a number of diver deaths when buddies did not know how to drop weights support a diver at the surface or even stay in contact with their buddy this is another area frequently talked about but all too often not actually put into practice the concept of always diving with a buddy and just what that means in the real world is often given too little attention unfortunately it is impossible to foresee every conceivable situation that can arise but there are many basic issues that can be covered the following chapters will hopefully address much of what is being overlooked or delayed in many programs as they exist today it is my hope that this information also finds its way into the hands of those who have not yet begun the training process i have included a chapter on how to select an instructor based on the quality of instruction and the content of the course in some cases these classes may cost more than the less comprehensive courses also available but usually they do not in fact when you consider the additional skills and education gained from a more comprehensive course you will find that you have received much more value for each dollar spent in addition you gain priceless benefits in the form of greater confidence enjoyment skills and most importantly safety enjoy and dive safe

## **Open Water Sport Diver 1993-01-01**

this is not your standard how to scuba diving manual it is very different the purpose of scuba fundamental is not to teach you how to dive a dive instructor will do that but this

agency how much does it cost to learn to dive how can i save money how can i get comfortable underwater what can i do to feel be safe while scuba diving what are the scuba certification levels which ones matter to me typical mistakes made by people who decide to learn to dive the pitfalls traps in the dive industry how to avoid them where to take your certification and with whom selecting a dive instructor dive center dive resort dive boat your health fitness to dive what dive gear to buy what to rent how to save money by spending on what will actually help you and so much more most books about scuba diving are written by instructors with good content but darcy kieran gives you a 360 degree view from his experience as a scuba diving instructor trainer owner manager of dive shops dive equipment wholesalers dive boats scuba diving university programs and dive resorts this handbook won t teach you how to scuba dive you must get in the water for that but you will know exactly what to do before registering for a scuba certification course the author shares typical mistakes that would cost you time and money and in many cases provide you with such a bad experience that you would want to stop scuba diving this book gives you a chance to learn from others mistakes it will help you understand how the dive industry operates so you can navigate it to your advantage do not risk missing out on a lifetime of legendary scuba diving adventures because many dive professionals you ll encounter are not always professional instead learn how to be the leader of your own adventure
