human rights seemingly offer universal protection however irregular migrants have at best only problematic access to human rights whether understood as an ethical injunction or legally codified norm the promised protection of human rights seems to break down when it comes to the lived experience of irregular migrants this book therefore asks three key questions of great practical and theoretical importance first what do we mean when we speak of human rights second is the problematic access of irregular migrants to human rights protection an issue of

implementation or is it due to the inherent characteristics of the concept of human rights third should we look beyond human rights for an effective source of protection written is an accessible style with a range of socio legal and doctrinal approaches the chapters focus on the situation of the irregular migrant in europe and the united states throughout the book nuanced theoretical debates are put in the context of concrete case studies the critical reflections it offers on the limitations and possibilities of human rights protections for irregular migrants will be invaluable for students scholars and practitioners

in her latest contribution to the growing field of emotion studies deidre pribram makes a compelling argument for why culturalist approaches to the study of emotional disorders continue to be eschewed even as the

sociocultural and historical study of mental illness flourishes the author ties this phenomenon to a tension between two fundamentally different approaches to emotion an individualist approach which regards emotions as the property of the individual whether biologically or psychologically and a culturalist approach which regards emotions as collective social processes with distinctive histories and meanings that work to produce particularized subjects while she links a strong preference for the individualist construct in western culture to the rise of the psychological and psychiatric disciplines at the turn of the twentieth century pribram also engages with a diverse set of case studies tied to psychological and aesthetic discourses on emotions these range from van gogh s status as emotionally disordered to the public emotional aesthetics of 19th century melodrama to the diagnostic categories of the dsms and the fear of globalizing emotional disorders in the 21st century this genuinely interdisciplinary approach makes for a text with potential application in a wide range of disciplines within cultural studies including sociocultural and historical analysis of psychiatry and psychology gender theory subject and identity theory popular culture studies and history and theory of the arts
