format to chronicle the life of julius caesar the great roman general who became dictator of the roman empire includes chronology of important events suggested level primary intermediate junior secondary julian romane examines the campaigns of julius caesar throughout the civil wars that followed his famous crossing of the rubicon through to the defeat of the final pompeian diehards at the battle of munda he analyzes caesar s generalship in the widest sense with a strong emphasis on the logistical and financial effort required to put his legions in the field and keep them equipped fed and paid the attention given to this important but often neglected aspect sets this account apart from many others the author discusses the nature of late republican roman armies describing their organization tactics and equipment the fact that such armies were employed both by and against caesar only emphasizes the role of generalship in the outcome this is followed by a detailed account of the strategic maneuvers in caesar s epochal duel with pompey the great and the resultant battles at dyrrhachium and pharsalus the final campaigns to mop up opposition in spain and africa are studied in equal detail to give a complete picture of caesar s command performance in these history shaping events this book is a study in the logic of questions sometimes called erotetic logic the central topics in erotetic logic have been the structure of questions and the question answer relationship this book doesn t neglect these problems but much of it is focussed on other issues the main subject is the logical analysis of certain relations between questions and the contexts of their appearance and our aim is to elaborate the conceptual apparatus of the inferential approach to the logic of questions questions are asked for many reasons and for different purposes yet before a question is asked or posed a questioner must arrive at it in many cases arriving at a question resembles coming to a conclusion there are some premises involved and some inferential thought processes take place if we agree that a conclusion need not be conclusive we may say that sometimes questions can play the role of conclusions but questions can also perform the role of premises we often pass from some initial question to another question in other words there are inferential thought processes we shall call them erotetic inferences in which questions play the roles of conclusions or conclusions and premises the inferential approach to the logic of questions focusses its attention on the analysis of erotetic inferences for books and consists of eight chapters in almost all principled accounts of questions and answers related to the corresponding answers zellig harris harris 1978 1 techniques ~~that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative this amounts to the claim that a yes no question such as will john stay is derived from i ask you whether john will stay and a wh question such as who came is derived from something like i ask you whether a came or b came or or x came though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by harris jerrold j katz and paul m postal katz postal 1964 113 117 state a reading rule for q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 tell me which of the following is true john will stay or john will not stay 2 tell me which of the following is true a came or b came or or x came thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of questions and the contexts of their appearance and our aim is to elaborate the conceptual apparatus of the inferential approach to the logic of questions questions are asked for many reasons and for different purposes yet before a question is asked or posed a questioner must arrive at it in many cases arriving at a question resembles coming to a conclusion there are some premises involved and some inferential thought processes take place if we agree that a conclusion need not be conclusive we may say that sometimes questions can play the role of conclusions but questions can also perform the role of premises we often pass from some initial question to another question in other words there are inferential thought processes we shall call them erotetic inferences in which questions play the roles of conclusions or conclusions and premises the inferential approach to the logic of questions focusses its attention on the analysis of erotetic inferences this book consists of eight chapters

in almost all principled accounts of questions questions are related to the corresponding answers zellig harris harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative this amounts to the claim that a yes no question such as will john stay is derived from i ask you whether john will stay and a wh question such as who came is derived from something like i ask you whether a came or b came or or x came though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by harris jerrold j katz and paul m postal katz postal 1964 113 117 state a reading rule for q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 tell me which of the following is true john will stay or john will not stay 2 tell me which of the following is true a came or b came or or x came thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements

Almond Books Julius Caesar (Text With Paraphrase) for ICSE Class 9 & 10 English Literature 2010-09-01

ancient calendars found around the world are designed to end one point in time they communicate an urgent warning to everyone alive today complex bronze and gold clocks with multiple dials are found in museums around the world why they have such advanced intricacy has stumped scientists for hundreds of years this book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial it surprised me greatly to discover that their various complex designs in one way or another converge on 21 december 2012 it amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance the most famous example is the mayan aztec calendar which ends its 25 626 year cycle on that momentous date some researchers have also found 21 december 2012 in what is called the bible code using very different research methods i discovered it in the bible s book of revelation and daniel s prophecies it is one of the most important dates in the plan of god for all humanity
