democratic transitions have occurred in many countries in various regions across the globe such as southern europe latin america africa east and southeast asia eastern europe and the middle east and these nations have undergone simultaneously political economic and social transformations yet the patterns and characteristics of transitions have varied significantly and different modes of transition have resulted in different outcomes this book offers cross national comparisons of democratic transition since the turn of the twentieth century and asks what makes democracies succeed or fail in doing so it explores the influence the mode of transition has on the longevity or durability of the democracy by theoretically examining and quantitatively testing this relationship the authors argue that the mode of transition directly impacts the success and failure of democracy and suggest that cooperative transitions where opposition groups work together with incumbent elites to peacefully transition the state result in democracies that last longer and are associated with higher measures of democratic quality based on a cross national dataset of all democratic transitioning states since 1900 this book will be of great interest to students and scholars of international politics comparative politics and democracy and democratization studies

Transitions to School - International Research, Policy and Practice 2016-08-23

this book takes a radical approach to the problems of market economies it doesn't question the role of market mechanisms themselves or the role of government in regulating the economy and providing public goods it does however question one of the foundations on which market based economies are based the system of property rights it suggests that the form of private property that works well for the things we make is entirely inappropriate when applied to the natural world it proposes an alternative stewardship the underlying principle of stewardship is that everyone is entitled to an equal share of the wealth of the natural world in practical terms this means that stewards of land pay a fee that is equal to its market rent this is used to provide revenue for the government in place of conventional taxes or to provide a universal income that is distributed to everybody
