the fall of the soviet communist regime in 1991 offers a challenging contrast to other instances of democratic transition and change in the last decades of the twentieth century the 1991 revolution was neither a peaceful revolution from below as occurred in czechoslovakia nor a negotiated transition to democracy like those in poland hungary or latin america it was not primarily the result of social modernization the rise of a new middle class or of national liberation movements in the non russian union republics instead as gordon hahn argues the russian transformation was a bureaucrat led state based revolution managed by a group of communist party functionaries who won control over the russian republic rsfsr in the mid 1990s hahn describes how opportunistic party and state officials led by boris yeltsin defected from the gorbachev camp and proceeded in 1990 91 to dismantle the institutions that bound state and party these revolutionaries from above seized control of political economic natural and human resources and then separated the party apparatus from state institutions on russian republic territory with the failed august 1991 hard line coup yeltsin banned the communist party and decreed that all union state organs including the kgb and military were under rsfsr control in hahn s account this mode of revolutionary change from above explains the troubled development of democracy in russia and the former soviet republics hahn shows how limited mobilization of the masses stunted the development of civil societies and the formation of political parties and trade unions with real grass roots the result is a weak society unable to nudge the state to concentrate on institutional reforms society needs for the development of a free polity and economy russia s revolution from above goes far in correcting the historical record and reconceptualizing the soviet transformation it should be read by historians economists political scientists and russia area scholars

this book uses sweden as a test case to analyze how parliament and elected representatives function in a representative democracy despite the status of scandinavian countries as perhaps the world s most egalitarian societies the book argues that the best summary characterization of swedish representative democracy is an elitist system run from above the book also argues that an individualist representational model is relevant to the swedish setting and most likely to other settings as well representative democracy is not just party based democracy not even in a country with strong and disciplined parties the book takes a broad approach to the study of political representation it integrates into a single analytical framework concepts and theories from neighbouring traditions such as legislative behaviour opinion formation and interest organizations the study is based on a comprehensive set of data including three surveys of the members of the swedish parliament corresponding voter surveys and content analysis of mass media and parliamentary records

imagine what your christian development would be like if you grasped the true character of god you were captivated by appreciation of and love for god s word you were not frightened away by the haunted house of revelation you appreciated how the early church s experience influenced the message of revelation you understood how various viewpoints on revelation developed over time you enjoyed a perspective which prevents tunnel vision you understood viewpoints about which you were previously unaware you esteemed fellow believers who have different understandings of revelation you appreciated how the meaning of jesus sacrifice is pictured in revelation you practiced the message of revelation in everyday life you were strengthened by an unshakable faith in god your faith was heartfelt and growing rather than formal or ritualistic you were strong enough to stand firm in the face of any and all spiritual opposition you were known for your moral and spiritual purity you were able to resist the seductions of our culture you demonstrated the sacrificial style of jesus rather than the self serving style of society you enjoyed the blessings of those who keep the words of revelation s message your anticipation of jesus return rose above a distracting concern with earthquakes

wars and developing social events you appreciated your present and future spiritual realities you were eager rather than fearful about the future you enjoyed the depths of the relationship toward which god is moving us
