the world has become so infested with people who are suffering from multiple medical conditions and with the lifestyle habits that many adopt this contributes to the quality of their lives becoming poor it becomes so easy to miss when your health may be impacting your overall desire to be alive this is why this will prove to be a beneficial read for you as you will get to understand why taking care of your health is so vital to your overall well being to enhance the quality of your life you first need to begin by looking within yourself and by questioning whether you are eating right if you re being active enough if your thoughts are aligned with the life you would like to live and if you are inviting positivity into your life without a positive outlook it is almost unlikely that you will invite anything positive into your life either this is why the transformation of your perspective is very vital for your growth and personal development by exploring some of the issues that affect us in our everyday lives you will also get a chance to reflect on how you might have also been a victim of some of these circumstances either consciously or unconsciously while getting enough rest good nutrition and exercise regularly are what most people think of when the word health pops up they may forget that the mind needs to be engaged so that the spirit is equally nurtured so prepare to have your awareness raised and you will begin to see changes in your emotional mental social and environmental experiences health is first achieved through a balanced mind before it can be experienced throughout the rest of the

body

## Health Is Growth

health and social care in every system and in every country is labour intensive and must be oriented to people s needs if it is to be effective it is now widely recognized that human

resources for health hrh are a key enabler for the attainment of universal health coverage and for the achievement of sustainable development goal sdg 3 ensure healthy lives and promote well being for all at all ages as is stressed in the global strategy on human resources for health workforce 2030 there can be no viable national or global health system without an effective health workforce the global strategy adopted at the sixty ninth world health assembly in may 2016 challenges the erroneous narrative of health workers as a unit of cost in the production of health the evidence instead presents an intersectoral agenda on the pre condition of equitable access to health workers in the attainment of universal health coverage along with a dynamic labour market understanding of the substantive impact on education employment jobs and innovation in the health and social care economy the global strategy therefore enables governments and other relevant stakeholders to adopt a holistic rather than fragmented approach to ensuring that the health workforce contributes both to improved health and to broader socioeconomic development

this book brings together new studies on regional disparities in the provision and maintenance of health in asia specifically the individual chapters shed light on the various health challenges that asian regions face with regard to environmental health communicable and non communicable diseases reproductive health and the development of health systems the book departs from the existing literature on this subject in three ways first it explicitly recognizes that health is essential to the daily lives of human beings second it underscores the fact that good health improves learning employee productivity and incomes third the book demonstrates the ways in which an understanding of the preceding two points contributes to our grasp of economic growth and development

because asia is now the fastest growing and most dynamic continent in the world the respective chapters provide practical guidance concerning two key questions first how do we effectively address the health challenges in individual regions of asia second how do we ensure that the proposed health interventions lead to sustainable economic growth and development to this end the book emphasizes modeling and illustrates the role that sound empirical modeling can play in developing measures that sustainably address the health challenges confronting disparate asian regions all chapters were written by international experts who are active researchers in their respective fields hence this book is highly recommended to all readers seeking an in depth and up to date perspective on some of the most important issues at the interface of human health and regional growth and development in asia
