how do works from film and literature sister carrie native son meet me in st louis halloween and a history of violence for example imagine reify and reproduce midwestern identity and what are the repercussions of such regional narratives and images circulating in american culture in the american midwest in film and literature nostalgia violence and regionalism adam r ochonicky provides a critical overview of the evolution contestation and fragmentation of the midwest s symbolic and often contradictory meanings using the frontier writings of frederick jackson turner as a starting point this book establishes a succession of midwestern filmic and literary texts stretching from the late 19th century through the beginning of the 21st century and argues that the manifold properties of nostalgia have continually transformed popular understandings and ideological uses of the midwest s place identity ochonicky identifies three primary modes of nostalgia at play across a set of textual objects the projection of nostalgia onto physical landscapes and into the cultural sphere nostalgic spatiality nostalgia as a cultural force that regulates behaviors identities and appearances nostalgic violence and the progressive potential of nostalgia to generate an acknowledgment and possible rectification of ways in which the flawed past negatively affects the present nostalgic atonement while developing these new conceptions of nostalgia ochonicky reveals how an under examined area of regional study has received critical attention throughout the histories of american film and literature as well as in related materials and discourses from the closing of the western frontier to the polarized political and cultural climate of the 21st century this book demonstrates how film and literature have been and continue to be vital forums for illuminating the complex interplay of regionalism and nostalgia

during the half century after the civil war intellectuals and politicians assumed the midwest to be the font and heart of american culture despite the persistence of strong currents of midwestern regionalism during the 1920s and 1930s the region went into eclipse during the post world war ii era in the apt language of minnesota s f scott fitzgerald the midwest slid from being the warm center of the republic to its ragged edge this book explains the factors that triggered the demise of the midwest s regionalist energies from anti midwestern machinations in the literary world and the inability of midwestern writers to break through the cultural politics of the era to the growing dominance of a coastal urban culture these developments paved the way for the proliferation of images of the midwest as flyover country the rust belt a staid and decaying region yet lauck urges readers to recognize persisting and evolving forms of midwestern identity and to resist the forces that squelch the nation s interior voices

we forget that racist violence permeated the lower midwest from the pre civil war period until the 1930s from kansas to ohio whites orchestrated extraordinary events like lynchings and riots while engaged in a spectrum of brutal acts made all the more horrific by being routine also forgotten is the fact african americans forcefully responded to these assertions of white supremacy through armed resistance the creation of press outlets and civil rights organizations and courageous individual activism drawing on cutting edge methodology and a wealth of documentary evidence brent m s campney analyzes the institutionalized white efforts to assert and maintain dominance over african americans though rooted in the past white violence evolved into a fundamentally modern phenomenon driven by technologies such as newspapers photographs automobiles and telephones other surprising insights challenge our assumptions about sundown towns who was targeted by whites law enforcement s role in facilitating and perpetrating violence and the details of african american resistance

during the american colonial period what would become the midwest was the backcountry or the area behind the coastal population centers it was rural and rough the sort of place that fueled populist resistance to the federal taxation of whiskey at the time of the revolution it was the west often undifferentiated between north and south and largely associated with kentucky in the early years of the republic however the regional differentiation deepened and grew until the latter half of the 19th century when the midwest emerged as a fully formed region the essays in this book help explain this process of region making contributors christa adams brie swenson arnold terry a barnhart michael leonard cox wayne duerkes sara egge nicole etcheson edward o frantz jacob k friefeld a james fuller kenyon gradert joshua jeffers jason lantzer david c miller marcia noe c a norling lisa payne ossian barton e price eric michael rhodes gregory s rose michael j sherfy jason stacy

## ***A Portrait of John 1990***

in this work cheryl herr uses architect kenneth frampton s idea of critical regionalism to describe a comparative methodology for cultural studies demonstrating a process of oscillating perspectives moving from a subject location to an object social scene and back again she details the impact of both immediate social forces and behind the scenes institutions on two heartlands rural ireland and the american midwest she also provides the tools to understand symmetrical historical global patterns in ireland and the midwest herr strongly supports a crosscultural approach in which every issue is framed by its role in a hierarchy of increasingly global economic institutions at the same time she considers the representation of crisis on the local level she uses creative found and forced assemblages to illustrate historical processes and provides a strong case for a larger place in the university curriculum for a crosscultural studies methodology
