this is the third english dictionary which the present editor has prepared and he may therefore lay claim to an unusually prolonged apprenticeship to his trade it is surely unnecessary for him to say that he believes this to be the best book of the three and he can afford to rest content if the courteous reader receive it with the indulgence extended to his library dictionary published in the spring of 1898 it is based upon that work but will be found to possess many serviceable qualities of its own it is not much less in content and its greater relative portability is due to smaller type to thinner paper and still more to a rigorous compression and condensation in the definitions by means of which room has been found for many additional words the aim has been to include all the common words in literary and conversational english together with words obsolete save in the pages of spenser shakespeare milton and the authorised version of the bible an attempt has been made also to include the common terms of the sciences and the arts of life the vocabulary of sport those scotch and provincial words which assert themselves in burns scott the brontës and george eliot and even the coinages of word masters like carlyle browning and meredith numberless compound idiomatic phrases have also been given a place in each case under the head of the significant word
