Price Discrimination, the Robinson-Patman Act, and Related Matters

1956

Edward G. Robinson, a 1930s cinema icon, had an acting career that spanned more than 60 years. After a brush with silent films, he rose to true celebrity status in sound feature films and went on to take part in radio and television performances, then back to Broadway and on the road in live theatre. This work documents Robinson's every known public performance or appearance, listing co-workers, source material, background, and critical commentary. The entries include feature films, documentaries, short subjects, cartoons, television and radio productions, live theatre presentations, narrations, pageants, and recordings. Also included are entries relating to his life and career, ranging from his wives to his art collection.

The Atlantic slave trade was the largest forced migration in history, yet most of its stories are lost. Randy Sparks examines the few remaining reconstructed experiences of West Africans who lived in the South between 1740 and 1860. Their stories highlight the diversity of struggles that confronted every African who arrived on American shores.

There is increasing academic interest in how Pierre Bourdieu's sociology can be applied to management and organization studies, most in a context of increasing complexity faced by organizations and those who work in them, due to globalization, neoliberalism, austerity, financial crisis, ecological issues, populism, and developing technologies. There is untapped potential to use Bourdieu's theoretical inventions to arrive at greater understandings of how change, transition, and crisis shape work, organizational life, as well as relations between different organizational and sectorial fields. This book aims to take a specific focus on the relational nature of Bourdieu's work and its relevance for contemporary organizations. It provides empirically grounded examples that showcase the explanatory strength of Bourdieu's intellectual concepts such as field, habitus, capital, hexis, hysteresis, symbolic power, symbolic violence, doxa, illusio, as applied to the current challenges within MOS. Such challenges include issues resulting from globalization, neoliberalism, financial crisis, ecological crisis, populism, and developing technologies, to name a few, and added to those, a global pandemic. The twelve chapters presented in this book study a great variety and range of organizational phenomena that are organized into three thematic sections: neoliberalism, fields, and hysteresis; global and national movements as sites for competition and symbolic domination; and the emergence and transformation of professional fields. The chapters show a concern with the challenges and opportunities such developments offer to MOS scholars and to managers and employees in public and private sector organizations. It will be of interest to researchers, academics, and students in the fields of organizational studies, critical management studies, human resource management, and sociology.

joan robinson 1903 1983 was one of the greatest economists of the twentieth century and a fearless critic of free market capitalism a major figure in the controversial cambridge school of economics in the post war period she made fundamental contributions to the economics of international trade and development in economic philosophy robinson looks behind the curtain of economics to reveal a constant battle between economics as a science and economics as ideology which she argued was integral to economics in her customary vivid and pellucid style she criticizes early economists adam smith and david ricardo and neo classical economists alfred marshall stanley jevons and leon walras over the question of value she shows that what they respectively considered to be the generators of value labour time marginal utility or preferences are not scientific but metaphysical and that it is frequently in ideology not science that we find the reason for the rejection of economic theories she also weighs up the implications of the keynesian revolution in economics particularly whether keynes s theories are applicable to developing economies robinson concludes with a prophetic lesson that resonates in today s turbulent and unequal economy that the task of the economist is to combat the idea that the only values that count are those that can be measured in terms of money this routledge classics edition includes a new foreword by sheila dow

one of the most original and prolific economists of the twentieth century Joan Robinson 1903-83 is widely regarded as the most important woman in the history of economic thought Robinson studied economics at Cambridge University where she made a career that lasted some fifty years she was an unlikely candidate for success at Cambridge a young woman in 1930 in a university dominated by men she succeeded despite not having a remarkable academic record a college fellowship significant publications or a powerful patron in the provocative Joan Robinson Nahid Aslanbeigui and Guy Oakes trace the strategies and tactics Robinson used to create her professional identity as a Cambridge economist in the 1930s examining how she recruited mentors and advocates carefully defined her objectives and deftly pursued and exploited opportunities Aslanbeigui and Oakes demonstrate that Robinson's professional identity was thoroughly embedded in a local scientific culture in which the Cambridge economists A.C. Pigou John Maynard Keynes Dennis Robertson Piero Sraffa Richard Kahn Robinson's closest friend on the Cambridge faculty and her husband Austin Robinson were important figures although the economists Joan Robinson most admired Pigou Keynes and their mentor Alfred Marshall had discovered ideas of singular greatness she was convinced that each had failed to grasp the essential theoretical significance of his own work she made it her mission to recast their work both to illuminate their major contributions and to redefine a Cambridge tradition of economic thought based on the extensive correspondence of Robinson and her colleagues the provocative Joan Robinson is the story of a remarkable woman the intellectual and social world of a legendary group of economists and the interplay between ideas ambitions and disciplinary communities
