cudahy an independent scholar with a phd in philosophy and a passion for transportation looks at the early days of the cruise ship industry and discusses contemporary cruise ship design cruise markets and the evolution of the burgeoning recreation oriented business coverage also includes the challenges of managing cruise lines and regulations governing the industry a detailed appendix presents an instant history of the major cruise line ships including notes on specifications builders registry and passenger capacity annotation copyrighted by book news inc portland or two thousand years ago according to the bible a star rose low in the east and stopped high above bethlehem was it a miracle a sign from god to herald the birth of christ was there a star at all or was it simply added to the bible to fulfill the old testament prophecy concerning the birth of the messiah or was the star of bethlehem an actual astronomical event for hundreds of years astronomers as prominent as johannes kepler have sought an answer to this last baffling question in the star of bethlehem mark kidger brings all the tools of modern science years of historical research and an infectious spirit of inquiry to bear on the mystery he sifts through an astonishing variety of ideas evidence and information including babylonian sky charts medieval paintings data from space probes and even calculations about the speed of a camel to present a graceful original and scientifically compelling account of what it may have been that illuminated the night skies two millennia ago kidger begins with the stories of early christians comparing matthew s tale of the star and the three magi who followed it to bethlehem with lesser known accounts excluded from the bible crucially kidger follows the latest biblical scholarship in placing christ s birth between 7 and 5 b c which leads him to reject various phenomena that other scientists have proposed as the star in clear colorful prose he then leads us through the arguments for and against the remaining astronomical candidates could the star have been venus what about a meteor or a rare type of meteor shower could it have been halley s comet as featured in giotto s famous painting of the nativity or as kidger suspects was the star a combination of events a nova recorded in ancient chinese and korean manuscripts preceded by a series of other events including an unusual triple conjunction of planets originally published in 1999 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905 clio s warriors examines how the canadian world war experience has been constructed and reconstructed over time tim cook elucidates the role of historians in codifying the sacrifice and struggle of a generation as he discusses historical memory and writing the creation of archives and the war of reputations that followed each of the world wars on the battlefield only recently have military historians pushed the discipline to explore the impact of war on society in analyzing where the practice of academic military history has come from and where it needs to go clio s warriors plays a vital role in the ongoing challenge of writing critical history this book surveys our understanding of stars which change in brightness because they pulsate pulsating variable stars are keys to distance scales inside and beyond the milky way galaxy they test our understanding not only of stellar pulsation theory but also of stellar structure and evolution theory moreover pulsating stars are important probes of the formation and evolution of our own and neighboring galaxies our understanding of pulsating stars has greatly increased in recent years as large scale surveys of pulsating stars in the milky way and other local group galaxies have provided a wealth of new observations and as space based instruments have studied particular pulsating stars in unprecedented detail the 9th edition of the price guide to contemporary collectibles and limited editions is the best way to value all of your contemporary limited edition collectibles and gifts book jacket explores the continues that of the second volume all the information has been programmed onto the disc in a high level language so that no other software is needed to read it and in versions for dos and apple on each disc annotation copyrighted by book news inc portland or the life and work of james bradley the new foundations of 18th century astronomy is the first major work on the life and achievements of james bradley for 190 years this book offers a new perspective and new interpretations of previously published materials together with various insights about recently researched sources this book is a complete account of the life and work of bradley as discerned from surviving documents of his working archive as well as other documents and records in addition it offers a new interpretation of bradley s work as an astronomer not merely from his observations of jupiter and saturn and their satellites and annual aberration and the nutation of the earth s axis but also his corroborative work with pendulums and other horological work with george graham it also explores the little amount documented about his private life including a degree of speculation about his personal relationships this work on 18th century astronomy is intended for students of the history of science astronomy and 18th century english society and for scholars seeking new lines of inquiry it contains an extensive bibliography and a detailed chronology both of which offer support for further reading and research who s who of canadian women is a guide to the most powerfuland innovative women in canada celebrating the talents and achievement of over 3 700 women who s who of canadian women includes women from all over canada in all fields including agriculture academia law business politics journalism religion sports and entertainment each biography includes such information as personal data education career history current employment affiliations interests and honours a special comment section reveals personal thoughts goals and achievements of the profiled individual entries are indexed by employment of affiliation for easy reference published every two years who s who of canadian women selects its biographees on merit alone this collection is an essential resource for all

those interested in the achievements of canadian women as tourism to alaska continues to grow fodor s alaska continues to serve every kind of traveller fodor s alaska 94 continues to provide travellers with the latest coverage of wildlife and wilderness adventures cruise ships and destinations from juneau to the arctic circle introduction to close binary systems provides a comprehensive survey and guide to the fast moving field of multiple specifically binary stars with an up to date account of research around close i e interacting pairs such interactions allow direct quantification of stellar properties opening up factual insights into basic building blocks of the universe the book provides a much needed update for the seminal close binary systems of zdeněk kopal following a comparable plan it presents relevant subject matter with an emphasis on building a framework of understanding to serve as a supporting resource for students and researchers the text starts from a general historical background and progresses into the main theoretical ideas supporting our prima facie interpretation of observations the central chapters explore further into these observational methods arranged according to the classic subdivisions of astrometry spectroscopy and photometry optimal inversion of observational data into model parametrization is a theme through these chapters significant here is the problem of how non uniqueness in modelling affects interpretation the underlying issues of stellar evolution bearing on observational evidence become paramount in the last four chapters the book proceeds step by step from directly understandable examples of unevolved pairs to the challenging cases where stars are found in more and more extreme conditions leading up to the mergers of massive black hole pairs seen in the new field of gravitational wave astronomy this is a valuable reference for postgraduate and advanced undergraduate students working in mainstream areas of stellar astrophysics with applications also to exoplanet research which shares some methodological features course designers for stellar astrophysics will find a useful selection of topics within this book key features provides a well explained and backgrounded up to date account of close binary systems in a fast moving field of research that is growing in scientific importance surveys a wide range of case studies within the context of binary and multiple star systems fills an acknowledged gap in current literature cover image a public memorial to zdenek kopal in his home town birthplace of litomyšl in czechia this workshop is devoted to double stars the general topics of the meeting were for mation dynamics and evolutionary tracks in accordance with the pure tradition of the saint james way pilgrims from all over the world come to meet together in santiago although with a common interest double stars this meeting was a multidisciplinary one since scientists with different backgrounds participated in it as a matter of fact we think that this is the first workshop jointly supported by iau commissions 7 celestial mechanics and 26 double and multiple stars it is our belief that this meeting will be the origin of a more close relations and common research this meeting was held under the invitation of the university of santiago de compostela to commemorate its fifth centenary and organized by the astronomical observatory named after its founder ramon m aller who made significant contributions in the study of visual double stars and was one of the pioneers who put the seeds of the present blossoming of astronomy in spain the scientific organizing committee was formed by drs c allen p couteau j a docobo r dvorak a elipe s ferraz mello co chairman h a mc alister m valtonen c worley chairman and h zinnecker the local organizing committee was formed by drs j a docobo chairman a a study examining the state of british town centers analyzing threats to their existence the interests shaping their destiny and prospects for regeneration charts the evolution of town centers asking what they are for and whether they still matter shows how towns have been transformed by retail transportation commercial and cultural trends and looks at public policy and the relationship between producers and users of towns concludes with a survival strategy for town centers in contemporary britain distributed by st martin s press annotation copyrighted by book news inc portland or jonathan harvey s most popular plays collected in one volume for the first time contains the smash hit plays beautiful thing a bittersweet tale of the joys and trials of living cheek by jowl in a thamesmead housing estate babies based on the playwright s experiences as a teacher which was mercilessly robbed from a particular night when i arrived at a pupil s birthday party to be entertained by a drag queen dressed as the queen the rupert street lonely hearts club set among the low life of soho centring on the marti a gay man of a certain age who can t believe that anyone might fancy him and boom bang a bang a play about a gathering to view the eurovision song contest contending that cultural production gives voice to racism the authors anthropologists carol tator and frances henry and attorney winston mattis here examine how six controversial canadian cultural events have given rise to a newly empowered radical or critical multiculturalism a unique reference work covering the whole of english private law this book provides a lucid concise and authoritative overview of all important areas of private law each section is written by an acknowledged expert who provides a clear distillation and analysis of the subject the lloyd s register of yachts was first issued in 1878 and was issued annually until 1980 except during the years 1916 18 and 1940 46 two supplements containing additions and corrections were also issued annually the register contains the names details and characters of yachts classed by the society together with the particulars of other yachts which are considered to be of interest illustrates plates of the flags of yacht and sailing clubs together with a list of club officers an illustrated list of the distinguishing flags of yachtsmen a list of the names and addresses of yacht owners and much other information for more information on the lloyd s register of yachts please click here [hec.lfoundation.org.uk/archive/library/lloyds register of yachts](http://hec.lfoundation.org.uk/archive/library/lloyds%20register%20of%20yachts) online exploring ancient skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope the book reviews an enormous and growing body of literature on the cultures of the ancient mediterranean the far east and the new world particularly mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts the authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures the book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 a d the lion horoscope and the star of bethlehem exploring ancient skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation it will be useful as a reference for scholars and as a text for students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history over 5 500 detailed biographies of the most eminent talented and distinguished women in the world today accurate and reliable biographical information essential to anyone interested in the world of literature theinternational who s who of authors and writersoffers invaluable information on the personalities and organizations of the literary world including many up and coming writers as well as established names with over 8 000 entries this updated edition features concise biographical information on novelists authors playwrights columnists journalists editors and critics biographical details of established writers as well as those who have recently risen to prominence entries detailing career works published literary awards and prizes membership and contact

addresses where available an extensive listing of major international literary awards and prizes and winners of those prizes a directory of major literary organizations and literary agents a listing of members of the american academy of arts and letters
