You're Not As Crazy As I Think

2013-11-26

Would you choose God over truth if we evangelicals are known for anything we are mostly known for our opinions. Opinions we are not afraid to express and express with much gusto and volume but what if passion for truth is found not in the loudest voice and most unshakable convictions but rather in the resolve to listen to and learn from others? What if that passion is found in a willingness to rethink our most cherished beliefs? What if it is found in a refusal to embrace simple black and white categories when the world offers a bewildering array of gray? What if it is found when we refuse to dismiss those who disagree with us as simply stupid or wicked? What if it is found when we seek to learn from others through open and honest dialogue? In you're not as crazy as I think, Randal Rauser presents a very different picture of the passionate pursuit of truth from those who seek to stand on unassailable and unquestionable foundations. This pursuit begins as we rethink not only our truth paradigm but learn how to listen to hear and learn from groups so often marginalized by our biases. Could it be that those who we have dismissed or ignored like liberal Christians, Darwinists, atheists, and animal rights activists are not that stupid or wicked after all? Could it be that they might even have something important to share about the truth?

Let's Think About Nature!

2014-12-04

This program is designed to complement the natural sciences scientific concepts while usually can be defined by specific criteria and procedures for classification tend to look for inert information instead of dynamic information. This dynamism is what we promote here that blood is red or that water is colorless are given knowledge that hardly encourages questioning or reflection but let's suppose that it provides more information about the actual conditions of observation. It is said that the blood is red under the naked eye or that water is colorless in small quantity. Suppose also that in this case students are aware that what is true in parts need not be true for the whole and vice versa. These students can be motivated to reflect and ask if blood continues to be red under a microscope or if water is without color in large quantities. In other words to lead reflection with practice is what enhances the thinking abilities that should be inculcated. Let's think about nature and these thinking skills cannot be achieved without a certain philosophical curiosity. There are several thinking abilities generated by philosophical questioning and transmitted to other disciplines through reading, writing, oral expression and the ability to pay attention. Here are some of them: providing reasons, asking questions, reasoning with matrices, inductive and deductive reasoning, causal thinking, standardization, immediate inferences, hypothetical reasoning, making inferences, formation of concepts, discovery of assumptions, classification, description, realization of distinctions, instantiation, finding similarities, recognizing the relationship between part

and whole and mean end argumentation discriminative meanings making comparisons acknowledging ambiguities defining telling stories etc it would be quite exhausting to enumerate all the thinking skills and mental abilities promoted by philosophical questioning in the natural sciences but these few are sufficient to give a general idea of how lets think about nature can promote the development of children

How to Think Better About Social Justice

2012-08-12

those who are pursuing social justice too often fail to incorporate the insights of sociology and when they do make use of sociology they often draw heavily from claims that are highly contested unsupported by the evidence or outright false this book shows why learning to think sociologically can help us to think better about social justice pointing us toward possibilities for social change while also calling attention to our limits providing us with hope but also making us cautious offering a series of tips for thinking better about social justice with each chapter giving examples of bad sociological thinking and making the case for drawing from a broader range of sociological theory and research to inform social justice efforts it advocates an approach rooted in intellectual and moral humility grounded in the normative principles of classical liberalism a fresh approach to social justice that argues for the importance of sociological understanding of the world in our efforts to change it how to think better about social justice will appeal to scholars and students of sociology with interests in social justice issues and the sociology of morality as well as those working to bring about social change

Thinking about Jesus

2002

too many people want to classify jesus as someone he wasn t jesus was either the son of god or a madman there is however more evidence that he was the son of god than there is evidence that anyone or anything exists on earth today jesus made it clear to everyone that accepting him as savior and lord was the only way to achieve god s acceptance he said i am the way the truth and the light no one comes to the father except through me in his book thinking about

jesus god s attempt to save mankind author john f holman provides evidence that encourages people to think about jesus and what he did and said while he was on earth with that knowledge in hand individuals are in a position to either accept him as savior and lord or realize the consequences god sent jesus to show us the way thinking about jesus god s attempt to save mankind shows us that path to god
