Figure 1 shows the arrangement of atoms in a crystal lattice. The atoms are arranged in a regular, repeating pattern. The distance between adjacent atoms is constant. This arrangement is characteristic of a solid crystal.

Figure 2 shows the arrangement of atoms in a liquid. The atoms are arranged in a disordered, non-repeating pattern. The distance between adjacent atoms is not constant. This arrangement is characteristic of a liquid.

Figure 3 shows the arrangement of atoms in a gas. The atoms are arranged in a random, non-repeating pattern. The distance between adjacent atoms is large and varies. This arrangement is characteristic of a gas.

Figure 4 shows the arrangement of atoms in a plasma. The atoms are arranged in a random, non-repeating pattern. The distance between adjacent atoms is very large and varies. This arrangement is characteristic of a plasma.
