in the late 1980s a generation of filmmakers began to flower outside the hollywood studio system and in the following decade the independent film movement bloomed dozens of lesser known filmmakers such as steven soderbergh and quentin tarantino began walking away with coveted prizes at cannes and eventually the academy awards many of these directors were discovered at robert redford s sundance film festival and then scooped up by harvey and bob weinstein whose company miramax

laid waste to the competition in *Down and Dirty Pictures*. Peter Biskind tells the incredible story of these filmmakers the growth of Sundance into the premier showcase of independent film and the meteoric rise of the controversial Weinstein brothers who left a trail of carnage in their wake yet created an Oscar factory that is the envy of the studios.

A surprising and fascinating look at how Black culture has been leveraged by corporate America. Open the brochure for the Alvin Ailey American Dance Theater and you'll see logos for corporations like American Express. Visit the website for the Apollo Theater and you'll notice acknowledgments to corporations like Coca-Cola and Citibank. The Martin Luther King Jr. Memorial and the National Museum of African American History and Culture owe their very existence to large corporate donations from companies like General Motors. And while we can easily make sense of the need for such funding to keep cultural spaces afloat, less obvious are the reasons that corporations give to them. In *Black Culture Inc.*, Patricia A. Banks interrogates the notion that such giving is completely altruistic and argues for a deeper understanding of the hidden transactions being conducted that render corporate America dependent on Black culture. Drawing on a range of sources such as public relations and advertising texts on corporate cultural patronage and observations at sponsored cultural events, Banks argues that Black cultural patronage profits firms by signaling that they value diversity, equity, and inclusion. By functioning in this manner, support of Black cultural initiatives affords these companies something called diversity capital, an increasingly valuable commodity in today's business landscape. While this does not necessarily detract from the social good that cultural patronage does, it reveals its secret cost: ethnic community support may serve to obscure an otherwise poor track record with social justice. Banks deftly weaves innovative theory with detailed observations and a discerning critical gaze at the various agendas infiltrating memorials, museums, and music festivals meant to celebrate Black culture at a time when accusations of discriminatory practices are met with immediate legal and social condemnation. The insights offered here are urgent and necessary.

it is pretty broadly recognized that hollywood movies contain patterns of bias but it is not just people of color or women who are hurt by this many groups within america's multicultural society have complained over the years about negative and stereotypical portrayals of their own group members in motion pictures produced or released through the hollywood based studios yet as an expert on the u s film industry points out such complaints have had little impact on consistent patterns of bias in movies this book takes a broader look at the nature of negative and stereotypical movie portrayals and tracks patterns of such one sided depictions over a longer period time as a result the patterns of bias and the source the problem become more clear the problem appears to be that most of the people who have green light authority in the u s film industry for either the production and or distribution of a motion picture share a common ethnic religious cultural background thus the stories of their cohort and those of all other ethnic religious and or cultural groups whose members seldom achieve positions of power hollywood are being filtered through the cultural sensibilities of a single group john cones suggests that the solution could lie in increasing diversity at the highest levels in the u s film industry this work grew out of the observed frustration of film industry critics who have pointed out examples of bias and stereotyping in specific movies over the years only to be rebuffed by the simplistic studio arguments that such films reflect the real world and that moviegoers vote with their pocket books it can be shown that there is a consistent pattern to the choices hollywood studio executives make with respect to the movies produced and released and the specific content of those movies and it becomes obvious that hollywood is selectively portraying reality moviegoers only have limited options among all of the possibilities that could be portrayed on the silver screen this book differs from other studies touching on bias in motion pictures most such books focus on the treatment of a single ethnic religious cultural racial or other readily identifiable interest group but this study attempts to provide an overview and to identify patterns over time when the patterns of bias in motion picture content are sufficiently demonstrated and documented
