

Pdf free Munro kerrs operative obstetrics centenary edition 11e (2023)

this is a highly illustrated practical book covering the obstetric and surgical procedures used in intrapartum care including commonly used procedures and more rare techniques the authors take a step by step approach to each technique and includes tips and pointers whilst contextualising this with the history of obstetric practice authoritative world known editors and author team presents a contemporary and pragmatic summary of recent developments in operative obstetrics contextualises practice in the history of obstetric practice accurate line drawings throughout clearly demonstrating relevant procedures and equipment advice and management for obstetricians working in resource limited areas new chapter to cover labour and delivery in high bmi women extensive coverage of caesarean section to reflect current critical thinking new chapters exploring assisted vaginal delivery in greater depth management areas and guidelines fully updated e g for fetal monitoring in labour covers significant new research e g the woman trial new editor michael robson critical care in obstetrics is an upcoming specialty in the developing countries this book is first of its kind as there are very few books written on this subject with the south east asian perspective the book discusses various aspects of critical care in obstetrics starting from the basic principles physiology ethics monitoring and organization of a critical care unit the various chapters cover management of life threatening illnesses involving various organ systems of the body of a pregnant woman furthermore the management of a pregnant woman is unique as it involves not only management of the patient but the developing fetus in her womb as well this book aims to help the obstetricians postgraduate students and critical care providers with the management protocols in dealing with critically ill pregnant women the new edition of this authoritative review of the clinical approach to diagnostic and therapeutic obstetric maternal fetal and perinatal procedures will be welcomed by all professionals involved in childbirth as a significant contribution to the practice of maternal fetal medicine and surgical obstetrics a highly illustrated practical book covering the obstetric and surgical procedures used in intrapartum care including commonly used procedures such as assisted vaginal delivery forceps and vacuum delivery and more rare techniques such as major vessel ligation and embolization and internal podalic version the authors take a step by step approach to each technique and includes tips and pointers that only an experienced obstetrician would be able to describe the book is enlivened by the inclusion of short relevant historical highlights readers should find these enlightening and entertaining providing a link with the original munro kerr text focuses on the intrapartum aspects of obstetric practice the focus of medico legal and clinical audit attention highly illustrated to show techniques in detail offers tips and advice to the trainee emphasis on practical matters a step by step approach includes historical boxes to enliven and entertain completely re written from the 10th edition new authors new crisp approach using short paragraphs and bullet points over 150 line drawings and black and white clinical photos 10 20 photos to show actual soft tissue structures health care professionals need to make rapid decisions under pressure to prevent and manage adverse outcomes during childbirth using an enquiry based learning approach this book offers a straightforward but comprehensive guide to emergency care with scenarios throughout and expert commentary from a supervisor of midwives it all addresses all major emergency situations as well as legal and clinical governance issues it is essential reading for all midwives paramedics and allied health professionals involved in the provision of obstetric care away from the acute setting during intrapartum obstetric care clinicians evaluate the fetal head position manually either by abdominal or digital vaginal palpation however digital examination has been shown to be highly operator dependent subjective intrapartum ultrasound on the other hand seems to be reproducible and easy to learn in crucial situations like obstructed labor likely to require medical intervention there really is a need for ultrasound assessment of birth progress and on the busy labor ward this is the first book devoted entirely to intrapartum ultrasound for the management of labor experts in the field present their own experiences and summarize the published state of the art the use of intrapartum ultrasonography in evaluation of the first and second stages of labor and diagnosis of the occiput posterior and transverse positions is clearly documented each situation is analyzed with the help of informative images and invaluable tips and tricks are provided showing how fetal head engagement and progression can be documented objectively the importance of ultrasound in obstetrics risk management is also addressed this book explains how intrapartum ultrasonography can be used to assess whether a safe natural delivery is likely or whether operative procedures are required we hope it will be valuable for all professionals physicians and midwives alike who care for labouring women presents biographical details of 391 eponyms and names in the field along with the context and relevance of their contributions this book draws on recently acquired knowledge to provide the reader with comprehensive up to date information on the full range of obstetric complications that may be encountered during the third trimester of pregnancy and puerperium for each complication risk factors and clinical presentation are described and detailed guidance is provided on the appropriate treatment the lucid text is complemented by a wealth of images diagrams flow charts and drawings the volume has been compiled in collaboration with a large group of gynecologists obstetricians and internationally renowned scientists to provide an essential guide accordingly the book is of interest to practitioners across the world enabling them to deepen their knowledge and to refine their approach to complications in daily clinical practice caesarean section has become the most common major operation in the world and with the increasing number there are many serious and long term healthcare implications for gynaecology general surgery neonatology and epigenetics a full perspective of the procedure and its consequences is therefore essential for practitioners residents and trainees alike the textbook of caesarean section is the key textbook on this subject and is an informative and

practical tool for clinicians performing this procedure in all areas of the world the accompanying professional medical videos demonstrate in clear and expert detail the two alternative procedures for caesarean section ensuring that readers of this book gain an in depth understanding of the techniques involved and supporting blended learning in postgraduate education globally written by a distinguished team of expert contributors this book carefully describes current best practice for caesarean section alongside key chapters on the history of caesarean section and other important and related issues that obstetricians must be aware of such as anaesthesia prevention of complications of surgery reproduction after c section and perinatal outcomes the text is extensively illustrated with colour images and fully referenced throughout providing all the information essential for the reader to perform the optimal caesarean delivery procedures and diagnose and manage the short and long term complications associated with different methods of caesarean sections this book provides a comprehensive overview of clinical intrapartum care with an emphasis on a pragmatic approach which promotes the necessary vigilant care while also supporting the wishes of the pregnant woman who wants minimal interference this second edition has been thoroughly updated to reflect current practice and developments in the field since publication of the first edition with six new chapters added on topics that are of increasing importance improving intrapartum care lower genital tract trauma emergency obstetric hysterectomy acute uterine inversion disseminated intravascular coagulation and acute tocolysis the book is primarily designed to provide a comprehensive summary for candidates preparing for the part 2 mrcog examination and as such covers the rcog curriculum for intrapartum care it is also a valuable guide for all healthcare professionals working in the field including trainees consultants and midwives first multi year cumulation covers six years 1965 70 african journal of reproductive health ajrh is a multidisciplinary and international journal published quarterly march june september and december by the women s health and action research centre a non governmental organization with headquarters in nigeria the publication of the journal started in 1997 as of september 2013 54 editions have been published the journal focuses on publishing original research comprehensive review articles short reports and commentaries on reproductive health in africa it strives to provide a forum for both african and foreign authors working in africa to share findings about all aspects of reproductive health and also to disseminate innovative relevant and useful information on reproductive health throughout the continent columbus is the state capital and the most populous city of the u s state of ohio as well as the county seat of franklin county named for explorer christopher columbus the city was founded in 1812 at the confluence of the scioto and olentangy rivers and assumed the functions of state capital in 1816 this is a full account of the history of this beautiful towns of franklin county and its various townships and includes a huge and thoroughly investigated biographical section contains abstracts bibliographies and book reviews
