Toxicology and Clinical Pharmacology of Herbal Products 2000-02-03

the herbal medicine industry is growing at an astounding rate trade group estimates suggest that total sales exceeded 4 billion dollars in 1999 herbal remedies are for sale not just in health food stores but in supermarkets drug stores and even discount warehouses along with the proliferation in sales has come a proliferation of information sources not all of the sources are equally reliable or even intelligible traditional herbalists classify thistle and mugwort as cholagogues substances used to make the gallbladder contract and release bile medical school graduates are unlikely to have ever heard the term or even accept the notion that most right sided abdominal pain is a result of diminished bile flow heroin and cocaine may not be the only drugs to come from plants but a practicing physician or toxicologist might be forgiven for thinking so in 1998 1264 papers were published about cocaine and only 17 about kava kava an abused herb that is not without toxic side effects unfortunately the majority of the papers about kava kava were published in journals not found in ordinary hospital libraries in recognition of this fact and of the obvious need for a reliable reference work on herbal toxicology the toxicology and clinical pharmacology of herbal products was an early addition to our new series in forensic science and medicine it is very badly needed

Dietary Supplements: Toxicology and Clinical Pharmacology 2003

this latest version of information resources in toxicology continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field this book is a unique wide ranging international annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to sites it is highly structured providing easy access to its information among the hot topics covered are disaster preparedness and management nanotechnology omics the precautionary principle risk assessment and biological chemical and radioactive terrorism and warfare are among the designated international in scope with contributions from over 30 countries numerous key references and relevant links concise narratives about toxicologic sub disciplines valuable appendices such as the iupac glossary of terms in toxicology authored by experts in their respective sub disciplines within toxicology

Dietary Supplements *2002-12*

toxicology cases for the clinical and forensic laboratory brings together carefully selected case studies to teach important principles relating to drug and toxin exposures each case study includes contemporary clinical and forensic toxicologist studies that include a comprehensive analytical and clinical approach to patient management and address overdoses from designer drugs to nsoids to opioids to stimulants these cases present a comprehensive analytical and clinical approach to managing a drug overdose this is a must have reference for clinical and forensic laboratory scientists along with toxicology and pathology residents who need to know aspects of both brings together expert cases encompassing analytical toxicology clinical medicine and basic science in a consolidated format presents unique and challenging cases in clinical laboratories contributed by experts in the field consolidated format that make concepts in toxicology easy to learn and teach key learning points highlighted with multiple choice questions

Information Resources in Toxicology *2009-08-19*

the tools for detecting false positives false negatives and interference in interactions when testing and monitoring therapeutic drug use for physicians monitoring a patient s progress efficacy of treatment is often linked to a patient s response to medication determining whether a patient is taking the prescribed amount the drug or dosage is effective or the prescribed medication is interacting with other drugs can be determined through drug testing written as a guide for toxicologists chemists and health professionals involved in patient care resolving erroneous reports in toxicology and therapeutic drug monitoring provides an up to date introduction to the tests and methodologies used in a toxicology lab as well as the sources of testing error that can lead to false positives false negatives and unreliable conclusions of drug abuse or under use covering a host of common therapeutic drugs as well as specific types of interference in immunoassays used in drug testing the book details a number of possible testing scenarios and problems as well as solutions false positive results in immunoassays for drugs in abuse testing interferences in immunoassays used for monitoring anticonvulsants tricyclic antidepressants and digoxin false positive alcohol tests using breath analyzers and automated analyzers when a toxicology report is negative in a suspected overdose patient the world of designer drugs effects of drug herb interactions on therapeutic drug monitoring pharmacogenomics and the general principles of genetic analysis approaches for eliminating interference discordant specimen in therapeutic drug monitoring and drugs in abuse testing what to do in case there is no readily available method for testing complete with easy to read tables and flowcharts this book helps toxicologists clinical chemists clinical pathologists and forensic

pathologists develop accurate unbiased drug monitoring and toxicology reports health care professionals involved in patient care especially of critically ill patients will find this guide indispensable in making sure lab tests are reliable enough to provide high quality care an indispensable handbook to the entire suite of toxicology lab tests as well as all the possible sources of testing error resolving erroneous reports in toxicology and therapeutic drug monitoring offers clear remedies for eliminating and preventing testing error

Toxicology Cases for the Clinical and Forensic Laboratory *2020-06-20*

a treasure trove of uncommon and reliable scientific and clinical information for the toxicity and usefulness of today's leading nonherbal dietary supplements the supplements detailed were chosen for their popularity toxicity and the quantity and quality of information available each monograph discusses the history of the compound its chemical structure its current and promoted uses sources and chemical composition and its toxicity pharmacokinetics and physiological role also presented are case reports of adverse effects and interactions as well as information on reproductive effects chemical and biofluid analysis and regulatory status each chapter is based on original studies published in reputable peer reviewed journals as well as on meta analyses systematic reviews or other high quality assessments by recognized experts

Resolving Erroneous Reports in Toxicology and Therapeutic Drug Monitoring *2012-07-02*

this new fifth edition of information resources in toxicology offers a consolidated entry portal for the study research and practice of toxicology both volumes represents a unique wide ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment the editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines this edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools due to the increasing size of the hardcopy publication the current edition has been divided into two volumes to make it easier to handle and consult volume 1 background resources and tools arranged in 5 parts begins with chapters on the science of toxicology its history and informatics framework in part 1 part 2 continues with chapters organized by more specific subject such as cancer clinical toxicology genetic toxicology etc the categorization of chapters by resource format for example journals and newsletters technical reports organizations constitutes part 3 part 4 further considers toxicology's presence via the internet databases and software tools among the miscellaneous topics in the concluding part 5 are laws and regulations professional

education grants and funding and patents volume 2 the global arena offers contributed chapters focusing on the toxicology contributions of over 40 countries followed by a glossary of toxicological terms and an appendix of popular quotations related to the field the book offered in both print and electronic formats is carefully structured indexed and cross referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed among the many timely topics receiving increased emphasis are disaster preparedness nanotechnology omics risk assessment societal implications such as ethics and the precautionary principle climate change and children s environmental health introductory chapters provide a backdrop to the science of toxicology its history the origin and status of toxicoinformatics and starting points for identifying resources offers an extensive array of chapters organized by subject each highlighting resources such as journals databases organizations and review articles includes chapters with an emphasis on format such as government reports general interest publications blogs and audiovisuals explores recent internet trends web based databases and software tools in a section on the online environment concludes with a miscellany of special topics such as laws and regulations chemical hazard communication resources careers and professional education k 12 resources funding poison control centers and patents paired with volume two which focuses on global resources this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

Dietary Supplements 2002-12-10

herbal products toxicology and clinical pharmacology second edition builds on the informative foundation laid by its predecessor this fully revised and expanded second edition boasts more than 200 new references that document efficacy studies and adverse effects and four new chapters devoted to dietary products practitioners and researchers will find that this volume is a comprehensive resource for objective clinical information

Information Resources in Toxicology, Volume 1: Background, Resources, and Tools 2020-05-16

this volume provides a comprehensive overview of the hazards inherent in herbal medicinal products with systematic coverage of major toxicities topics include composition and quality control toxicokinetics interactions safety pharmacology approaches to studying complex mixtures including metabolomics and systems network pharmacology and long term toxicity the volume also discusses various organ toxicities with a special emphasis on basic mechanisms of actions and the multicomponent and multi target nature of herbal products it concludes with a look to future challenges and opportunities with contributions

from noted experts toxicology of herbal products is a necessary resource for physicians pharmacists and toxicologists interested in complex plant derived products

Herbal Products 2007-10-05

from echinacea to ayurvedics this book explains how toxic these remedies are alone or in combination with other widely prescribed drug treatments for example one should avoid most herbal remedies when pregnant because of pesticides and preservatives required in growth and storage of the herbs a widely used herbal antidepressant called kava does damage to the liver most ayurvedic medicines contain unacceptable levels of lead and other heavy metals st john s wort is not recommended if you are taking a medication for any chronic medical condition dr dasgupta explains in simple engaging prose what drug interactions are and why they are dangerous most educated people see herbal remedies as natural and therefore safe dr dasgupta tells us that one of his first pharmacology professors taught him that medicine is just another word for poison and should be treated with the same respect he will present a balanced account of efficacy and safety of herbal medicines with discussion on potentially unsafe and toxic remedies this book will be written in layman s language for the consumer health market but will be based on solid medical research and published reports in the medical literature

Toxicology of Herbal Products 2017-03-07

although primarily used today as one of the most prevalent illicit leisure drugs the use of cannabis sativa commonly referred to as marijuana for medicinal purposes has been reported for more than 5000 years marijuana use has been shown to create numerous health problems and consequently the expanding use beyond medical purposes into recreational use abuse resulted in control of the drug through international treaties much research has been carried out over the past few decades following the identification of the chemical structure of thc in 1964 the purpose of marijuana and the cannabinoids is to present in a single volume the comprehensive knowledge and experience of renowned researchers and scientists each chapter is written independently by an expert in his her field of endeavor ranging from the botany the constituents the chemistry and pharmacokinetics the effects and consequences of illicit use on the human body to the therapeutic potential of the cannabinoids

Prescription or Poison? 2011-02-15

the practice of forensic pathology includes the collection and analysis of evidence in relation to a corpse in order to establish the cause of death knowledge of the cause of death contributes to the determination of the manner of death by medical examiners and coroners who are occasionally assisted by law enforcement officers in the process of establishing the cause and manner of death representatives of various investigative bodies have several responsibilities including explaining the death to family members attempting to reduce the risk of similar deaths in the future and if applicable apprehending the individuals who are responsible for the death the most well known and popular role of a forensic pathologist is in the investigation of cases of suspicious death however most medicolegal autopsies involve unexpected deaths that are above suspicion many of which are caused by trauma trauma being defined as any physical force or agent that causes bodily harm the purpose of forensic pathology of trauma common problems for the pathologist is to provide practical advice and information about the conduct of the forensic autopsy in cases of trauma and to offer guidance about the analysis of the autopsy findings in these cases

Marijuana and the Cannabinoids 2007-11-15

this work focuses on the therapeutics safety and risk information of herbs and supplements used during pregnancy and lactation for obstetricians maternal fetal medicine specialists and primary care physicians

Forensic Pathology of Trauma 2007-11-06

a comprehensive review of the science of drug testing in all its aspects placing emphasis on technologies that use body fluids other than urine for determining the presence of drugs of abuse the authors discuss the various body fluid specimens suitable for testing for illicit drugs particularly saliva sweat and hair describe the structural and manufacturing aspects of on site testing devices based on lateral flow immunoassay and detail the pitfalls of using these specimens they also discuss in detail the problem of sample adulteration and its detection since oral fluid has the best potential of succeeding urine as the next matrix of choice for drug detection four popular saliva testing devices are examined intercept the drager drug test oratect and drugwipe political social and legal issues are also considered in articles on privacy the use of drug testing in courts and the problem of sample adulteration

Herbal Medicines in Pregnancy and Lactation *2013-03-20*

a comprehensive and easy to read introduction to the work of the modern forensic laboratory the authors explain in simple language the capabilities and limitations of modern forensic laboratory procedures techniques analyses and interpretations here the interested reader will find an understandable and fascinating introduction to the complex worlds of forensic serology dna chemistry crime reconstruction digital evidence explosives arson fingerprints firearms tool marks odontology and pathology additional chapters address the problems of assuring quality and seeking trace evidence in the forensic laboratory

Drugs of Abuse *2007-11-05*

the metropolitan police service mps now in its 175th year has a long tradition of working with doctors in fact the origin of the forensic physician police surgeon as we know him or her today dates from the passing by parliament of the metropolitan act which received royal assent in june of 1829 since then there are records of doctors being appointed to the police to provide medical care to detainees and examine police officers while on duty the mps has been involved in the training of doctors for more than 20 years and has been at the forefront of setting the highest standards of working practices in the area of clinical forensic medicine only through an awareness of the complex issues regarding the medical care of detainees in custody and the management of complainants of assault can justice be achieved the mps therefore has worked in partnership with the medical profession to ensure that this can be achieved the field of clinical forensic medicine has developed in recent years into a specialty in its own right the importance of properly trained doctors working with the police in this area cannot be overemphasized it is essential for the protection of detainees in police custody and for the benefit of the criminal justice system as a whole a book that assists doctors in the field is to be applauded

The Forensic Laboratory Handbook *2007-11-08*

sudden in custody restraint deaths have emerged as a critical and important problem for police correctional and medical care workers the scope and magnitude of the problem clearly reveals that the subject matter is worthy of further consideration although the frequency of these deaths is very low the criticality of its occurrence requires attention to the subject matter the purpose of sudden deaths in custody is to provide current information that addresses the issue from a number of perspectives it is our purpose to assemble under one title current research that addresses the varying facets that underscore the

nature of sudden in custody deaths the intent is to provide information that can further educate and assist those officers administrators investigators trainers and medical personnel who must interact intervene and make decisions about how to prevent sudden in custody deaths sudden deaths in custody specifically addresses sudden in custody deaths that occur after a violent confrontation such incidents may occur after police or correction officers intervention but also include incidents that may occur in a mental health facility or emergency medical field setting the deaths described in this volume all involve sudden death within minutes or hours of contact preceded by one or more of the following violent confrontation with police or corrections personnel forcible control measures and behavior influenced by a chemical substance or mental impairment incidents involving custodial suicides homicides accidents fatal pursuits or police shootings are excluded

Clinical Forensic Medicine 2007-11-13

Publius Syrus stated back in 42 B.C. you cannot put the same shoe on every foot Maxim 596 though written long before the advent of forensic science Syrus Maxim summarizes the theme of forensic medicine of the lower extremity human identification and trauma analysis of the thigh leg and foot put simply the lower extremity is a tremendously variable anatomic region this variation is beneficial to forensic experts differences in the leg and foot can be used to establish individual identity analysis of damage to the lower limb can be used to reconstruct antemortem perimortem and postmortem trauma as a forensic anthropologist I analyze cases involving decomposed burned mummified mutilated and skeletal remains many of the corpses I examine are incomplete occasionally I receive nothing but the legs and feet a lower torso dragged from a river a foot recovered in a city park dismembered drug dealers in plastic bags victims of bombings and airline disasters and the dead commingled in common graves though the leg and foot contain much that is useful in forensic analysis before this publication investigators faced a twofold problem little research that focused on the lower extremity was available in the literature and the existing research was published in diverse sources making its location and synthesis a daunting task

Sudden Deaths in Custody 2007-10-28

a concise compilation of the known interactions of the most commonly prescribed drugs as well as their interaction with nonprescription compounds the agents covered include CNS drugs cardiovascular drugs antibiotics and NSAIDs for each class of drugs the authors review the pharmacology pharmacodynamics pharmacokinetics chemistry metabolism epidemiological occurrences adverse reactions and significant interactions environmental and

social pharmacological issues are also addressed in chapters on food and alcohol drug interactions nicotine and tobacco and anabolic doping agents comprehensive and easy to use handbook of drug interactions a clinical and forensic guide provides physicians with all the information needed to avoid prescribing drugs with undesirable interactions and toxicologists with all the data necessary to interpret possible interactions between drugs found simultaneously in patient samples

Forensic Medicine of the Lower Extremity *2007-10-28*

although the specimen of choice in the us drug testing industry is urine and serum in clinical medicine interest has recently grown in the use of other matrices as drug testing media this book provides researchers and forensic toxicologists with a convenient general text summarizing the state of knowledge today chapters focus specifically on the application of these practices to drugs of abuse the up to date information provided is complemented with thorough references

Handbook of Drug Interactions *2003-10-15*

the university of texas at brownsville and texas southmost college t p

Drug Testing in Alternate Biological Specimens *2008-02-10*

in this revised and expanded edition leading forensic scientist john trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder topics range from the use of poisons in history and literature to convicting the poisoner in court and include a review of the different types of poisons techniques for crime scene investigation and the critical essentials of the forensic autopsy the author updates what is currently known about poisoners in general and their victims the appendix has been updated to include the more commonly used poisons as well as the use of antifreeze as a poison

Curandero Conversations 2009

biochemical imbalances caused by nutritional deficiencies are a contributory factor in many of today's most common chronic health problems this handbook for practitioners consolidates all of the latest information on how to identify diagnose and nutritionally modify such imbalances in order to help patients better understand and manage their health groundbreaking in its scope and in the quality of its research the book covers a wide range of biochemical imbalances including compromised adrenal or thyroid function gastro intestinal imbalances dysregulation of the immune system and sex hormone imbalances developed by leading researchers educators and clinicians in the fields of functional medicine and nutrition biochemical imbalances in disease is an essential resource for nutrition practitioners and students it will also be a useful reference for conventional and non conventional practitioners who are interested in working with nutrition practitioners to deliver more integrated services

Criminal Poisoning 2007-04-30

margaret stark and a team of authoritative experts offer a timely survey of the fundamental principles and latest developments in clinical forensic medicine topics range from sexual assault examination to injury interpretation from nonaccidental injury in children to crowd control agents also included are extensive discussions of the care of detainees the management of substance abuse detainees in custody the causes and prevention of deaths in custody and the fundamentals of traffic medicine in the absence of international standards of training the authors also address the basic issues of consent confidentiality note keeping court reporting and attendance in court comprehensive and authoritative a physicians guide to clinical forensic medicine offers forensic specialists and allied professionals a reliable up to date guide to proven practices and procedures for a every variety of police inquiry requiring clinical forensic investigation

Biochemical Imbalances in Disease 2010

prominent experts explain the pharmacology and metabolism of benzodiazepines ldb and g hydroxybutyric acid ghb and offer powerful and effective methodologies that will enable better detection of these drugs in various body fluids as well as in hair the techniques include highly sensitive immunoassay detection of ldbs the detection of rohypnol and other ldbs by mass spectrometry and the ultrasensitive detection of ghb state of the art and highly practical

benzodiazepines and ghb detection and pharmacology offers toxicologists forensic scientists and clinical chemists today s most effective methods for detecting these widely abused drugs that are sometimes found associated with criminal acts

A Physician's Guide to Clinical Forensic Medicine 2000-01-31

translational inflammation links laboratory and clinical data within primary and secondary care to clinical research data and offers a holistic and innovative approach to chronic inflammation and ageing understanding the role of inflammation as a part of clinical disease states is becoming a valuable tool in both direct treatment and the development of therapeutics translational inflammation the 4th volume in the perspectives in translational cell biology series offers content for professors students and researchers across basic and translational biology emphasizes the role of inflammation in disease and therapeutic approaches integrates broad concepts relating inflammation to other fields offers a bridge to review literature and primary research on the inflammatory response towards medical application

Benzodiazepines and GHB 2001-09-14

bestselling author david ewing duncan takes the ultimate high tech medical exam investigating the future impact of what s hidden deep inside all of us david ewing duncan takes guinea pig journalism to the cutting edge of science building on award winning articles he wrote for wired and national geographic in which he was tested for hundreds of chemicals and genes associated with disease emotions and other traits expanding on these tests he examines his genes environment brain and body exploring what they reveal about his and his family s future health traits and ancestry as well as the profound impact of this new self knowledge on what it means to be human david ewing duncan san francisco ca is the chief correspondent of public radio s biotech nation and a frequent commentator on npr s morning edition he is a contributing editor to portfolio discover and wired and a columnist for portfolio his books include the international bestseller calendar humanity s epic struggle to determine a true and accurate year 978 0 380 79324 2 he is a former special producer and correspondent for abc s nightline and appears regularly on cnn and programs such as today and good morning america
