interdisciplinary teaching about the earth and environment for a sustainable future presents the outcomes of the integrate project a community effort funded by the national science foundation to improve earth literacy and build a workforce prepared to tackle environmental and resource issues the integrate community is built around the shared goal of supporting interdisciplinary learning about earth across the undergraduate curriculum focusing on the grand challenges facing society and the important role that the geosciences play in addressing these grand challenges the chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students the authors of these chapters are faculty members administrators program directors and researchers from institutions across the country who have collectively envisioned

implemented and evaluated effective change in their classrooms programs institutions and beyond this book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by infusing sustainability across the curriculum broadening access to earth and environmental sciences and assessing the impacts of those changes

Succeeding in the Inclusive Classroom

food plants international was formally established in 1999 but its origins go back to 1980 bruce french founder of fpi was living in papua new guinea at the time and noticed that many villagers suffered disease and malnutrition often while surrounded by nutritious food plants it wasn t that they didn t know anything about their local plants but there were clearly a lot more edible plants than was readily recognised also there was very little nutritional information available about the plants bruce also observed that most of the information taught in agricultural colleges related to temperate plants commonly produced in western agriculture from these humble beginnings bruce set out to document the food plants of png an effort that soon spread to include the entire world of food plants
