from one of the most perceptive observers of the english today comes a brilliantly insightful mordantly funny account of their seemingly irrational embrace of nationalism england s recent lurch to the right appears to be but one example of the nationalist wave sweeping across the world yet as acclaimed irish critic fintan o toole suggests in the politics of pain it is in reality a phenomenon rooted in world war ii we must look not to the vagaries of the european union but instead far back to the end of the british empire if we hope to understand our most fraternal ally and the royal mess in which the british now find themselves o toole depicts a roiling nation that almost ludicrously dreams of a german invasion if only to get the blood going and that erupts in faux outrage over regulations on prawn flavored crisps a sympathetic yet unsparing observer o toole asks how did a great nation bring itself to the point of such willful self harm his answer represents one of the most profound portraits of the english since sarah lyall s new york times bestseller the anglo files

this slashing critique charges that the federal government and interest groups have badly mismanaged the political process for private ends transcending conventional ideologies bandow sees the root of the problem as our failure to honor the founding fathers intention to establish a limited government with severely circumscribed powers in all areas people abuse power it is human nature only limited state authority will keep the political process from disintegrating into petty fighting among factions each competing for its own limited self interest the demise of the original restraints has created an overgrown federal government that is ever more wasteful inefficient and unjust doug bandow spares no sacred cows he considers state interference in the free market responsible for an ethic of legalized theft which allows interest groups to use the state to enrich themselves through subsidies competitive restrictions and other protectionist measures he sees a judiciary that has aided the other branches of government in manipulating human conduct and restricting personal freedom for both liberal and conservative reasons and in

foreign policy he sees the development of an interventionist consensus whereby washington attempts to remake foreign nations in its image through military intervention and foreign aid with disastrous results the politics of plunder is written by an insider who combines theoretical and analytical skill with practical political experience bandow served in the most conservative administration of recent years yet freely criticizes the nostrums of the right he is an evangelical christian yet dislikes the tactics of the religious right his unique background campaign worker lawyer presidential aide magazine editor policy analyst and journalist enables him to go far beyond the usual washington commentary bandow s objective is to develop a new political perspective that transcends both conservative and liberal boundaries and emphasizes individual liberty skepticism of state power and tolerance of others those interested in the world of ideas will find this an accessible practical guide to libertarian thought those interested in the world of public policy will find here a detailed discussion of scores of recent controversies

in this book hannes charen presents an alternative examination of kinship structures in political theory employing a radically transdisciplinary approach on the politics of kinship is structured in a series of six theoretical vignettes or frames each chapter frames a figure aspect or relational

context of the family or kinship some chapters are focused on a critique of the family as a state sanctioned institution while others cautiously attempt to recast kinship in a way to reimagine mutual obligation through the generation of kinship practices understood as a perpetually evolving set of relational responses to finitude in doing so charen considers the ways in which kinship is a plastic social response to embodied exposure both concealed and made more evident in the bloated feeble and broken individualities and nationalities that seem to dominate our social and political landscape today on the politics of kinship will be of interest to political theorists as to feminists anthropologists and social scientists in general

how did we get into this mess every morning many americans ask this as with a cringe they pick up their phones and look to see what terrible thing president trump has just said or done regardless of what he s complaining about or whom he s attacking a second question comes hard on the heels of the first how on earth do we get out of this alan wolfe has an answer in the politics of petulance he argues that the core of our problem isn t trump himself it s that we are mired in an age of political immaturity that immaturity is not grounded in any one ideology nor is it a function of age or education it s in an abdication of valuing the character of would be leaders it s in a failure to acknowledge even welcome the complexity of government and society and it s in a loss of the ability to be skeptical without being suspicious in 2016 many americans were offered tantalizingly simple answers to complicated problems and like children being offered a lunch of pop rocks and coke they reflexively and mindlessly accepted the good news such as it is is that we ve been here before wolfe reminds us that we know how to grow up and face down trump and other demagogues wolfe reinvigorates the tradition of public engagement exemplified by midcentury intellectuals such as richard hofstadter reinhold niebuhr and lionel trilling and he draws lessons from their battles with mccarthyism and conspiratorial paranoia wolfe mounts a powerful case that we can learn from them to forge a new path for political intervention today

wolfe has been thinking and writing about american life and politics for decades he sees this moment as one of real risk but he s not throwing up his hands he s bracing us we ve faced demagogues before we can find the intellectual maturity to fight back yes we can

multiculturalism and the politics of guilt extends paul gottfried s examination of western managerial government s growth in the last third of the twentieth century linking multiculturalism to a distinctive political and religious context the book argues that welfare state democracy unlike bourgeois liberalism has rejected the once conventional distinction between government and civil

society gottfried argues that the west's relentless celebrations of diversity have resulted in the downgrading of the once dominant western culture the moral rationale of government has become the consciousness raising of a presumed majority population while welfare states continue to provide entitlements and fulfill the other material programs of older welfare regimes they have ceased to make qualitative leaps in the direction of social democracy for the new political elite nationalization and income redistributions have become less significant than controlling the speech and thought of democratic citizens an escalating hostility toward the bourgeois christian past explicit or at least implicit in the policies undertaken by the west and urged by the media is characteristic of what gottfried labels an emerging therapeutic state for gottfried acceptance of an intrusive political correctness has transformed the religious consciousness of western particularly protestant society the casting of true christianity as a religion of sensitivity only toward victims has created a precondition for extensive social engineering gottfried examines late twentieth century liberal christianity as the promoter of the politics of guilt metaphysical guilt has been transformed into self abasement in relation to the suffering just identified with racial cultural and lifestyle minorities unlike earlier proponents of religious liberalism the therapeutic statist oppose anything including empirical knowledge that impedes the expression of social and cultural guilt in an effort to raise the self esteem of designated victims equally troubling to gottfried is the growth of an american empire that is influencing european values and fashions europeans have begun he says to embrace the multicultural movement that originated with american liberal protestantism's emphasis on diversity as essential for democracy he sees europeans bringing authoritarian zeal to enforcing ideas and behavior imported from the united states multiculturalism and the politics of guilt extends the arguments of the author's earlier *After Liberalism* whether one challenges or supports gottfried's conclusions all will profit from a careful reading of this latest diagnosis of the american condition

favor of a viewpoint that argued outside the terms set by the establishment in her new study of bourne s political thought leslie vaughan maintains that this position was not as others have contended a retreat from politics but rather a different form of political engagement freed from the suppositions that impede genuine debate and democratic change her analysis challenges previous readings of bourne s politics showing that he offered non statist neighborhood based politics in america s modern cities as a practical alternative to involvement in the national state and its militarism by demonstrating bourne s emphasis on politics as local multi ethnic and intergenerational vaughan shows that his thought offered a new political discourse and set of cultural possibilities for american society in an era he was the first to label as post modern returning to the influence of nietzsche on his thought she also explores the role bourne played in the creation of his own myth eighty years later bourne can be seen to stand at the cusp of the modern and the post modern worlds as he speaks to today s multiculturalist movement in reexamining bourne s writings vaughan has located the roots of twentieth century radical thought while repositioning bourne at the center of debates about the nature and limits of american liberalism
