public finance is crucial to a country's economic growth yet successful reform of public finances has been rare. Ethiopia is an example of a country that undertook comprehensive reform of its core financial systems independent of the IMF and the World Bank and successfully transformed itself into one of the fastest growing economies in Africa. With Ethiopia's twelve-year reform as its guiding case study, this book presents new analytical frameworks to help governments develop better financial reforms. It shows in detail how four core financial systems: budgeting, accounting, planning, and financial information systems can be reformed. One of the principal findings presented is that governments must establish basic public financial administration before moving to more sophisticated public financial management. Other key findings include the identification of four strategies of reform: recognize, improve, change, and sustain; the centrality of ongoing learning to the process of reform; and the importance of government ownership of reform. This book will be of interest to researchers and policymakers concerned with public finance, developmental economics, and African studies.

First published in 1998, this organizational and professional socialization of trainee chartered accountants reports the findings of an ICAEW-funded research project which explored the training and socialization of trainee accountants in two big six firms in the UK. The background to the research, particularly the under-researched nature of the socialization of accountants, is outlined. The research issues are located within the institutional context of the accounting profession in the UK and the academic literature on the professions and professional socialization. The main research findings reported concern the main research findings reported concern the development of trainees' understandings of their professional identity, the role of formal processes and informal norms within socialization, the relationship of professional identity to notions of client service, firm identity, divisionalization, and career success.

Praise for Corporate Fraud Handbook: Prevention and Detection. The Corporate Fraud Handbook offers insightful information for fraud detection and prevention and is illustrated with a multitude of actual case examples. Mary Jo Kranacher, Editor in Chief, The CPA Journal, I have worked with Dr. Wells for more than a decade. In my opinion, his knowledge of fraud puts him in the top echelon of professionals anywhere. Barry C. Melancon, President and CEO, American Institute of Certified Public Accountants. Joe Wells is a pioneer in the anti-fraud field as well as a terrific writer. Greg Farrell, Investigative Reporter, USA Today. This book harmonizes the study of actual fraud cases and related theories. A must read for anyone interested in the global fight against fraud. Pedro Fabiano, Fraud Investigator, Buenos Aires, Argentina. This book should be the cornerstone of any good fraud investigator's library. Isabel Mercedes Cumming, Assistant State's Attorney, Baltimore City, Maryland. Dr. Wells is a brilliant author. His writing is clear to the point and entertaining. I find the Corporate Fraud Handbook indispensable. Corey A. Bloom, Senior

this title was first published in 2003 this book provides a much needed comprehensive and up to date treatise on financial distress modelling since many of the challenges facing researchers of financial distress can only be addressed by a totally new research design and modelling methodology this book concentrates on extending the potential for bankruptcy analysis from single equation modelling to multi equation analysis essentially the work provides an innovative new approach by comparing each firm with itself over time rather than testing specific hypotheses or improving predictive and classificatory accuracy added to this new design a whole new methodology or way of modelling the process is applied in the form of a family of models of which the traditional single equation logit or mda models is just a special case preliminary two equation and three equation models are presented and tested in the

final chapters as a taste of things to come the groundwork for a full treatise on these sorts of multi equation systems is laid for further study this family of models could be used as a basis for more specific applications to different industries and to test hypotheses concerning influential variables to bankruptcy risk
