june 16 2004 was the one hundredth anniversary of bloomsday the day that james joyce s novel ulysses takes place to celebrate the occasion thousands took to the streets in dublin following in the footsteps of protagonist leopold bloom the event also was marked by the bloomsday 100 symposium where world renowned scholars discussed joyce s seminal work this volume contains the best most provocative readings of ulysses presented at the conference the contributors to this volume urge a close engagement with the novel they offer readings that focus variously on the materialist historical and political dimensions of ulysses the diversity of topics covered

include nineteenth century psychology military history catholic theology the influence of early film and music hall songs on joyce the post ulysses evolution of the one day novel and the challenge of discussing such a complex work amongst the sea of extant criticism

## *Put Some Pants on That Kid (STUDENT BOOK) 2012-03-07*

this volume introduces english speakers to genetic criticism arguably the most important critical movement in france today in recent years french literary scholars have been exploring the interpretive possibilities of textual history turning manuscript study into a recognized form of literary criticism they have clearly demonstrated that manuscripts can be used for purposes other than establishing an accurate text of a work although its raw material is a writer s manuscripts genetic criticism owes more to structuralist and

poststructuralist notions of textuality than to philology and textual criticism as genetic criticism demonstrates the chief concern is not the final text but the reconstruction and analysis of the writing process geneticists find endless richness in what they call the *avant texte* a critical gathering of a writer's notes sketches drafts manuscripts typescripts proofs and correspondence together the essays in this volume reveal how genetic criticism cooperates with such forms of literary study as narratology linguistics psychoanalysis sociocriticism deconstruction and gender theory genetic criticism contains translations of eleven essays general theoretical analyses as well as studies of individual authors such as flaubert proust joyce zola stendhal chateaubriand and montaigne some of the essays are foundational statements while others deal with such recent topics as noncanonical texts and the potential impact of hypertext on genetic study a general introduction to the book traces genetic criticism's intellectual history and separate introductions give precise contexts for each essay
