Your Everyday Art World 2013-08-30 a critic takes issue with the art world s romanticizing of networks and participatory projects linking them to the values of a globalized neoliberal economy over the past twenty years the network has come to dominate the art world affecting not just interaction among art professionals but the very makeup of the art object itself the hierarchical and restrictive structure of the museum has been replaced by temporary projects scattered across the globe staffed by free agents hired on short term contracts viewed by spectators defined by their predisposition to participate and make connections in this book lane relyea tries to make sense of these changes describing a general organizational shift in the art world that affects not only material infrastructures but also conceptual categories

and the construction of meaning examining art practice exhibition strategies art criticism and graduate education relyea aligns the transformation of the art world with the advent of globalization and the neoliberal economy he analyzes the new networked participatory art world hailed by some as inherently democratic in terms of the pressures of part time temp work in a service economy the calculated stockpiling of business contacts and the anxious duty of being a team player at work relyea calls attention to certain networked forms of art including relational aesthetics multiple or fictive artist identities and bricolaged objects that can be seen to oppose the values of neoliberalism rather than romanticizing and idealizing them relyea offers a powerful answer to the claim that the interlocking functions of the network each act of communicating of connecting or practice are without political content

2014-07-30 written from the perspective of a practising artist this book proposes that against a groundswell of historians museums and commentators claiming to speak on behalf of art it is artists alone who may define what art really is jelinek contends that while there are objects called art in museums from deep into human history and from around the globe from hans sloane s collection which became the foundation of the british museum to alfred barr s inclusion of primitive art within the walls of moma the museum of modern art only those that have been made with the knowledge and discipline of art should rightly be termed as such policing the definition of art in this way is not to entrench it as an elitist occupation but in order to focus on its liberal democratic potential between discipline and a hard place describes the value of art outside the current preoccupation with economic considerations yet without resorting to a range of stereotypical and ultimately instrumentalist political or social goods such as social inclusion or education a wider argument is also made for disciplinarity as jelinek discusses the great potential as well as the pitfalls of interdisciplinary and multidisciplinary working particularly with the so called creative arts a passionate treatise arguing for a new way of understanding art that forefronts the role of the artist and the importance of inclusion within both the concept of art and the art world

Richard Wagner and the Art of the Avant-Garde, 1860-1910 2023-08-14 from Henry Darger's elaborate paintings of young girls caught in a vicious war to the sacred art of the Reverend Howard Finster the work of outsider artists has achieved unique status in the art world celebrated for their lack of traditional training and their position on the fringes of society outsider artists nonetheless participate in a traditional network of value status and money after spending years immersed in the world of self-taught artists Gary Alan Fine presents everyday genius one of the most insightful and comprehensive examinations of this network and how it confers artistic value Fine considers the differences among folk art outsider art and self-taught art explaining the economics of this distinctive art market and exploring the dimensions of its artistic production and distribution interviewing dealers collectors curators and critics and venturing into the backwoods and inner city homes of numerous self-taught artists Fine describes how authenticity is central to the system in which artists often poor elderly members of a minority group or mentally ill are seen as having an unfettered form of expression highly valued in the art world respected dealers he shows have a hand in burnishing biographies of the artists and both dealers and collectors trade in identities as much as objects revealing the inner workings of an elaborate and prestigious world in which money personalities and values affect one another Fine speaks eloquently to both experts and general readers and provides rare access to a world of creative invention both by self-taught artists and by those who profit from their work indispensable for an understanding of this world and its workings Fine's book is not an attack on the outsider art phenomenon but it is masterful in its anatomization of some of its contradictions conflicts pressures and absurdities Eric Gibson Washington Times

The Saturday Review of Politics, Literature, Science and Art 1871 the packing promotion and reception of contemporary art troubles Peter Timms market demands dominate and art has been corrupted and trivialized the problem he argues extends to the way art is taught in art schools the art that artists make the collecting and curatorial methodologies of galleries and museums funding criteria the way that art is written about and the media's depiction of art

Healing with Art and Soul 2008-12-18 the history of art from the early nineteenth century onward is commonly viewed as a succession of conflicts between innovative and established styles that culminated in the formalism and aesthetic autonomy of high modernism in art and crisis first published in 1948 Hans Sedlmayr argues that the aesthetic disjunctions of modern art signify more than matters of style and point to much deeper processes of cultural and religious disintegration as Roger Kimball observes in his informative new introduction art in crisis is as much an exercise in cultural or spiritual analysis as it is a work of art history Sedlmayr's reads the art of the last two centuries as a fever chart of the modern age in its greatness and its decay he discusses the advent of romanticism with its freeing of the imagination as a conscious sundering of art from humanist and religious traditions with the aesthetic treated as a category independent of human need looking at the social purposes of architecture Sedlmayr shows how the landscape garden the architectural monument and the industrial exhibition testified to a new relationship not only between man and his handiwork but also between man and the forces that transcend him in these institutions man defies his inventive powers with which he hopes to master and supersede nature likewise the art museum denies transcendence through a cultural leveling in which Heracles and Christ become brothers as objects of aesthetic contemplation at the center of art in crisis is the insight that in art as in life the pursuit of unqualified autonomy is in the end a prescription for disaster aesthetic as well as existential Sedlmayr writes as an Augustinian Catholic for him the underlying motive for the pursuit of autonomy is pride the lost center of his subtitle is God the dream of autonomy Sedlmayr argues is for finite mortal creatures a dangerous illusion the book invites serious analysis from art critics
