Animals and Society 2021-04-13 human animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds it examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies since existing social orders rely on the exploitation of animals to serve human needs the questions posed by human animal studies touch upon a wide range of fundamental issues animals and society provides a broad overview of this rapidly growing field margo demello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals she considers interactions between animals and humans in social organizations such as the family the legal system and political and religious institutions a major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism sexism and class privilege the book also examines how different human groups construct a range of identities for themselves and for others through animals this second edition of animals and society is fully updated and expanded throughout enhancing the book s relevance for student and activist readers alike it includes many new international examples all new case studies and updated supplementary readings

Animals Make Us Human 2010-01-12 how can we give animals the best life for them what does an animal need to be happy in her groundbreaking best selling book animals in translation temple grandin drew on her own experience with autism as well as her experience as an animal scientist to deliver extraordinary insights into how animals think act and feel now she builds on those insights to show us how to give our animals the best and happiest life on their terms not ours knowing what causes animals physical pain is usually easy but pinpointing emotional distress is much harder drawing on the latest research and her own work grandin identifies the core emotional needs of animals and then explains how to fulfill the specific needs of dogs and cats horses farm animals zoo animals and even wildlife whether it s how to make the healthiest environment for the dog you must leave alone most of the day how to keep pigs from being bored or how to know if the lion pacing in the zoo is miserable or just exercising grandin teaches us to challenge our assumptions about animal contentment and honor our bond with our fellow creatures animals make us human is the culmination of almost thirty years of research experimentation and experience this is essential reading for anyone who s ever owned cared for or simply cared about an animal

Human-Animal Interactions in the Eighteenth Century 2021-12-13 how did humans respond to the eighteenth century discovery of countless

new species of animals this book explores the gamut of human animal interactions from love to cultural identifications moral reflections philosophical debates classification systems mechanical copies insults and literary creativity

The Routledge Companion to Animal-Human History 2018-09-03 the routledge companion to animal human history provides an up to date guide for the historian working within the growing field of animal human history giving a sense of the diversity and interdisciplinary nature of the field cutting edge contributions explore the practices of and challenges posed by historical studies of animals and animal human relationships divided into three parts the companion takes both a theoretical and practical approach to a field that is emerging as a prominent area of study animals and the practice of history considers established practices of history such as political history public history and cultural memory and how animal human history can contribute to them problems and paradigms identifies key historiographical issues to the field with contributors considering the challenges posed by topics such as agency literature art and emotional attachment the final section themes and provocations looks at larger themes within the history of animal human relationships in more depth with contributions covering topics that include breeding war hunting and eating as it is increasingly recognised that nonhuman actors have contributed to the making of history the routledge companion to animal human history provides a timely and important contribution to the scholarship on animal human history and surrounding debates

Experiencing Animal Minds 2012-11-27 in these multidisciplinary essays academic scholars and animal experts explore the nature of animal minds and the methods humans conventionally and unconventionally use to understand them the collection features chapters by scholars working in psychology sociology history philosophy literary studies and art as well as chapters by and about people who live and work with animals including the founder of a sanctuary for chickens a fur trapper a popular canine psychologist a horse trainer and an art photographer who captures everyday contact between humans and their animal companions divided into five sections the collection first considers the ways that humans live with animals and the influence of cohabitation on their perceptions of animals minds it follows with an examination of anthropomorphism as both a guide and hindrance to mapping animal consciousness chapters next examine the effects of embodiment on animals minds and the role of animal human interembodiment on humans understandings of animals minds final sections identify historical representations of difference between human and animal consciousness and their relevance to pre established cultural attitudes as well as the

ways that representations of animals minds target particular audiences and sometimes produce problematic outcomes the editors conclude with a discussion of the relationship between the book s chapters and two pressing themes the connection between human beliefs about animals minds and human ethical behavior and the challenges and conditions for knowing the minds of animals by inviting readers to compare and contrast multiple uncommon points of view this collection offers a unique encounter with the diverse perspectives and theories now shaping animal studies

Humans and Animals: Intersecting Lives and Worlds 2019-07-22 addressing the non human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective this volume seeks to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal human bond

Zoobiquity 2012-06-14 concerns about the recent explosions of diseases like hiv the west nile virus and other avian and swine flus that originate in animals have encouraged new efforts on a global scale to bridge the gap between animal and human medicine for the benefit of both zoobiquity is the first book to explore many of the human and animal health issues that overlap and provides new insight into the treatment of many diseases including diabetes cancer heart disease and mental illness but zoobiquity is even bigger than health and academic medicine and encompasses much more than our diseases and how to cure them it sheds light on the evolution of hierarchies and similarities between a tribe of apes and a fortune 500 company it suggests that the ways we run our political and justice systems may overlap with how animals protect and defend their territories and that examining this possibility in a scientifically credible way could help strengthen our institutions it dangles the possibility that human parenting could be informed by a greater knowledge and respect for how our animal cousins solve issues of childcare sibling rivalry and infertility

Animals in Person 2020-08-29 our relationship with animals is complex and contradictory we hunt kill and eat them yet we also love respect and protect them this ambivalent relationship is further complicated by the fact that we attribute human emotions and intelligence to animals we even go as far as likening them to children and treating them as family members drawing on a diverse range of case studies animals in person attempts to unravel our close and fascinating link with the animal kingdom this book highlights the theme of cross species intimacy in contexts such as livestock care pet keeping and the use of animals in tourism the studies draw on data from different parts of the world

including new guinea nepal india japan greece britain the netherlands and australia animals in person documents the existence of relations between humans and animals that in many respects recall relations among humans themselves

Placing Animals 2012-08-02 as julie urbanik vividly illustrates non human animals are central to our daily human lives we eat them wear them live with them work them experiment on them try to save them spoil them abuse them fight them hunt them buy and sell them love them and hate them placing animals is the first book to bring together the historical development of the field of animal geography with a comprehensive survey of how geographers study animals today urbanik provides readers with a thorough understanding of the relationship between animal geography and the larger animal studies project an appreciation of the many geographies of human animal interactions around the world and insight into how animal geography is both challenging and contributing to the major fields of human and nature society geography through the theme of the role of place in shaping where and why human animal interactions occur the chapters in turn explore the history of animal geography and our distinctive relationships in the home on farms in the context of labor in the wider culture and in the wild

Beyond Boundaries 1997 beyond boundaries steps out into hitherto unknown territory in taking an interdisciplinary approach to the subject of animals the author criticizes the biological determinism characteristic of many biologists as well as the anthropocentrism of many environmentalists and greens who fail to see domestic animals or even humans as part of nature vast in its scope and vision this book synthesizes an array of disparate research and scholarship and in doing so exposes the tensions and inconsistencies in the view of animals in different areas of western thought a project of such breadth is unprecedented and there is no existing conceptual structure for a work of this kind it is certain to spark a furore of philosophical debate

Social Creatures 2008 in more than thirty essays social animals examines the role of animals in human society collected from a wide range of periodicals and books these important works of scholarship examine such issues as how animal shelter workers view the pets in their care why some people hoard animals animals and women who experience domestic abuse philosophical and feminist analyses of our moral obligations toward animals and many other topics

Zoobiquity 2013-04-09 engaging science writing that bravely approaches a new frontier in medical science and offers a whole new way of looking at the deep kinship between animals and human beings zoobiquity a species spanning approach to medicine bringing doctors and

veterinarians together to improve the health of all species and their habitats in the tradition of temple grandin oliver sacks and neil shubin this is a remarkable narrative science book arguing that animal and human commonality can be used to diagnose treat and ultimately heal human patients through case studies of various species human and animal kind alike the authors reveal that a cross species approach to medicine makes us not only better able to treat psychological and medical conditions but helps us understand our deep connection to other species with whom we share much more than just a planet this revelatory book reaches across many disciplines evolution anthropology sociology biology cutting edge medicine and zoology providing fascinating insights into the connection between animals and humans and what animals can teach us about the human body and mind

Humans and Animals 2017-01-26 an engaging and at times sobering look at the coexistence of humans and animals in the 21st century and how their sometimes disparate needs affect environments politics economies and culture worldwide there is an urgent need to understand human animal interactions and relations as we become increasingly aware of our devastating impact on the natural resources needed for the survival of all animal species this timely reference explores such topics as climate change and biodiversity the impact of animal domestication and industrial farming on local and global ecosystems and the impact of human consumption of wild species for food entertainment medicine and social status this volume also explores the role of pets in our lives advocacy movements on behalf of animals and the role of animals in art and media culture authors julie urbanik and connie l johnston introduce the concept of animal geography present different aspects of human animal relationships worldwide and highlight the importance of examining these interconnections alphabetical entries illustrate key relationships concepts practices and animal species the book concludes with a comprehensive appendix of select excerpts from key primary source documents relating to animals and a glossary

Animals and Human Society 2002-11 modern society is beginning to re examine its whole relationship with animals and the natural world until recently issues such as animal welfare and environmental protection were considered the domain of small idealistic minorities now these issues attract vast numbers of articulate supporters who collectively exercise considerable political muscle animals both wild and domestic form the primary focus of concern in this often acrimonious debate yet why do animals evoke such strong and contradictory emotions in people and do our western attitudes have anything in common with those of other societies and cultures bringing together a range of

contributions from distinguished experts in the field animals and society explores the importance of animals in society from social historical and cross cultural perspectives

Good Natured 2009-06-30 to observe a dog's guilty look to witness a gorilla's self sacrifice for a wounded mate to watch an elephant herd's communal effort on behalf of a stranded calf to catch animals in certain acts is to wonder what moves them might there be a code of ethics in the animal kingdom must an animal be human to be humane in this provocative book a renowned scientist takes on those who have declared ethics uniquely human making a compelling case for a morality grounded in biology he shows how ethical behavior is as much a matter of evolution as any other trait in humans and animals alike world famous for his brilliant descriptions of machiavellian power plays among chimpanzees the nastier side of animal life Frans de Waal here contends that animals have a nice side as well making his case through vivid anecdotes drawn from his work with apes and monkeys and bolstered by the intriguing voluminous data from his and others ongoing research de Waal shows us that many of the building blocks of morality are natural they can be observed in other animals through his eyes we see how not just primates but all kinds of animals from marine mammals to dogs respond to social rules help each other share food resolve conflict to mutual satisfaction even develop a crude sense of justice and fairness natural selection may be harsh but it has produced highly successful species that survive through cooperation and mutual assistance de Waal identifies this paradox as the key to an evolutionary account of morality and demonstrates that human morality could never have developed without the foundation of fellow feeling our species shares with other animals as his work makes clear a morality grounded in biology leads to an entirely different conception of what it means to be human and humane

The Animal/human Bond 1998 this aspect brings animals within our moral domain

The Human-animal Relationship 2005 drawing on a range of perspectives philosophy literary criticism art history and cultural studies the essays collected here explore unconventional ways of knowing animals offering new insights into apparently familiar relationships between humans and other living beings

Knowing Animals 2007 everything we do has an inborn genetic basis and all our activities show similarities to those of other species man is unique though in the way in which he has built on these animal patterns exaggerating and elaborating them to an astounding degree or

suppressing them with damaging consequences morris sets out to show that despite our inclination to believe otherwise human behaviour is full of animal instinct and reaction and that whatever the species we all share remarkable similarities

The Human Animal 1994 explores our complex relationships with pets

Companion Animals and Us 2005-07-21 is the human species becoming dehumanized by the condition of his environment so human an animal is an attempt to address this broad concern and explain why so little is being done to address this issue the book sounds both an urgent warning and offers important policy insights into how this trend toward dehumanization can be halted and finally reversed

So Human an Animal 2017-01-02 the division of life into animal and human is one of the fundamental schisms found within political societies ironically given the immense influence of the animal human divide especially upon power dynamics the discipline in charge of theorizing and studying power political science and theory has had little to say about the animal human this book seeks to amend this vast oversight acknowledging the complexity of the changing differences between animals and humans the contributors explore such topics as marx freud the animal and civilization dog breeding racism and democracy the meaningful silences of animals how sovereignty reconfigures the animal human and the paradoxical struggles against being dehumanized among immigrant workers in a slaughterhouse political theory and the animal human relationship is necessary reading for anyone who wants to understand how power has been influenced by the animal human divide and what we can do about it

Political Theory and the Animal Hu P 2012 this interdisciplinary and cross cultural collection reflects the growth of animal studies as an independent field and the rise of animality as a critical lens through which to analyze society and culture on par with race and gender

Animals and the Human Imagination 2016-12-05 considering animals draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as march of the

penguins happy feet and grizzly man animals experiences in catastrophic events such as hurricane katrina and the sars outbreak and the danger of overvaluing the role humans play in the earth s ecosystems from marc bekoff s moving preface through to the last essay considering animals foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self contained existences and bring into focus our troubled relationships with them written in an accessible and jargon free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline

Considering Animals 2006 photographer and former zookeeper noyes delivers an artfully designed photo essay that examines the ways humans lives have overlapped with animals throughout history and embarks on a quest for understanding the other kingdom photos

One Kingdom 2016-04-27 screening the nonhuman draws connections between how animals represented on screen translate into reality in doing so the book demonstrates that consuming media is not a neutral act but rather a political one the images humans consume have real world consequences for how animals are treated as actors as pets and in nature the contributors propose that altering the representations of animals can change the way humans relate to non humans our hope is for humans to generate more ethical relationships with non humans ultimately mediating reality both in terms of fiction and non fiction to achieve this end film television advertisements and social media are analyzed through an intersectional lens but the book doesn t stop here each author creates counter representational strategies that promise to unweave the assumptions that have led to the mistreatment of humans and non humans alike

Screening the Nonhuman 2021-03-23 a remarkable combination of biology genetics zoology evolutionary psychology and philosophy richard powers pulitzer prize winning author of the overstory a brilliant thought provoking book matt haig new york times bestselling author of the midnight library a wide ranging take on why humans have a troubled relationship with being an animal and why we need a better one human are the most inquisitive emotional imaginative aggressive and baffling animals on the planet but we are also an animal that does not think it is an animal how well do we really know ourselves how to be animal tells a remarkable story of what it means to be human and argues that at the heart of our existence is a profound struggle with being animal we possess a psychology that seeks separation between humanity and the rest of nature and we have invented grand ideologies to magnify this as well as piecing together the mystery of how this mindset evolved challenger s book examines the wide reaching ways in which it affects our lives from our politics to the way we distance ourselves from other

species we travel from the origin of homo sapiens through the agrarian and industrial revolutions the age of the internet and on to the futures of ai and human machine interface challenger examines how technology influences our sense of our own animal nature and our relationship with other species with whom we share this fragile planet that we are separated from our own animality is a delusion according to challenger blending nature writing history and moral philosophy how to be animal is both a fascinating reappraisal of what it means to be human and a robust defense of what it means to be an animal

How to Be Animal 2002 table of contents

Animals in Human Histories 1954 this book explores the history and nature of our dependency on other animals and the implications of this for human and animal health writing from an historical and sociological perspective joanna swabe s work discusses such issues as animal domestication the consequences of human exploitation of other animals including links between human and animal disease the rise of a veterinary regime designed to protect humans and animals alike implications of intensive farming practices pet keeping and recent biotechnological developments this account spans a period of some ten thousand years and raises important questions about the increasing intensification of animal use for both animal and human health

THE HUMAN ANIMAL 1989 this book is an interdisciplinary collection shedding light on human animal relationships and interactions around the world the book offers a predominantly empirical look at social and cultural practices related to companion animals in mexico poland the netherlands japan china and taiwan vietnam usa and turkey among others it focuses on how dogs cats rabbits and members of other species are perceived and treated in various cultures highlighting commonalities and differences between them

Humans and Other Animals 2002-09-11 explores the evolving and diverse ways in which humans and animals interact from blood sports to pet keeping

Animals, Disease and Human Society 2016-09-14 an exhaustive listing of books journals articles films conferences college programs organizations and websites from the new and exciting discipline of human animal studies the information was gathered by leading academics in the humanities the social sciences and the natural sciences this is the only reference of its kind this project was completed in conjunction with the book teaching the animal

Companion Animals in Everyday Life 2012 this book describes the transformation of humans into animals in a very matter of fact and scientific way various methods by which this may be achieved are identified as also are the ways in which the reverse transformation can be achieved

Humans and Other Animals 2012-04 focusing on the socialization of the human use of other animals as resources in contemporary western society this book explores the cultural reproduction of human nonhuman animal relations in childhood with close attention to the dominant practices through which children encounter animals and mainstream representations of animals in children s culture whether in terms of the selective exposure of children to animals as pets or as food in the home or in school or the representation of animals in mass media and social media our children and other animals reveals the interconnectedness of studies of childhood culture and human animal relations

Human-Animal Studies 2022-07-20 to what extent and in what manner do storytelling practices accommodate nonhuman subjects and their modalities of experience and how can contemporary narrative study shed light on interspecies interactions and entanglements in narratology beyond the human david herman addresses these questions through a cross disciplinary approach to post darwinian narratives concerned with animals and human animal relationships herman considers the enabling and constraining effects of different narrative media examining a range of fictional and nonfictional texts disseminated in print comics and graphic novels and film in focusing on techniques such as the use of animal narrators alternation between human and nonhuman perspectives the embedding of stories within stories and others the book explores how specific strategies for portraying nonhuman agents both emerge from and contribute to broader attitudes toward animal life herman argues that existing frameworks for narrative inquiry must be modified to take into account how stories are interwoven with cultural ontologies or understandings of what sorts of beings populate the world and how they relate to humans showing how questions of narrative bear on ideas of species difference and assumptions about animal minds narratology beyond the human underscores our inextricable interconnectedness with other forms of creatural life and suggests that stories can be used to resituate imaginaries of human action in a more than human world

Human Animals 2014-11-28 in a dystopian future the government is overthrown and the new order protects animal rights with a heavy handed brutality consuming meat has become illegal and the agency tasked with enforcing the law is given free reign to do as they see fit one experienced agent has a life changing encounter that shakes his core and forces him to examine his life while putting him at risk for becoming

the target of his own organization

Our Children and Other Animals 2018 this book tackles the controversial question should human rights be granted to animals cavalieri s
defence of the rights of nonhuman animals questions the nature scope and language of contemporary ethics and the legal system

Narratology Beyond the Human 2014-11-18 john dupr explores the ways in which we categorize animals including humans and comes to
refreshingly radical conclusions it is a mistake to think that each organism has an essence that determines its necessary place in a unique
hierarchy we should reject the misguided concepts of a universal human nature and normality in human behavior he shows that we must take
a pluralistic view of biology and the human sciences
