

Reading free Jena economic research papers (PDF)

in 2023 economies celebrates its 10th anniversary thanks to the incredible support from all of you the journal has developed into a well respected academic journal economies has been included in several journal rankings has a decent and growing number of submissions by well known experts and obtains very satisfactory citation scores given its young age we acknowledge these achievements with a dedicated special issue therefore researchers from all areas of economic research have been invited to submit their contributions to this special issue the special issue is titled recent topics in economic research and covers a broad range of topics that are currently at the forefront of economics research and that are within economies scope this includes original research papers as well as comprehensive review papers on topics of actual importance in economics lonergan s early economic research delves into the origins of bernard lonergan s economic theory through his own writing on the subject michael shute provides transcriptions of many of lonergan s private files on economics for a deeper understanding of his groundbreaking macroeconomic theory an introduction by the editor contextualizes the works which also serve as archival materials relevant to the companion volume lonergan s discovery of the science of economics organized around specific themes such as dialectic of history methodology economic history and price equilibrium the book makes available a substantial amount of previously unpublished texts materials include lonergan s earliest notes on economics prior to his move to rome in 1933 the complete surviving portion of an essay in fundamental sociology and notes on economists heinrich pesch and lionel robbins among others these early works show that lonergan built his economic discoveries on the methodological developments that he founded in his writings on the philosophy of history first published in 1997 this volume responded to a current national concern with quality control part 1 addresses issues including the us trade deficit international lending to brazil and the traditional theory of international finance part 2 explores topics such as the history of statistics in the west and former east and the haphazard axiomatic methodological basis of traditional econometrics finally part 3 consists of 7 papers on applied economics and finance including predicting the success of takeover bids and an examination of the economic determinants of juvenile crime in new york city conference paper on trends and problems in quantitative economic research and econometrics with particular reference to the organization of research and data collecting includes references conference held in south brookline 1971 april 23 this volume contains papers presented at a conference in may 1988 in washington d c commemorating the fiftieth anniversary of the founding of the conference on research in income and wealth criw the call for papers emphasized assessments of broad topics in economic measurement both conceptual and pragmatic the organizers desired and succeeded in obtaining a mix of papers that first illustrate the range of measurement issues that economics as a science must confront and second mark major milestones of criw accomplishment the papers concern prices and output griliches pieper triplett and also the major productive inputs capital hulten and labor hamermesh measures of saving the source of capital accumulation are covered in one paper boskin measuring productivity the source of much of the growth in per capita income is reviewed in another jorgenson the use of economic data in economic policy analysis and in regulation are illustrated in a review of measures of tax burden atrostic and nunns and in an analysis of the data needed for environmental regulation russell and smith the adequacy of data for policy analysis is evaluated in a roundtable discussion chapter 12 involving four distinguished policy analysts with extensive government experience in washington and ottawa the brookings papers on economic activity long one of brookings s signature publications has new leadership the two incoming editors have both made outstanding contributions to economic research and the communication of economic ideas to a broad audience they will ensure that bpea continues to be a central meeting place for leading scholars analyzing important economic problems the new editorial team will retain bpea s focus on empirical research of current issues in macroeconomics and economic policy emphasizing real world events and institutions the journal will uphold its tradition of this book is must reading for statisticians and economists who would have an end to interdisciplinary differences stemming from the mutual misunderstanding of terminology and who see the value of a common forum of discussion the topics included here illustrate the scope of statistical science in economics and represent current theory and practice the selections offer discussions on the epistemological quality of economic data and quantitative approaches applicable to problem solving across a broad spectrum from industry to ecology and in the private and public sectors co published with the international society of statistical science in economics this volume presents new methods and applications in longitudinal data estimation methodology in applied economic featuring selected papers from the 2020 the international conference on applied economics icoae 2020 held virtually due to the corona virus pandemic this book examines interdisciplinary topics such as financial economics international economics agricultural economics marketing and management country specific case studies are also featured if treated as a single economy the european union is the largest in the world with an estimated gdp of over 14 trillion euros despite its size european economic policy has often lagged behind the rest of the world in its ability to generate growth and innovation much of the european economic research itself often trails behind that of the usa which sets much of the agenda in mainstream economics this book also available as open access bridges the gap between economic research and policymaking by presenting overviews of twelve key areas for future economic policy and research written for the economists and policymakers working within european institutions it uses comprehensive surveys by europe s leading scholars in economics and european policy to demonstrate how economic research can contribute to good policy decisions and vice versa demonstrating how economics research can be motivated and made relevant by hot policy questions this volume presents selected papers from the 18th eurasia business and economics society ebes conference with major emphasis placed on highlighting the latest research developments in the economics of innovation public economics and management the articles in the volume also address more specialized topics such as luxury fashion weather derivatives health management islamic bonds and life satisfaction among others the majority of the articles focus on phenomena observed in the middle east and north africa mena region and south asia representing a unique contribution to understanding contemporary research challenges from a different perspective

discussing a wide range of topics of contemporary relevance from the domain of finance and economics this book presents a collection of twenty four research papers which were selected on the basis of their topicality the novelty of their methods and the importance of their subject matter all papers pursue an empirical approach to address key research issues and are categorized into three major parts part one includes papers related to development economics and environmental economics the second part focuses on monetary economics public economics and behavioral economics while the third tackles issues concerning corporate finance and financial risk management bringing together works of scholars from around the world the book presents a truly global perspective and not only serves as an essential guide on the topic for researchers but also has a distinctive role to play in policymaking this book features a collection of high quality and peer reviewed papers from the 2023 7th international conference on applied economics and business which was held in copenhagen denmark during august 24 26 2023 icaeb is held annually as a platform for the presentation of new advances and research results in the fields of applied economics and business applied economics is a way of dealing with esoteric economic concepts in a practical and analytical way it allows for decisions to be made that are underlined by theoretical economic principles but utilized in such a way that they transform into real work applications the contributors cover topics such as environment development finance forensics information institutions international labor management mathematics currency tourism and many more applied economics affects all aspects of life and science and it is brought to the forefront in this collection of papers the conference with its aim to bring together economists from different fields lends itself to a natural and rich collection of scientific papers all focused on the practical application of economic principles the scope of this collection of papers will be useful to academics and practitioners who look to economics to help solve problems vernon l smith is the main creator of the burgeoning discipline of experimental economics this collection of his papers from 1962 to 1988 surveys major developments in the field from early attempts to simulate economic behavior in now classic double oral auction markets through recent studies of industrial organization and decision making topics covered include monopoly and oligopoly supply and demand theory under posted pricing uniform pricing double continuous auction and sealed bid offer auction hypothetical valuation and market pricing asset price bubbles predatory pricing market contestability and natural monopoly and the methodology of experimental economics taken together the papers form a history of the study of economics under controlled conditions vernon smith is regents professor of economics at the university of arizona and is the author of over 100 articles and books on capital theory finance natural resource economics and experimental economics he is president of the public choice society and past founding president of the economic science association in the united states today there are some 3 400 separately governed colleges and universities amounting to a higher education industry with expenditures that constitute 2 8 of the gross national product yet the economic issues affecting this industry have been paid relatively little attention in this collection of eight essays experts in economics and education bring economic analysis to bear on such underexamined topics as the nature of competition in higher education higher education s use of resources and who chooses to purchase what kind of education and why in higher education supply refers to such issues as government support for public colleges and universities the means by which graduate programs allocate financial support to students and the criteria that universities use for investing endowments demand pertains to patterns of student enrollment and to the government business and individual market for the service and research activities of higher education why are tuitions nearly the same among schools despite differences in prestige how are institutions with small endowments able to compete successfully with institutions that have huge endowments how are race and ethnicity reflected in enrollment trends where do the best students go what choices among colleges do young people from low income backgrounds face this volume addresses these questions and suggests subjects for further study of the economics of higher education applying experimental methods has become one of the most powerful and versatile ways to obtain economic insights and experimental economics has especially supported the development of behavioral economics the art of experimental economics identifies and reviews twenty of the most important papers to have been published in experimental economics in order to highlight the power and methods of this area and provides many examples of findings in behavioral economics that have extended knowledge in the economics discipline as a whole chosen through a combination of citations recommendations by scholars in the field and voting by members of leading societies the twenty papers under review some by nobel prize winning economists run the full gamut of experimental economics from theoretical expositions to applications demonstrating experimental economics in action also written by a leading experimental economist each chapter provides a brief summary of the paper makes the case for why that paper is one of the top twenty in the field discusses the use made of the experimental method and considers related work to provide context for each paper these reviews quickly expose readers to the breadth of application possibilities and the methodological issues leaving them with a firm understanding of the legacy of the papers contributions this text provides a survey of some of the very best research in experimental and behavioral economics and is a valuable resource for scholars and economics instructors students seeking to develop capability in applying experimental methods and economics researchers who wish to further explore the experimental approach gary charness is professor of economics and the director of the experimental and behavioral economics laboratory at the university of california santa barbara usa mark pingle is professor of economics at the university of nevada reno usa this volume first published in 1985 and based on a conference organised jointly by the centre for economic policy research and the national bureau of economic research examines developments in the study of international economic policy coordination eight papers were presented and the meeting concluded with a panel discussion on the prospects for international policy coordination in past years there has been a revival of interest in the study of the international coordination of economic policy in the united states and europe this volume presents some of the best research on this important topic the papers focus on several issues of importance in determining the desirability of international policy coordination the nature of the transmission effects by which one country s policies affect another country the trade off between the current and future effects of policies and the credibility of government policy when undertaken unilaterally or coordinated internationally this book contains 25 interviews with leading economists based in the united states and europe the interviews detail their methods of
