experts in economics psychology statistics and decision theory explore the question of how to make wise choices that improve the welfare of individuals and society

Strategic Thinking in Complex Problem Solving 2016

the objective of this conference was to foster a healthy exchange of ideas and experience in the domain of multiple criteria problem solving this conference was an outgrowth of an earlier conference i organized with herve thiriez at cesa jouy en josas france in 1975 during my stay at the european institute in brussels when i re joined the state university of new york at buffalo that year i began to search for potential sponsors for this conference approximately one year later when the prospects began to look promising i contacted several individuals to act as an informal coordinating committee for the conference i wanted to avoid biasing the conference completely to my way of thinking the members of this committee were jim dyer peter fishburn ralph kee ney bernard roy universite de paris ix dauphine who was unable to participate in the conference and milan zeleny though the committee did not meet per se their inputs regarding format possible participants number of participants length of the conference and so on were of

great value to me in planning and organizing the conference i wish to acknowledge the contributions of this group we were most fortunate in obtaining the financial support of the european institute for advanced studies in management brussels one of the sponsors of the jouy en josas conference the office of naval research and the state university of new york at buffalo

The Routledge Companion to Ecological Design Thinking 2022-08-31

this book addresses the role of law in the adaptive management of socio ecological systems recent years have witnessed a rise in discussion over the relation between adaptivity and law as if after decades of insouciance legal scholars have finally started to understand the impacts of the scientific paradigm called adaptive management on the legal sphere even though the complicated relations between law and the adaptive management of socio ecological systems have become more debated a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented using the illustrative example of european union water governance and its path toward embracing adaptive management this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced though always pivotal rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the normative is created gradually before law begins to examine the facts of the matter after examining the roots of adaptive management this book argues that the legal needs to understand itself as an integral part of the process of the socio ecological management of complex systems and not merely an external umpire resolving disputes as a whole the book offers new insights into the eu regulator s approaches to scientific realities making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges and to scientists interested in the science and law aspects of their work

Wise Choices 1996

public attention has focused in recent years on an array of technological risks to health safety and the environment at the same time responsibilities for technological risk as sessment evaluation and management have grown in both the public and private sectors because of a perceived need to anticipate prevent or reduce the risks inherent in modem society in attempting to meet these responsibilities legislative judicial regulatory and private sector institutions have had to deal with the extraordinarily complex problems of assessing and balancing risks costs and benefits the need to help society cope with technological risks has given rise to a new intellectual endeavor the social and behavioral study of issues in risk evaluation and risk management the scope and complexity of these analyses require a high degree of cooperative effort on the part of specialists from many fields analyzing social and behavioral issues requires the efforts of political scientists sociologists decision analysts management scientists econ omists psychologists philosophers and policy analysts among others

Multiple Criteria Problem Solving 2012-12-06

these essays assess market liberal or libertarian political theory they provide insights into the limits of government develop market oriented solutions to pressing social problems and explore some defects in traditional libertarian theory and practice some of the essays deal with crucial theoretical issues asking whether the promotion of citizens welfare can serve as the justification for the establishment of government or inquiring into the constraints on individual behavior that exist in a liberal social order some essays explore market liberal or libertarian positions on specific public policy issues such as affirmative action ownership of the airwaves the provision of healthcare or the regulation of food and drugs other essays look at property rights the morality of profit making or the provision of public goods still others address libertarianism as a political movement suggesting ways in which libertarians can reach out to those who do not share their views

Law, Ecology, and the Management of Complex Systems 2022-08-19

breaking the vicious circle is a tour de force that should be read by everyone who is interested in improving our regulatory processes written by a highly respected federal judge who would go on to serve on the supreme court and who obviously recognizes the necessity of regulation but perceives its failures and weaknesses as well it pinpoints the most serious problems and offers a creative solution that would for the first time bring rationality to bear on the vital issue of priorities in our era of limited resources

Decisions with Multiple Objectives 1993

Problems of Market Liberalism: Volume 15, Social Philosophy and Policy, Part 2 1998-10-13

this title was first published in 2000 this text is part of the international library of management which aims to present a comprehensive core reference series comprised of significant and influential articles by the authorities in the management studies field the collection of essays is both international and interdisciplinary in scope and aims to provide an entry point for investigating the myriad of study within the discipline

Breaking the Vicious Circle 1995-03-15

from the acclaimed behavioral economist shlomo benartzi a powerful new approach to thinking smarter when making important life decisions although we've been blessed with a very powerful thinking machine our minds there's good evidence that we don't like to think in fact one study shows that many people prefer receiving electric shocks to thinking and reflecting other studies show that even when we do think we tend to think in too narrow and shallow a fashion with these shortcomings how can we be smarter when thinking about life situations like retirement for example once we have built up a financial nest egg how can we become better thinkers about what to do in retirement to help us behavioral economist shlomo benartzi introduces the notion of thinking architecture and thinking tools in this book he offers one such thinking tool a unique seven step system called the goal planning system gps and explains the science behind it when applied to retirement planning this system helps readers identify what they value most what they want to achieve in retirement and ultimately who they really are by going through gps readers will then have a solid foundation upon which to build a tailored action plan that can help them attain their goals to illustrate the impact gps can have thinking smarter considers the cases of phillip and francesca actual retirees and the action plans they developed after using gps for example spend more today while many people spend too much and outlive their assets phillip discovered that he errs on the side of spending too little so he will plan to spend more on something he values a lot traveling with his wife claim more tomorrow gps taught francesca that she places a high value on financial independence an action plan that makes sense for her is to reap the financial benefit derived from deferring social security until she's seventy rather than claiming it as soon as she becomes eligible at age sixty two thinking smarter will become your indispensable guide to making better life decisions and achieving the future you really want

Decision Analysis of Environmental Problems 2015-08-08

organizational behaviour as a management discipline is a fascinating subject and is becoming increasingly important as people with diverse backgrounds and cultural values have to work together effectively and efficiently this book addresses all the issues that come in to play in an organization in today's global economy it has a novel orientation and its primary aim is to let practitioners and students know the latest and best trends in organizational behaviour this book prescribes methods to manage employees and suggests that the management takes responsibility for everything that might adversely affect an employee's capacity to work creatively and intelligently irrespective of the place

inside the organization or outside it the focus of the book is on holistic development of the individual peeping into the human mind it shows how organizations can tap the passions and fears of their employees to make them more creative and productive the book prescribes a democratic and inclusive management stye a special feature of this book is that there is an innovative integration of chapter objectives and summaries leading to analysis through caselets every point in the objectives has corresponding text and is supplemented by a case going through this book will be a personally fulfilling experience and maybe it succeeds to make the readers better human beings better teachers better friends and may be even better managers

□□□□□ 1981

this book is unique in identifying and presenting tools to environmental decision makers to help them improve the quality and clarity of their work these tools range from software to policy approaches and from environmental databases to focus groups equally of value to environmental managers and students in environmental risk policy economics and law

Decision Science 2017-11-01

as a manager you make countless decisions every day some are straightforward such as assigning a team member to a project others are far more complex such as determining how to handle an under performing product line how can you boost the odds of making the best decisions for your organization treat decision making as a process this volume reveals key strategies for handling each step in the process you ll find out how to generate a diverse set of alternative courses of action for the decision at hand assess the feasibility risks and ethical implications of each alternative select the best course of action communicate your decision and carry it out
