the 11th missouri infantry distinguished itself as just the type of regiment the union needed in the civil war hard as nails and loyal to a fault the men of the eagle brigade would follow their commanders into hell if they ordered they battled two confederate regiments at iuka turned the tide at battery robinett at corinth assaulted the impossible stockade redan at vicksburg as whole ranks of soldiers were cut down and broke hood s line at nashville although the 11th missouri ranks among the 300 top regiments of the civil war little of its history has been formally recorded this study provides a detailed account of the regiment s four and a half years of outstanding service and a roster

a silent place death in mycenaean lakonia is the first book length systematic study of the late bronze age lba burial tradition in south eastern peloponnese greece and the first to comprehensively present and discuss all mycenaean tombs and funerary contexts excavated and or simply reported in the region from the 19th century to present day the book will discuss and reconstruct the emergence and development of the mycenaean mortuary tradition in lakonia by examining the landscape of death the burial architecture the funerary and post funerary customs and rituals and offering patterns over a longue durée the author proposes patterns of continuity from the middle bronze age even the early bronze age in terms of burial architecture to the lba and equally important from the late bronze age to the early iron age and reconstructs diachronic processes of invention of tradition and identity in mycenaean communities on the basis of tomb types and their material culture the text highlights the social political and economic history of late bronze age lakonia from the evolution of the mycenaean civilisation and the establishment of palatial administration in the spartan vale to the demise of mycenaean culture and the turbulent post collapse centuries as reflected by the burial offerings the book also brings to publication the chamber tombs at epidavros limera that remained largely unpublished since their excavation in the 1930s and 1950s epidavros limera was one of the most important prehistoric coastal sites in prehistoric southern greece early 3rd late 4th millennium bc and one of the main harbour towns of the mycenaean

administrative centres of central lakonia it is one of very few mycenaean sites that flourished uninterruptedly from the emergence of the mycenaean civilisation until after the collapse of the palatial administration and into the transition to the early iron age the present study of the funerary architecture and of the pottery from the tombs suggests that the site was responsible for the introduction of the chamber tomb type on the greek mainland in the latest phase of the middle bronze age definitely no later than the transitional middle bronze age late bronze age period and not in the early phase of the late bronze age late helladic i as previously assumed
