honors outdated narratives often treat imperial divine honors as uniform and centralized focusing on the city of rome instead burnett examines divine honors in philippi thessalonica and corinth while all three cities incorporated imperial cultic activity in their social religious economic and political life the purposes and contours of the practice varied based on the city s unique history for instance thessalonica paid divine honors to living julio claudians as tribute for their status as a free city in the empire and christian resistance to the practice was seen as a threat to that independence ultimately burnett argues that early christianity was not specifically antigovernment but more broadly countercultural and that responses to this stance ranged from conflict to apathy burnett s compelling argument challenges common assumptions about the first christians place in the roman empire this fresh account will benefit christians seeking to understand their faith s place in public life today
