illuminating the idea of legality by a consideration of its moral nature this book explores the emergence and development of two rival traditions of legal thought those of positivism and idealism which together define the structure of modern juridical thought in doing so it consciously departs from many of the tendencies and working assumptions that define modern legal philosophy the book examines the shifts in thinking about the rule of law and the wider significance of law brought about by changing conceptions of the nature of law from an understanding of law in which the primary focus is on rights to an articulation of the legal order as a body of deliberately posited rules and finally to the present understanding of law as a systematic body of rules and principles underpinned by an abiding concern with individual rights by exposing the historical and metaphysical underpinnings of these theoretical traditions the book imparts an idea of their limitations and moves beyond the understandings offered within them of the nature of legality

epistemic evaluation aims to explore and apply a particular methodology in epistemology the methodology is to consider the points or purposes of our epistemic evaluations and to pursue epistemological theory in light of such matters call this purposeful epistemology the idea is that considerations about the point and purpose of epistemic evaluation might fruitfully constrain epistemological theory and yield insights for epistemological reflection several contributions to this volume explicitly address this general methodology or some version of it others focus on advancing some application of the methodology rather than on theorizing about it the papers go on to explore the idea that purposes allow one to understand the conceptual demands on knowing examine how purposeful epistemology might shed light on the debate between internalist and externalist epistemologies and further develop the idea of purposeful epistemology

john cottingham in the anglophone philosophical world there has for some time been a curious relationship between the history of philosophy and contemporary

philosophical query many philosophers working today virtually ignore the history of their subject apparently regarding it as an antiquarian pursuit with little relevance to their cutting edge research conversely there are historians of philosophy who seldom if ever concern themselves with the intricate technical debates that fill the journals devoted to modern analytic philosophy both sides are surely the poorer for this strange bifurcation for philosophy like all parts of our intellectual culture did not come into existence out of nowhere but was shaped and nurtured by a long tradition in uncovering the roots of that tradition we begin to see current philosophical problems in a broader context and thereby enrich our understanding of their significance this is surely part of the justification for the practice in almost every university of including elements from the history of philosophy as a basic part of the undergraduate curriculum but understanding is enriched by looking forwards as well as backwards which is why a good historian of philosophy will not just be concerned with uncovering ancient ideas but will be constantly alert to how those ideas prefigure and anticipate later developments
