technology nor the medical care required to establish disease diagnoses the icn publication is available in 29 languages and is in current use throughout the world noting the absence of an organized literature upon which to base clinical studies she embarked on a project to annotate nursing literature the four volume nursing studies index was completed in 1972 and was hailed as her most important contribution to nursing science miss henderson started her most important writing project at the age of 75 when she began the sixth edition of the principles and practice of nursing text over the next five years she led gladys nite and seventeen contributors to synthesize the professional literature she had just completed indexing with the wisdom gleaned from over fifty years in the nursing profession and the opportunity to review the

writings of all principle authors who wrote in english she fashioned a work that both thoroughly criticized health care and offered nurses an opportunity to correct the shortcomings the book operates on two levels individual and global she argued that health care will be reformed by the individual nurses who will enable their patients to be independent in health care matters when patients are both educated and encouraged to care for themselves she took this philosophy to new heights by eliminating medical jargon from the text and declaring it is a reference for those who want to guard their own or their family s health or take care of a sick relative or friend aahn the first book of its kind it presents exhaustive lucid and detailed guidelines for managing patients in the icu it contains of mankind s most enduring societal unit the family this is a new book building on the strengths of the first edition the emphasis of this book like that of the specialty itself is on the clinical delivery of health care that is how the practitioner manages common problems and recognizes uncommon entities encountered in office hospital home and nursing home in the first edition we were faced with the problem of how to organize a family medicine textbook that dealt with clinical topics yet represented more than a series of essays on the specialties for the generalist reader we began by identifying specific objectives outlined in the preface to the first edition from this evolved an approach which has been called the biopsychosocial perspective inclusion of behavioral family social and cultural aspects of health care integrated with the traditional manifestations and manage ment textbook model the first edition also introduced a comprehensive classification of clinical problems in family medicine now used in curriculum planning in many family practice residency programs

other countries so it was that we met talked and planned at wonca world organization of national colleges and academies and academic associations of general practitioners family physicians meetings at montreux and new orleans we realized that although we worked in different places and in different practices primary health care was essentially the same the world over our roles our problems our clinical content our challenges and objectives were similar whether we work in europe north america australia south

~~africa or developing countries with such similarities we asked ourselves why not share our common experiences~~
for mutual benefits the question developed into an idea and the idea into this book we started by selecting what we considered were important topics and then we invited friends and colleagues to join us in putting our experiences and beliefs from years of practice to readers from all over the world to demonstrate our common concerns and to learn from one another nursing patients with cancer principles and practice is a major new text a comprehensive evidence based source book that provides a detailed foundation for adult cancer nursing it explains the essential social and scientific basis of modern cancer management and equips nurses with the key skills and knowledge required to work in cancer care teams the content is based upon assessment and intervention of patient and family needs and aims to prepare nurses to work with cancer patients and their families across a range of settings back cover more than 100 cases teach how you how to apply pharmacotherapeutic concepts to real world clinical situations pharmacotherapy principles and practice study guide third edition includes more than 100 patient cases that correspond to chapters in the third edition of pharmacotherapy principles and practice these cases are presented in realistic fashion using terms and abbreviations that would normally be found in a patient s medical record patients in these cases have drug therapy problems requiring identification and management for each case you will be asked to develop a patient database drug therapy problem worksheet and pharmacotherapy care plan using the forms provided with pharmacotherapy principles and practice study guide you will learn how to navigate through the process of applying your knowledge of pharmacotherapy to specific patient cases by organizing patient data to logically assess a patient s medication issues and formulate a sound pharmacotherapy care plan each case includes learning objectives patient presentation targeted questions followed by hints that refer you to pages in pharmacotherapy principles and practice third edition where you can find the information necessary to answer the question follow up global perspective which highlights an issue related to the case that is important to countries outside of north america or involves selected ethic groups or races case summary student workup where you are asked to review the patient case for missing information and to complete the various patient forms
