young physicist jenna wilkes has done the impossible and the whole scientific world is shaking on its pillars could it be that conventional science has misunderstood the very fabric of the universe could there be infinitely more to it than anyone has ever guessed could science s whole concept of reality be unreal jenna s discovery drills into the heart of reality itself and that s why the establishment is so determined to suppress it how far will they go to hide the truth big name scientists the pentagon and shady politicians plot and scheme to silence her one way or another they did it once seven years earlier this time the stakes are incalculably higher jenna has more than just a scientific revolution in her hands if the establishment can t stop her the whole world will be changed in ways not even jenna can imagine
