excerpt from lecture notes for chemical students vol 1 inorganic chemistry the contents of this little book are to a great extent a transcript of the notes of my course of lectures on inorganic chemistry delivered at the royal college of chemistry these notes having been considerably amplified only in the earlier chapters on nomenclature notation and the atomicity of elements these notes were originally published in one volume but at the request of numerous readers i have now divided them into two of which the present on inorganic chemistry is the first the second volume on organic chemistry is nearly ready for the press and will shortly be published about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
