Polish River Basins and Lakes – Part II 2019-04-23

this book reviews the latest research and developments concerning the biodiversity and biocontamination assessment of aquatic ecosystems in poland the authors present expert analyses of the current biological status of polish surface waters and examine a broad range of elements related to aquatic ecosystems including macrophytes phytoplankton zooplankton and macroinvertebrates microorganisms fish and selected invasive aquatic species a set of conservation and restoration practices and a review of protected sites within the polish basins and catchment areas are also provided this book and the companion volume polish river basins and lakes part i hydrology and hydrochemistry offer valuable resources for students environmental chemists biologists geologists hydrologists and surface waters managers interested in the environmental conditions of poland s surface waters

Biologie des poissons d'eau douce européens (2e éd.) 2013-07-01

biologie des poissons d eau douce européens par son champ d étude vaste et ambitieux est un ouvrage de référence en ichtyologie dulçaquicole couvrant l ensemble des aspects écologiques écobioécologiques écophysiologiques et éthologiques il dresse une présentation détaillée de 88 espèces auto ou allochtones morphologie anatomie distribution géographique habitats modes de vie et activités physiologiques 453 autres espèces sont également répertoriées cette 2e édition a été largement revue et augmentée compte tenu de l importance des données scientifiques récentes outre des compléments utiles portant sur les habitats et les modes de vie cet ouvrage s enrichit des nombreux apports génétiques qui ont parfois révolutionné les concepts anciens relatifs aux origines paléo historiques et paléo géographiques des espèces des extensions ou des réductions de répartitions géographiques ont été consécutives à des transferts d origine anthropique à des dégradations physiques et chimiques et à la récente influence du global warming sans oublier les changements de statut dans le domaine de la systématique au fil d un livre d une grande rigueur scientifique abondamment illustré dont 64 aquarelles originales et plus de 70 cartes géographiques pertinentes et complété par un glossaire et une importante bibliographie le lecteur abordera la connaissance des poissons européens d une façon à la fois originale et attrayante cet ouvrage s adresse à un large public étudiants de 2e et 3e cycles en biologie zoologie écologie hydrobiologie environnement ingénieurs et techniciens chargés de l aménagement de la gestion de la qualité et de la protection des milieux aquatiques services vétérinaires de l environnement de l agriculture de l Équipement auxquels il apportera les bases fondamentales nécessaires à leur action et plus largement tous les passionnés d ichtyofaune

Egyptian Coastal Lakes and Wetlands: Part II 2018-10-22

this volume investigates the challenges facing the egyptian northern coastal lakes focusing on the impact of climate change their biodiversity and sustainable management presenting up to date research it covers the following topics climate change and water quality modeling and their impacts on the sustainability of the lakes the economic role of the lakes the use of remote sensing in monitoring and the biodiversity of the lakes with detailed discussions further management strategies for the sustainable development of these valuable resources are proposed to maintain the lakes sustainability the book closes with a concise summary of the conclusions and recommendations presented in the preceding chapters as such it offers an invaluable resource for the academic community and postgraduate students as well as for environmental managers and policymakers

Journal of the Asiatic Society of Bengal 2022-08-26

reprint of the original first published in 1871

Journal of Ichthyology 2006

what have we learnt about the nile since the mid 1970s the moment when julian rżoska decided that the time had come to publish a comprehensive volume about the biology and the geological and cultural history of that great river and what changes have meanwhile occurred in the basin the human population has more than doubled especially in egypt but also in east africa locally industrial development has taken place and the aswan high dam was clearly not the last major infrastructure work that was carried out more dams have been built and some water diversions like the toshka lakes have created new expanses of water in the middle of the sahara desert what are the effects of all this on the ecology and economy of the basin that is what the present book sets out to explore 33 years after the publication of the nile biology of an ancient river thirty seven authors have taken up the challenge and have written the new book they come from 13 different countries and 15 among them represent the largest nilotic states egypt sudan ethiopia uganda and kenya julian rżoska died in 1984 and most of the authors of his book have now either disappeared or retired from research only jack talling and samir ghabbour were still available to participate again

The Nile 2009-05-06

la presente publicación evidencia que el desarrollo compatible es un estadio más avanzado que el tradicional

concepto de sostenibilidad cuyo empleo abusivo por parte de diferentes sectores económicos e intereses políticos ha derivado en un término polisémico que ha pervertido el enfoque originario además la compatibilidad entre el desarrollo y la preservación de la naturaleza forma parte de la esencia de muchos territorios de la cultura occidental porque lo que algunas limitaciones excesivas conllevan paradójicamente la degradación de los espacios geográficos que se pretenden conservar en esta obra se ponen algunos ejemplos de cómo es posible convivir en armonía determinadas sociedades manteniendo un nivel de vida adecuado basado en unos usos racionales del suelo que permiten al mismo tiempo respetar la biodiversidad

Proceedings of The Academy of Natural Sciences (Vol. LVII, Part II -- Apr., May, Jun., Jul., Aug., 1905) 1867

this book provides a detailed evaluation of the hydro ecological characteristics of the western balkans an area characterized by still preserved inland waters and fish resources important for the european continent as well as the biodiversity of inland waters important for the planet earth freshwater ecosystems cover only 1 of the earth s surface however they are a habitat for about 40 of fish species at the same time inland fisheries make less than 12 of the world s global fish catch with 43 coming from low income and food deficient countries africa south america southeast asia in europe the western balkans have significant fishing waters and fish resources including the middle danube drainage sava drina velika morava river systems large ancient lakes skadar shkodra ohrid prespa dojran and the adriatic basin characterized by endemic and commercially important species however in contrast to the high fishing potential in a significant part of the western balkans diverse and specific political economic and social factors largely had a negative impact on the state of fish resources this volume is multidisciplinary and provides a sound knowledge base for scientific and practical fisheries in addition it may be a valuable guide for managers and conservationists worldwide to adapt methods and procedures for the ecological sustainability of fish resources under specific local natural and socio economic conditions finally the content is a good reference for natural sciences and agriculture students studying fish fish resources and fisheries sciences it would improve their knowledge and perspectives on the challenges of sustainable use and conservation of inland water resources

rote listen haben in Österreich eine lange tradition nach den fassungen von 1983 und 1994 bietet die grüne reihe des lebensministeriums nun eine vollständig neue bearbeitung ausgewählter tiergruppen das umweltbundesamt wien hat ein einstufigssystem entwickelt das eine objektivierbare einschätzung von bestandssituation bestandsentwicklung habitatverfügbarkeit habitatentwicklung und weiterer gefährdungsindikatoren für jede art ermöglicht daraus wird

die gefährdungseinstufung abgeleitet und in international vergleichbaren gefährdungsklassen dargestellt erläuternde kommentare geben zu vielen arten auskunft über deren gefährdungssituation schutzprioritäten und dringenden handlungsbedarf im rahmen von bewahrungsprogrammen rote listen gefährdeter arten sind für jeden der im angewandten naturschutz tätig ist unverzichtbares arbeitswerkzeug mit dieser Neubearbeitung wird ein umfangreicher fundus an neuen daten und befunden für die Öffentlichkeit zugänglich gemacht bewahrung der biodiversität setzt voraus dass die am meisten gefährdeten elemente der artenvielfalt verlässlich identifiziert werden können die neuen roten listen liefern eine wichtige voraussetzung dazu

Desarrollo compatible: experiencias en Europa e Iberoamérica 2023-12-31

Том открывает серию публикаций под общим названием Определитель рыб и беспозвоночных Каспийского моря В данном томе приведены подробно иллюстрированные определительные таблицы всех родов и видов рыб и морских двустворчатых моллюсков Каспийского моря Они сопровождаются необходимой информацией по таксономии морфологии и распространению семейств родов и видов а также обзором их промыслового или ресурсного значения и роли в экосистемах Для понимания специфики каспийской фауны рыб и моллюсков книгу открывают физико географический обзор Каспийского моря прежде всего в связи с понижением и повышением уровня и очерк его геологической истории Специальное внимание уделено выявлению исторических путей и основных периодов формирования фауны в том числе современного периода во время которого произошло обогащение фауны моря инвазионными видами разных таксономических групп Приведён словарь терминов необходимых для понимания терминов из области морфологии общей зоологии таксономии и изучения инвазий Для зоологов ихтиологов малакологов специалистов в области изучения и сохранения биологического разнообразия студентов и преподавателей биологических специальностей высших учебных заведений а также всех интересующихся биоразнообразием Каспийского моря

Ecological Sustainability of Fish Resources of Inland Waters of the Western Balkans 2007

homo sapiens rank among the most parasitized of all animals in part this is because we know so much about all aspects of the biology of our species but in addition our varied habitat and diet and our global distribution exposes us to more infections than any other species whereas some familiar parasitic infections are responsible for much human disease and suffering the great majority are rare or obscure forms ignored by all but the most comprehensive texts the parasites of homo sapiens an annotated checklist of the protozoa helminths and arthropods for which we are home 2nd edition presents a comprehensive listing of them all closely following the pattern of the first edition this new edition incorporates a wealth of further information and data from the most recently

published research findings an indispensable guide for all parasitologists it presents a comprehensive checklist of all animals naturally parasitic in or on the human body each parasite listed includes a complete summary of its characteristics the structure of each entry includes the scientific name of the parasite synonyms for scientific names status of reported human cases geographical distribution and abundance parasite habitat on humans hosts transmission mechanisms human risk factors indication of host specificity status

Rote Listen Gefährdeter Tiere Österreichs 1932

in the heart of africa a unique lake attracts the attention of scientists since the beginning of the 20th century at the foot of the virunga volcano chain lake kivu harbors a vast amount of dissolved carbon dioxide and methane making this lake the most dangerous lake on earth but the lake furnishes also many goods and services for surrounding populations and may soon become the most important energy supplier in the area at the beginning of gas exploitation the time has come for gathering the large amount of scientific information acquired during past and present research on lake kivu the eleven chapters cover many aspects of the physics geochemistry and biology of the lake with a particular focus on the unique physical and geochemical features of the water column and on the ecological functioning of the surface waters the impacts of the introduced fish species and the potential impacts of methane exploitation are also summarized this multi disciplinary book may also be used as an introduction to the limnology and biogeochemistry of large tropical lakes as it covers various aspects of the physics geochemistry biology and ecology of the african great rift lakes

Proceedings of the Zoological Institute 2018-12-20

among the fishes a remarkably wide range of biological adaptations to diverse habitats has evolved as well as living in the conventional habitats of lakes ponds rivers rock pools and the open sea fish have solved the problems of life in deserts in the deep sea in the cold antarctic and in warm waters of high alkalinity or of low oxygen along with these adaptations we find the most impressive specializations of morphology physiology and behaviour for example we can marvel at the high speed swimming of the marlins sailfish and warm blooded tunas air breathing in catfish and lungfish parental care in the mouth brooding cichlids and viviparity in many sharks and toothcarps moreover fish are of considerable importance of the survival of the human species in the form of nutritious and delicious food of numerous kinds rational exploitation and management of our global stocks of fishes must rely upon a detailed and precise insight of their biology the chapman and hall fish and fisheries series aims to present timely volumes reviewing important aspects of fish biology most volumes will be of interest to research workers in biology zoology ecology and physiology but an additional aim is for the books to be accessible to a wide spectrum of non specialist readers ranging from undergraduates and postgraduates to those

with an interest in industrial and commercial aspects of fish and fisheries

Определитель рыб и беспозвоночных Каспийского моря. Том 1. Рыбы и моллюски 1974

acuariofilia peces ornamentales es una compilación de lo ya divulgado para que el aficionado en esta temática tenga la oportunidad de orientarse y le sirva de material de consulta para mantener vivos y saludables a peces y plantas en la obra se abordan varios asuntos de interés sobre la conservación de las peceras los distintos tipos de peces ornamentales y el cuidado y la reproducción de estos
