this book considers the so called unlikely intersections a topic that embraces well known issues such as lang s and manin mumford s concerning torsion points in subvarieties of tori or abelian varieties more generally the book considers algebraic subgroups that meet a given subvariety in a set of unlikely dimension the book is an expansion of the hermann weyl lectures delivered by umberto zannier at the institute for advanced study in princeton in may 2010 the book consists of four chapters and seven brief appendixes the last six by david masser the first chapter considers multiplicative algebraic groups presenting proofs of several developments ranging from the origins to recent results and discussing many applications and relations with other contexts the second chapter considers an analogue in arithmetic and several applications of this the third chapter introduces a new method for approaching some of these questions and presents a detailed application of this by masser and the author to a relative case of the manin mumford issue the fourth chapter focuses on the andré oort conjecture outlining work by pila

nietzsche naturalism and interpretation offers a resolution of one of the most vexing problems in nietzsche scholarship as perhaps the most significant predecessor of more recent attempts to formulate a postmetaphysical epistemology and ontology nietzsche is considered by many critics to share this problem with his successors how can an antifoundationalist philosophy avoid vicious relativism and legitimate its claim to provide a platform for the critique of arguments practices and institutions christoph cox argues that nietzsche successfully navigates between relativism and dogmatism accepting the naturalistic critique of metaphysics and theology provided by modern science yet maintaining that a thoroughgoing naturalism must move beyond scientific

reductionism it must accept a central feature of aesthetic understanding
acknowledgment of the primacy and irreducibility of interpretation this view of
nietzsche s doctrines of perspectivism becoming and will to power as products of
an overall naturalism balanced by a reciprocal commitment to interpretationism will
spur new discussions of epistemology and ontology in contemporary thought

art research philosophy explores the emergent field of artistic research art produced as a contribution to knowledge as a new subject it raises several questions what is art as research don t the requirements of research amount to an imposition on the artistic process that dilutes the power of art how can something subjective become objective what is the relationship between art and writing doesn t description always miss the particularity of the artwork this is the first book length study to show how ideas in philosophy can be applied to artistic research to answer its questions and to make proposals for its future clive cazeaux argues that artistic research is an exciting development in the historical debate between

aesthetics and the theory of knowledge the book draws upon kant phenomenology and critical theory to show how the immediacies of art and experience are enmeshed in the structures that create knowledge the power of art to act on these structures is illustrated through a series of studies that look closely at a number of contemporary artworks this book will be ideal for postgraduate students and scholars of the visual and creative arts aesthetics and art theory

the ethics of a potential urbanism explores the possible and potential relevance of giorgio agamben s political thoughts and writings for the theory and the practice of architecture and urban design it sketches out the potentiality of agamben s politics which can affect change in current architectural and design discourses the book investigates the possibility of an inoperative architecture as an ethical shift for a different practice just a little bit different but able to deactivate the sociospatial dispositive and mobilize a new theory and a new project for the urban now to come this particular reading from agamben s oeuvre suggests a destituent mode of both thinking and practicing of architecture and urbanism that could possibly redeem them from their social emptiness cultural irrelevance economic reductionism and proto avant garde extravagance contributing to a renewed critical encounter with architecture s aesthetic political function

a new york times bestseller named one of the economist s books of the year 2014 named one of the wall street journal s top ten best nonfiction books of 2014 kirkus reviews best nonfiction books of 2014 forbes s most memorable healthcare book of 2014 in the big fat surprise investigative journalist nina teicholz reveals the unthinkable that everything we thought we knew about dietary fat is wrong she documents how the low fat nutrition advice of the past sixty years has amounted to a vast uncontrolled experiment on the entire population with disastrous consequences for our health for decades we have been told that the best possible diet involves cutting back on fat especially saturated fat and that if we are not getting healthier or thinner it must be because we are not trying hard enough but what if the low fat diet is itself the problem what if the very foods we ve been denying ourselves the creamy cheeses the sizzling steaks are themselves the key to reversing the epidemics of obesity diabetes and heart disease in this captivating vibrant and convincing narrative based on a nine year long investigation teicholz shows how the misinformation about saturated fats took hold in the scientific community and the public imagination and how recent findings have overturned these beliefs she explains why the mediterranean diet is not the healthiest and how we might be replacing trans fats with something even worse this startling history demonstrates how nutrition science has gotten it so wrong how overzealous researchers through a combination of ego bias and premature institutional consensus have allowed dangerous misrepresentations to become dietary dogma with eye opening scientific rigor the big fat surprise upends the conventional wisdom about all fats with the groundbreaking claim that more not less dietary fat including saturated fat is what leads to better health and wellness

science shows that we have been needlessly avoiding meat cheese whole milk and eggs for decades and that we can now guilt free welcome these delicious foods back into our lives
